

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

# REPORT

OF THE

## SECRETARY OF THE TREASURY,

ON

### THE STATE OF THE FINANCES.

MARCH 28, 1860.—Resolved, That sixteen thousand copies of the Annual Report of the Secretary of the Treasury on the state of the Finances be printed for the use of the House.

TREASURY DEPARTMENT, *December 22, 1859.*

SIR: In compliance with the act of Congress entitled "An act supplementary to an act to establish the Treasury Department," approved May 10, 1800, I have the honor to submit the following report:

On the 1st of July, 1858, being the commencement of the fiscal year 1859, the balance in the treasury was.....

\$6,398,316 10

The receipts into the treasury during the fiscal year 1859 were as follows:

For the quarter ending September 30, 1858—

From customs .....	\$13,444,520 28
From public lands .....	421,171 84
From miscellaneous sources.....	959,987 34
From treasury notes.....	405,200 00
From loan authorized by act of June 14, 1858 .....	10,000,000 00

25,230,879 46

For the quarter ending December 31, 1858—

From customs.....	9,054,228 60
From public lands .....	402,190 97
From miscellaneous sources .....	306,200 24
From treasury notes.....	1,122,000 00

10,884,619 81

For the quarter ending March 31, 1859—

From customs.....	12,786,252 19
From public lands .....	490,947 78
From miscellaneous sources .....	503,319 58
From treasury notes.....	160,000 00
From loan authorized by act of June 14, 1858 .....	8,535,000 00

22,475,519 55

For the quarter ending June 30, 1859—

From customs.....	\$14,280,823 31	
From public lands .....	442,376 71	
From miscellaneous sources .....	313,052 17	
From treasury notes.....	7,980,200 00	
From loan authorized by act of June 14, 1858.....	85,000 00	
		<u>\$23,101,452 19</u>

The aggregate means, therefore, for the service of the fiscal year ending June 30, 1859, were.....	<u>88,090,787 11</u>
---	----------------------

The expenditures during the fiscal year ending June 30, 1859, were as follows :

For the quarter ending September 30, 1858.....	\$21,708,198 51
For the quarter ending December 31, 1858.....	17,956,347 85
For the quarter ending March 31, 1859.....	17,874,779 86
For the quarter ending June 30, 1859.....	26,212,185 35
	<u>83,751,511 57</u>

Which amount was applied to the various branches of the public service, as follows :

Civil, foreign intercourse, and miscellaneous .....	\$23,635,820 94
Service of Interior Department, (Indians and pen- sions) .....	4,753,972 60
Service of War Department .....	23,243,822 38
Service of Navy Department.....	14,712,610 21
Public debt .....	17,405,285 44
	<u>83,751,511 57</u>

As exhibited in statement No. 1.

Deducting the expenditures during the fiscal year 1859 from the aggregate means during the year, a balance remained in the treasury on July 1, 1859, of.....	\$4,339,275 54
From the 1st July to 30th September, 1859, being the first quarter of the current fiscal year 1860, the receipts into the treasury were as follows :	
From customs.....	\$15,947,670 62
From public lands .....	470,244 62
From miscellaneous sources .....	379,650 61
From treasury notes.....	3,611,300 00
From loan authorized by act of June 14, 1858.....	210,000 00
	<u>20,618,865 85</u>

The estimated receipts during the three remaining  
quarters of the current fiscal year are as follows :

From customs.....	\$40,000,000 00
-------------------	-----------------

From public lands .....	\$2,000,000 00	
From miscellaneous sources .....	1,500,000 00	
From treasury notes.....	5,756,400 00	
From loan authorized by act of June 14, 1858.....	1,170,000 00	
	<hr/>	\$50,426,400 00

Making the aggregate of ascertained and estimated means for the current fiscal year ending June 30, 1860 .....		75,384,541 39
		<hr/>

The expenditures for the first quarter of the current fiscal year 1860, that ending September 30, 1859, were:

For civil, foreign intercourse, and miscellaneous....	\$4,748,130 89
For service of Interior Department, (Indians and pensions) .....	1,739,176 11
For service of War Department.....	5,473,949 10
For service of Navy Department .....	3,381,551 90
For public debt.....	4,664,366 76
	<hr/>
	20,007,174 76

The probable expenditures from appropriations here- tofore made by law during the three remaining quarters of the current fiscal year to June 30, 1860, are estimated at.....	40,995,558 23
	<hr/>

Making the expenditures for the current fiscal year under existing authority.....	61,002,732 99
	<hr/>

Deducting this aggregate expenditure from the aggregate of the before-estimated means for the current fiscal year 1860 will leave an estimated balance in the treasury on the 30th June, 1860, of \$14,381,808 40.

*Estimates for the fiscal year from July 1, 1860, to June 30, 1861.*

Balance in the treasury on the 1st of July, 1860, as above stated .....	\$14,381,808 40
Estimated receipts from customs from July 1, 1860, to June 30, 1861.....	60,000,000 00
Estimated receipts from public lands from July 1, 1860, to June 30, 1861.....	4,000,000 00
Estimated receipts from miscellaneous sources from July 1, 1860, to June 30, 1861.....	2,225,000 00
	<hr/>
Aggregate receipts.....	80,606,808 40
	<hr/>

Estimated expenditures from permanent appropriations .....	\$8,173,582 48
Estimated expenditures from unexpended balances of appropriations .....	12,262,452 75
Estimated expenditures from new appropriations estimated for.....	46,278,893 56
	<hr/>
	66,714,928 79
	<hr/>

Deducting the aggregate estimated expenditures from the aggregate estimated receipts into the treasury during the fiscal year from July 1, 1860, to June 30, 1861, as above stated, the estimated balance will remain in the treasury on the 30th June, 1861, of \$13,891,879 61.

The failure of Congress at its last session to pass the bill for the service of the Post Office Department renders necessary appropriations for that department which must be paid during the present fiscal year. As these amounts are not contained in the preceding statement, it will be necessary to consider them, in order to arrive at the true condition of the treasury at the close of the present and next fiscal years.

It will be seen from the communication of the Postmaster General, accompanying my report on the estimates, that there will be required to pay the deficiency in that department for the fiscal year ending the 30th June, 1859, the sum of \$4,296,009; and to supply the deficiency for the present fiscal year ending the 30th of June, 1860, the further sum of \$5,526,324. In addition to these amounts, the Secretary of the Interior submits an estimate for the sum of \$539,350, which he will require during the present fiscal year to carry out certain Indian treaties approved at the close of the last session of Congress. These three sums, amounting to \$10,361,683, must be met during the present fiscal year, and must therefore be deducted from the estimated balance in the treasury on the 30th of June, 1860, which will leave in the treasury at that time an estimated balance of \$4,020,125 40, and an estimated balance on the 30th of June, 1861, of \$3,530,196 61. This last amount will be increased to the extent of the unexpended appropriations for the next fiscal year which may remain in the treasury undrawn on the 30th of June, 1861.

It will be seen that there will be no necessity to provide additional means for the treasury, provided the receipts should be equal to the estimates, and the appropriations made by Congress do not exceed the amounts estimated for by the department.

I submit, with much confidence, the estimate of probable receipts during the present and next fiscal years. It is based upon the operations of our trade and commerce for the last twelve months, and upon the conviction that the business of the country will continue in its present state of comparative prosperity.

At the last session of Congress I submitted an estimate of the probable receipts into the treasury for the then three remaining quarters of the fiscal year ending the 30th of June, 1859. The result has approximated the estimate with unprecedented accuracy—the actual receipts being \$38,579,391, while the estimate was \$38,500,000; and

as the present estimates are based upon similar data, it should greatly strengthen the confidence to be put in their correctness.

Some apprehension has been felt that the large amount of imports during the last twelve months would be attended with unhappy results in the business of the country. This apprehension would be well founded if the facts showed that the imports exceeded the wants of the country and its ability to pay for them. The imports during the last fiscal year (as will be seen by reference to table 7) were \$338,768,130, whilst the exports for the same period were \$356,789,462, showing an excess of exports over imports of \$18,021,332. As large as the imports for the last fiscal year were, they have gone into consumption. Table 47 exhibits the amount of goods in warehouse at New York, on the 1st of November, for a series of years. It will be seen that the amount on hand on the 1st of November last does not exceed the amount in previous years, when the country was highly prosperous and its business steady and regular. These figures do not exhibit an unhealthy state of trade and business. One fact, however, connected with our exports has attracted much attention, and led many to believe that we were importing beyond our ability to pay: I allude to the increase of specie in our export tables. If specie occupied in the business of the country only the position of a circulating medium, and the supply was limited accordingly, there would be just ground for this apprehension; such, however, is not the case. It constitutes an important element in the list of our productions; and, like all other productions, where the quantity exceeds the legitimate demands of the country for use and consumption, it becomes a very proper article for export.

It is estimated that since 1848 California has produced over five hundred millions of gold. Would her condition have been improved by retaining that amount of specie within her limits, to the exclusion of those articles required for the use of her citizens, and in exchange for which this specie has been sent to the Atlantic and abroad? During the same period Georgia has produced more than five million bags of cotton. The same policy which would require California to retain her gold, beyond the legitimate wants of her people, would, with equal propriety, require Georgia to retain within her own limits the excess of the production of cotton over the wants of her people. The argument is as applicable to all the States as to one, and I have used the illustrations of single States only because they were more marked and striking. Unless the export of specie goes to the extent of violating this manifest principle, it constitutes no just ground of alarm or anxiety. In this connection, it should be observed that the large excess of specie exports commences with the discovery of the California mines, and has increased very much in proportion to their increased production, as will be seen by reference to table 8, which exhibits, for a series of years, the amount of our export of specie. The exact amount of the production of the California mines during this period is not known, but it is believed that it exceeds very largely the amount which has been generally stated. We have no reliable mode of ascertaining it; but, from the best information I have been able to obtain, I

should estimate the amount for the last year at not less than seventy millions of dollars.

Whenever the export of specie shall exceed proper limits, the effect will soon be seen and felt in the financial and commercial operations of the country. It would probably be first exhibited in the specie basis of the banks, showing an increased proportion of circulation and deposits to the amount of specie in their vaults, and this would soon be followed by derangement and depression in the general trade and business of the country. At present there is no evidence that either of these results are to be apprehended. By reference to table 9 it will be seen that the specie basis of the banks, (when the tables for 1859 were prepared,) as compared with their circulation and deposits, is more favorable than in 1850, the year preceding the increase of specie exports. It is probable that some change has occurred since the last bank reports. Of that we have no reliable information; but it is not believed that it will materially vary the general proposition. It is appropriate here to remark, that in view of the large and constant increase of the production of the precious metals, the country should look to the policy of substituting specie, to a great extent, for the present paper circulation. The process should be gradual, and whilst it would not derange the business of the country, would operate as a wholesome check upon banking and overtrading. The adoption of an independent treasury system by the several States, as recommended in a former report, would go far towards the accomplishment of this desirable result.

There is no mode of ascertaining the amount of specie in general circulation. All estimates on that point are purely speculative. During a prosperous condition of the country, it no doubt increases with the demands of business; and whenever, from any cause, the supply is below the wants of the country, it will be manifested by a depression in trade and general embarrassment. Until these indications appear, we may safely calculate that there has been the usual and necessary increase.

With some persons the idea seems to prevail that we are necessarily overtrading with those countries to which our specie is carried, and, as the most of it goes to the ports of Great Britain, they conclude that we are therefore buying too largely of British productions. The fact that payments are made in England must not be considered as conclusive evidence that the debt has been contracted in the course of our trade with that country. By reference to table 10 it will be seen that our imports for the year ending June 30, 1859, from the East and West Indies, and other countries named in the table, exceed our exports to those countries to the full extent of the excess of our export of specie. It will also be observed that the articles which we import from those countries are articles of necessity, and generally such as are not produced in our own country. These articles must be had, and if we cannot furnish in exchange for them any other of our productions, they must be paid for in specie; and it is not material whether the specie for that purpose is sent to London or to the foreign port of exportation. If this branch of trade consumes the excess of specie exports, it would leave our commercial operations with all other

countries upon a safe basis, even in the estimation of those who indulge so many apprehensions on account of our heavy exports of specie. It should be observed, in this connection, that our exports to Great Britain for the last fiscal year exceed our imports about fifty millions; the excess, to a great extent, being applied to the payment of the demands of the countries to which I have just referred.

These views are submitted to the consideration of Congress in support of the opinion that we may look with confidence to a continued increase in the business of the country. The natural tendency in times of prosperity is to extravagance and overtrading, and this feeling should not be stimulated. If indulged, it will in the future, as it has done in the past, lead to revulsions and embarrassments; but there is no serious danger to be apprehended, if the increased business of the country continues to bear a proper proportion to those natural causes which produce and sustain it.

Entertaining these views, I do not doubt that the actual receipts into the treasury for the present and next fiscal years will be fully equal to the estimates. The only remaining question in connection with the estimates to be considered is the probable demands upon the treasury during this period. If the appropriations made at the present session do not exceed the amount contained in the estimates, it is believed that they can be met with the ordinary and extraordinary receipts already provided by law. The estimated balance that will be in the treasury on the 30th June, 1861, is only \$3,530,196 61, and leaves no margin for additional appropriations. If, therefore, the appropriations should exceed the estimates, or Congress should determine to provide within this period for the payment of any portion of the public debt, it will become necessary to make provision for such contingencies. The idea of increasing the public debt to meet the ordinary expenses of the government should not be entertained for a moment. If additional demands are created upon the treasury by the legislation of the present Congress, provision must be made to meet them by such increase of tariff duties as may be required for that purpose. In such an event, I would respectfully refer Congress to my last report, as containing the views of the department on the subject.

A critical examination of the estimates for the next fiscal year, submitted to Congress, will exhibit considerable reduction from former estimates. The remark is applicable to every department where any discretion can be exercised over the expenditure. In most cases the amounts are fixed by law, and can neither be increased nor diminished by the head of the department. I have endeavored to enforce the strictest economy in the various branches of the Treasury Department. In the single branch of collecting the revenue, the expense has been materially reduced by adopting and carrying out, where the power existed, the reforms recommended in the bill for reorganizing the collection districts of the United States, &c., submitted by the department to the last Congress. With further reductions which it is contemplated to make, I have felt warranted in reducing the estimate for the expense of collecting the revenue for the next fiscal year \$500,000. The passage of the bill to which I have referred would greatly aid the department in this work of reform.

The public debt on the 1st July, 1858, as stated in my last annual report, was \$25,155,977 66. The act of June 14, 1858, authorized an additional loan of \$20,000,000, which has been accordingly negotiated. Of this \$18,620,000 had been paid into the treasury, and the stock issued therefor on the 1st of July, 1859, the commencement of the present fiscal year. A portion of the remainder has been since paid, and the stock therefor issued. The balance will doubtless be soon completed, which will make the permanent public debt \$45,155,977 66.

Of the temporary public debt authorized by the act of December 23, 1857, providing for the issue of \$20,000,000 in treasury notes, there were outstanding on the 1st July, 1858, as shown by my last report, \$19,754,800. On the 30th June, 1859, the close of the last fiscal year, the amount of these notes outstanding was \$15,046,800. The details of the various descriptions of the public debt on the 30th June, 1859, are shown by the statement marked 3.

In the estimated means of the treasury for the present and next fiscal years, it will be seen that no provision is made for the permanent redemption of any portion of the \$20,000,000 of treasury notes. The authority for reissuing these notes will expire on the 30th of June next; and it will, therefore, be necessary for Congress to extend the law for that purpose for another period.

On the 21st of January last, I submitted to the House of Representatives, in answer to resolutions of that body, a report in reference to the export and import trade of the United States with Great Britain and France. The investigation which I was required to make for that purpose brought to my attention the various systems adopted by different countries of obtaining and keeping commercial statistics. These systems are so variant that I found it impracticable to institute any comparison of the facts exhibited in the tables of different governments, which could be regarded as accurate and reliable. Every commercial man will pronounce such a state of things an evil of great magnitude, and one which demands a prompt remedy, if it can be found.

To avoid a recapitulation of the views presented in that report, and for the purpose of bringing the subject to the attention of the present Congress, I append to this report a copy of that communication, (marked 11,) and would ask for it a consideration at this time. I do not know a greater benefit that could be conferred upon the commercial interest of the country, at so small an expense, than the adoption by the leading commercial governments of the world of a uniform system of commercial statistics—a uniform unit and currency, and uniform weights and measures. Upon one branch of the subject, valuable suggestions will be found in the accompanying report of the Director of the Mint. The importance of the subject cannot be over-estimated, and it is hoped that it will receive the careful consideration of Congress at its present session.

I must again call the attention of Congress to the provisions of the act of March 3, 1857, on the subject of deposits by disbursing agents, and repeat the recommendations heretofore made for its modification. In my former reports I have presented the reasons for some change of that act so fully that I deem it unnecessary to do more at this time

than to refer to those reports, and for the reasons therein stated, again to request the action of Congress on the subject.

The attention of Congress is particularly called to the accompanying report from the engineer in charge of the Bureau of Construction. It gives a full and detailed account of the operations of that bureau, charged with the construction of the various public buildings under the direction of this department. The principal buildings now in process of construction are the Treasury extension in this city, and the custom-houses at Charleston and New Orleans. These buildings were commenced under the direction of Congress before I came into office. Each of them was planned on an expensive scale, and large amounts had been expended in their erection before my connection with this department. For this, neither my predecessors nor myself are responsible. Our duty in the premises has been simply executive. Under these circumstances, I submitted at the last session of Congress estimates for continuing the work upon them during the present fiscal year. Having been commenced, I deemed it sound policy and true economy to prosecute the works with energy to their completion. The estimates submitted at the last session were made under that conviction. Congress took a different view of the subject, and reduced the estimates to a point which seemed to look merely to the duty of preserving the unfinished works from injury, and suspending, for the present, at least, their completion. In accordance with the policy thus indicated, I directed the operation on all these buildings to be brought within the means at the disposal of the department; and when those means were exhausted, to stop the work. The report of the engineer in charge will show that these directions have been thus far complied with. The balances of former appropriations will soon be exhausted, when all further operations will be suspended. In accordance with the policy so clearly indicated by the action of the last Congress, I have only estimated for a sufficient sum to keep them from injury for the next fiscal year. If Congress should adopt a different policy at the present session, and determine to continue operations on these works, I would respectfully refer to the report of the engineer in charge for estimates of the amounts that will be required during the next fiscal year.

I would again invite the attention of Congress to the subject of marine hospitals. The facts submitted, as well in the last as in the present report of the engineer in charge of the Bureau of Construction, demand an investigation of the subject by Congress. The views which I have heretofore presented are strengthened by each year's experience, and I would again press them upon the consideration of Congress. Three new hospitals have been completed, and are ready to be put in operation. Before it is done, the necessity and propriety of the step should be considered in the light of the facts presented in the reports to which I have referred. The refusal of the last Congress to authorize any additional buildings of this character, would indicate a concurrence with the views of the department on the subject. It only remains to be determined what disposition should be made of those which have already been erected.

In reference to other public buildings authorized by previous acts

of Congress, and heretofore suspended for the want of means, steps have been taken to secure the selection of proper sites. Plans and specifications are being prepared with a view of commencing their erection when it can be done with a due regard to the condition of the treasury. The policy of the last Congress, in suspending the work upon those already in process of construction, would indicate that new ones should not be commenced until provision is made for the completion of those already begun.

The condition of the Louisville and Portland canal is so anomalous as to require the action of Congress. Under the amended charter of the State of Kentucky, of January 21, 1842, the stock previously belonging to individuals has been redeemed from the earnings of the canal, except that a single share each is held by certain persons to qualify them to act as directors of the corporation. The act of the State of Kentucky, of February 22, 1844, provides that, when the United States shall become the sole owner of the canal, the jurisdiction of the State over it shall be yielded to the United States.

The amount advanced from the treasury for the construction of this canal was \$233,500, and the amount of dividends paid into the treasury, up to 1842, is \$255,182 48; so that, in fact, the whole cost of the stock held by the United States had been reimbursed previous to the amended charter. Since that charter, and the redemption of the stock of individuals under its provisions, the earnings of the canal have been applied to its improvement by the directors, and whenever the amount has exceeded that requirement, it is understood the tolls have been reduced. No revenue has been received from it since that period, and none is contemplated.

Under the laws of Kentucky the United States are substantially owners of this canal, but no authority has been given to supersede the corporation in its management, no action having been had by Congress on this subject since the amended charter by Kentucky. Under these circumstances I would refer the whole subject to Congress for such action as they may deem proper.

The annual report of the Director of the Mint is herewith transmitted, (marked 12,) as also the reports of the various bureaus of the Treasury Department, (marked from A to L.) They contain much interesting information in connection with their respective branches of the public service.

The report of the Superintendent of the Coast Survey will be laid before Congress at an early day.

All which is respectfully submitted.

HOWELL COBB,  
*Secretary of the Treasury.*

To the SPEAKER

*Of the House of Representatives of the United States.*

# INDEX TO REPORT ON THE FINANCES.

	Page.
The Secretary's report .....	3
Statement No. 1 of the receipts and expenditures for the year ending June 30, 1859....	16

F. BIGGER, Register.

TREASURY DEPARTMENT, Register's Office, November 28, 1859.

No. 11.

*Letter from the Secretary of the Treasury.*TREASURY DEPARTMENT,  
January 21, 1859.

SIR: The resolutions of the House of Representatives of the 20th December, 1858, call for information from the department in reference to the export and import trade of the United States with Great Britain and France, for the years 1853, 1854, 1855, 1856, and 1857. The information asked for, so far as it relates to our imports from Great Britain and France, has been compiled from our official documents, as required by the terms of the resolutions, and is contained in the accompanying table, marked A. There are no documents or records in this department from which the official statements of those countries of their exports to this country can be obtained. Desirous, however, of responding as far as practicable to the call of the House, I have applied to the State Department, as well as other sources, and have obtained all the information on the subject within my reach.

Table B will exhibit a statement of the exports of Great Britain to the United States, taken from their "annual statement of the trade and navigation of the United Kingdom," for the years named in the resolutions. Table C contains a similar statement for France, for the same years, except 1856. It has been compiled from the tableaux general of France for each of those years. I have not been able to obtain the one for 1856.

The French tables distinguish between "general" and "special" commerce, and between "official" and "actual" values.

General commerce, as to exports, signifies all articles sent abroad from France, without regard to their origin, whether French or foreign.

Special commerce includes only such of the above articles as are produced in France or have been imported there and paid the import duty. It excludes such as pass *in transitu* through the country.

By "official value" is meant a fixed valuation on a basis established in 1827, and never varied. It is only useful as affording a standard of comparison of the commerce of France of different periods.

"Actual value" is intended to represent the true market price, ascertained at the time of exportation.

The British export tables show what is called the "declared" value, corresponding to the French "actual value." They also discriminate between articles the growth and manufacture of the United Kingdom, answering to the French special commerce, and articles of foreign and colonial production, which, when added to the former amounts, make up the "general commerce."

I would respectfully call the attention of the House to some of the facts developed by these tables.

It will be seen that the exports from France to the United States,

as shown by the French tables, exceed very largely the imports from France as stated in our own tables. For the same period of time the exports from Great Britain to this country, as shown by their tables, fall considerably below our imports from Great Britain, as exhibited in our tables. To ascertain with certainty the extent to which the deficiency in the one case is accounted for by the excess in the other, is impracticable. This arises from the different modes adopted in the several countries of making up their statistical tables. The nomenclature of the same article being in many cases different in each country; for instance, the term "silks" in the French tables often includes articles of a mixed fabric, composed in part of either wool, cotton, or both, whilst the same article will be classified in the tables of Great Britain and the United States as a mixed fabric. To compare, therefore, the French exports of silk with our imports under the same general head would fail to exhibit the truth of the case. I have instituted an analysis of the general results shown by the tables for 1857, with a view of ascertaining the connection of the trade of the two countries of Great Britain and France with our own; and as the greatest disparity seemed to exist in the article of silks, I selected it for the examination. To do so, however, it became necessary, for the reason just given, to include all articles in the tables of either country that contained silk as a component part; and to make the comparison a fair and proper one, I have embraced not only silks, but wool and cotton goods and mixed fabrics. The French tables show that for that year their exports to this country, including silks, woollen and cotton goods, amounted to \$44,814,999, whilst our import tables for the same period show that we received from France only \$23,090,755. For the same period the exports of the same articles from Great Britain, as shown by their tables, amounted to \$35,984,107, whilst our import tables show that we received from Great Britain \$55,148,137—the excess in the case of France being nearly supplied by the deficiency in the case of Great Britain.

Table D exhibits the details of this statement. In this and all other calculations involving the French statistics, I have adopted their table of general commerce and actual value.

It would seem, then, that to form any safe and practical judgment upon the course of the trade and commerce of the two countries of Great Britain and France, or either of them, with the United States, as shown by their respective statistical tables, it is proper and necessary to consider them in connection and not separately.

If we had similar tables from all other countries with which we have commercial intercourse, the examination might be made with much more certainty and satisfaction; but they cannot be had, and for the present we must confine our investigation to our sources of information. In this view of the subject I have prepared the annexed table E, which contains the exports from Great Britain and France for the years 1853-'54-'55, and '57, as shown by their respective tables, as well as our imports for the same period from these countries as shown by our tables. It will be seen from this exhibit that the same general results are found which appeared in the particular case of silks, cotton, and woollen goods, which were examined for the year

1857, and accounts, in a great measure, for the apparent large discrepancy between the French tables and our own when considered separately.

The propriety of considering the commerce of Great Britain and France with this country jointly, is justified not only by the results which such a comparison exhibits, but by the well known course of the trade of these countries.

The exports of France to this country are brought almost entirely either directly from France or through England, and the products of all other countries, except France, which come to us through England, are charged in the export trade of England. These two facts show the justice and propriety of the rule upon which these calculations have been made.

In considering the facts which these tables exhibit it is proper, however, to call your attention to the difficulties which arise in drawing any reliable conclusions from them.

1. The tables for Great Britain and France are for the calendar year, whilst ours are made up for the fiscal year, which ends on the 30th June. To have prepared the latter for the corresponding calendar years would have required such length of time as would have delayed an answer to the resolutions to a very late period of your session, and would thereby have rendered the information useless for the present purposes of the House.

2. The different modes of the several countries in preparing and keeping their commercial statistics will account for discrepancies, which would otherwise appear inexplicable. When we reflect upon the various elements which enter into the subject, and that no fixed rule prevails in all of them regulating the matter, it is not surprising that there should be found large margins for difference and variation. If these discrepancies were found to exist alone in the comparison of our own with the statistics of other countries, it would present a startling proposition for a satisfactory solution. Such, however, is not the case. I find that a comparison of the tables of Great Britain and France, in reference to their commerce with each other, made upon the same rule which has been adopted in the preparation of the accompanying tables, exhibits a very similar state of things. For instance, it appears from the French tables for 1857, that their exports to Great Britain amounted to \$102,024,112; whilst the tables of Great Britain show that their imports from France for the same period was only \$57,912,570. I have not been able to procure the official statements of other countries with which to institute a similar comparison, but from information derived from unofficial sources, I am led to believe that the same result would be reached in comparing the commercial statistics of France with those of other countries in Europe. These results, unexplained, are well calculated to excite surprise. The solution of them must be found in the reasons to which allusion has already been made. The explanations before given of the terms, general and special commerce, official, actual, and declared values, as used in the tables of Great Britain and France, go far to illustrate the correctness of this view of the subject. The fact that foreign articles, under certain circumstances, are charged in the

general commerce of one country as a part of its own exports, and not so charged in another, under the same circumstances, and that the mode of ascertaining the true value differs in different countries, and the name by which an article is known in the commerce of one country is different from that in which it is known in another, are considerations which force the mind almost irresistably to the conclusions that it would be both unwise and unsafe to rest confidently upon any judgment drawn from a comparison of the statistical documents of different countries.

I have referred to these facts with a view of calling the attention of Congress to the subject. A defect so plain and palpable, upon a subject so important in every view of it, should be cured if practicable. The remedy is not within the control of any single government. It requires the coöperation of the leading commercial countries of the world, and I see no good reason why that coöperation cannot be obtained. The object to be accomplished is, to effect a uniform system of preparing and keeping commercial statistics. It is true that many difficulties present themselves in the way, but none that may not be overcome. A question of a similar character, indeed, intimately connected with the one under consideration, has already attracted the attention of Congress, and has been the subject of recent legislation. I allude to the movement in favor of obtaining a uniform unit, and also a uniform currency in the leading commercial countries of the world. At the present session of Congress, I have submitted a report on this subject from Professor John H. Alexander, of Maryland, who visited England under an appointment from this department, authorized by a recent act of Congress. Whilst the efforts of Mr. Alexander have not been attended with all the success we could have desired, they have opened the way for a future and more extended prosecution of the matter. In connection with it, the subject of present discussion attaches itself so closely that it not only may, but ought to be considered at the same time. Every one will admit that a uniform currency and a uniform system of commercial statistics, established and maintained by the leading governments of the world, would confer incalculable benefits and advantages upon all. It would throw a flood of light upon the trade and commerce of the world, where, at present, we are surrounded by doubts, difficulties, and embarrassments, which defy a solution entirely clear and satisfactory to the mind.

A reform of this character cannot be accomplished within a short period of time; but the remuneration which it promises to bring would compensate for much time, labor and expense. Our own government occupies a position, both political and commercial, which would justify her in taking the lead in the matter. An invitation from the United States to the commercial countries of Europe to meet in a representative body for consultation on these subjects would doubtless be promptly responded to. Recommendations from such a body, looking to the attainment of such desirable results as a uniform currency, uniform weights and measures, and a uniform system of commercial statistics, would commend themselves very strongly to the favorable consideration of, and probable adoption by, each of the countries so represented.

I regard the occasion a proper one to submit these suggestions to the consideration of Congress, for such action as may be deemed advisable.

I am, very respectfully,

HOWELL COBB,  
*Secretary of the Treasury.*

HON. JAMES L. ORR,  
*Speaker of the House of Representatives.*

A.

Statement exhibiting the aggregate imports from Great Britain and France for the fiscal years ending June 30, 1853, 1854, 1855, 1856, and 1857; also the quantity (as far as the same can be given) and value of iron and manufactures of iron, and manufactures of wool, from the former, and manufactures of silk, wines, and distilled liquors, from the latter, as shown by the United States custom-house returns.

NOTE.—1856, no returns of quantity or value.

\* Furnished by Department of State.

† Litro.

By "official value" is meant a fixed valuation on a basis established in 1827, and never varied. It is only useful as affording a standard of comparison of the commerce of France of different periods.  
 "Actual value" is intended to represent the true market price ascertained at the time of exportation.

## No. 12.

MINT OF THE UNITED STATES,  
*Philadelphia, November 5, 1859.*

SIR: I have the honor to present the following report of the operations of the mint and its branches for the fiscal year ending June 30, 1859:

The amount of bullion received at the several minting establishments of the United States during the year was as follows: Gold, \$29,563,380 63; silver, \$7,336,609 67—total deposits, \$36,899,990 30.

The coinage operations of the same period were as follows: Gold coins, \$17,296,077; fine gold bars, \$13,113,876 70; silver coins, \$6,187,400; silver bars, \$646,231 47; cent coins, \$307,000—total coinage, \$37,550,585 17; comprised in 53,550,522 pieces or denominations of coins.

The statistics above presented show the amount of bullion received and operated upon during the year; it includes, however, some redeposits of bullion; for example, bars made at one institution are sometimes deposited at another for return in coins. Deducting these redeposits the amount of the precious metals brought into the mint and its branches during the year was \$34,001,095 76.

The operations were distributed among the several institutions as follows: At the mint in Philadelphia, gold deposits, \$2,572,989 63; gold coins struck, \$2,611,360; fine gold bars, \$49,286 59; silver deposits and purchases, including amount received in exchange for cents of the new issue, \$2,444,923 39; silver coins executed, \$2,999,900; silver bars, \$9,341 08; cents coined, \$307,000—total deposits of gold and silver, \$5,017,913 02—total coinage, \$5,976,887 67. The coinage was comprised in 44,833,111 pieces.

At the branch mint at New Orleans the deposits amounted to \$3,322,395 30, of which the sum of \$517,822 05 was in gold, and \$2,804,573 25 in silver. The coinage amounted to \$530,000 in gold coin, \$2,889,000 in silver coin, and \$334,996 47 in silver bars—total coinage \$3,753,996 47, comprised in 7,184,500 pieces.

The branch mint at San Francisco received gold deposits to the amount of \$14,098,564 14, and silver, the sum of \$313,776 33. The coinage operations were as follows: Gold coin, \$13,886,400; fine gold bars, \$19,871 68; silver coin, \$298,500; silver bars, \$29,469 87—total coinage \$14,234,241 55, comprised in 1,463,893 pieces.

The deposits at the branch mint at Dahlonega amounted to \$65,072 24; the coinage, \$65,582 00; the number of pieces struck was 19,003.

At the branch mint at Charlotte, the sum of \$205,252 24 was deposited for coinage; the coinage, comprised in 44,735 pieces, amounted to \$202,735. The operations of this branch, as well as that at Dahlonega, are confined to gold.

The assay office at New York, received, during the year, the sum of \$12,103,680 25 in gold bullion, and \$1,773,336 70 in silver. The number of fine gold bars stamped at this office was 3,295 of the aggregate value of \$13,044,718 43; silver bars, 1,985, of the value of \$272,424 05.

The amount of gold, the production of the mines of the United States, deposited during the year, was \$27,213,557 15. The silver of

domestic production was \$273,167 47; the principal proportion of which was derived from the gold deposits—being silver parted from native gold. The Lake Superior region has yielded us about \$30,000 in silver. The mines of North Carolina have produced \$23,000 of the same metal. The sources from whence these supplies of the precious metals were derived are more fully stated in the tables attached to this report.

Prior to the passage of the act of February 21, 1857, a large portion of the circulation of silver coins consisted in the Spanish and Mexican fractions of the dollar. One of the objects of that law was to retire these coins from circulation. This object has been in a great measure attained. They have ceased to circulate in most of the States of the Union, and are rapidly disappearing from such distant portions of our country where they are tolerated. Our circulation is thus being rid of a foreign currency, which interferes with our own excellent system of decimal coinage and accounts. It is to be hoped that this reform in our circulation will lead our people to adopt the language of our system, and abandon terms which are absurd, and would be ridiculous if they were not so common. I refer especially to the term "shilling," which never had a place in our coinage, and was variable as a term of account in different localities during our colonial existence. Since the passage of the act referred to, the mint has received and melted Spanish and Mexican fractions of a dollar to the amount of \$1,620,997; of this amount the sum of \$546,305 was deposited for exchange for cents of the new issues. For this latter purpose, also, we have received the copper coins of the former issues to the amount, in value by tale, of \$95,241.

The charge on gold coinage, and the profits on the coinage of silver and of cents, amounted to near \$235,000. This sum shows the amount of revenue derived from the coinage operations of the mint, and its branches during the year.

The suggestion in my last two annual reports relative to the propriety of applying the coinage charge of the half of one per cent. to fine bars made at the mint and its branches and paid to depositors, has heretofore received your approval. I beg again to call your attention to the subject. The propriety of the measure is fully shown in your report on the finances for the year 1856-'57. If the charge referred to had been imposed during the last year it would have yielded a revenue to the government of \$65,000, without doing any injury to depositors. It is certainly, for obvious reasons, connected with the revenue as well as the currency of the country, inexpedient to make a distinction in favor of fine bars. In the report above cited you remark: "I concur with the director of the mint in the opinion that it is not good policy to impose this half per cent. on all bullion coined for circulation, and at the same time exempt from it bars withdrawn for exportation."

The gold dollar is a convenient and useful coin, and is well received, particularly in such portions of the United States as have wisely excluded small bank-notes from circulation. The first issues of this denomination were made in 1849. It was then supposed to be necessary to contract the diameter, and by thus giving more body to the

piece obtain a good impression in coining. But the property of tangibility suffered in consequence of this contraction, and hence the piece, being of small size, was easily lost, and became an object of dislike to a considerable portion of the people. In 1853 the experiments made were satisfactory, on the point that the diameter of the piece might be enlarged and a good impression in the coinage obtained. Accordingly, in 1854, the diameter of the dollar was increased the one-tenth of an inch. This enlargement has been, I believe, every where regarded as a decided improvement. But the circulation of the two pieces, differing, as they do, not only in size but in devices, is an inconvenience to the public. Again: the amount of the gold dollar coinage of both kinds issued is near seventeen millions. This amount seems to exceed the wants of the community. It is well known that, in the States where paper bills of small denomination are legalized and current, the gold dollar, even of enlarged diameter, is scarcely welcome. This sentiment appears to be not confined to those interested in paper circulation, but seems in some places to amount to a popular prejudice. This is not easily accounted for, when the superior advantages of the gold dollar to the paper dollar are considered, and when we regard the conduct of the note-holders themselves in a season of bank panic. But it cannot be denied that there are some indications of a popular wish to be relieved from a portion of these coins, as it is well known that, in certain quarters, expedients are resorted to to push them off as a redundancy or an annoyance. From these considerations I am induced to recommend the recall of the thick dollars with a view to their recoinage into other denominations. This expedient would suitably reduce the aggregate circulation of that class, and make room for a moderate annual continuance according to demand. The loss on the recoinage of these pieces would be about the half of one per cent., that being nearly the loss by wear, as shown by the weighings of considerable parcels taken from circulation. The amount of that coinage—issued from 1849 to 1853—was \$11,692,204. Few, or none, of these pieces have been exported; but a considerable number must have been lost, and some melted down by jewellers. Assuming, at the utmost, that 11,000,000 are extant, the loss on the recoinage of this amount would be \$55,000. The recoinage might with propriety be limited to such pieces as are now in, or may hereafter be received at the treasury and assistant treasuries of the United States, and thus it would be gradually effected. The loss on the recoinage might be defrayed at the principal mint by appropriating such portion of the profits on the cent coinage as may be required, and at the branch mints (where cents are not coined) a similar provision might be made from the gold coinage charge. If this recoinage should be authorized, it seems proper that the loss in weight, where it arises from the ordinary circulation, should fall upon the government and not upon the individual owners of the coin. Pieces that are in any manner mutilated should not be received.

The statement in my last annual report as to the value of gold from Kansas, or "Pike's Peak," was based upon a single deposit, which was incorrectly affirmed by the depositor of it to be the production of that region. The mint being now almost daily in the receipt of the genuine

article, both in washed grains and amalgam, we can give more correct, though not very definite, information concerning its value. The fineness of the gold has the average range of 800 to 900-thousandths, but generally lies within 825 to 845. The alloying metal is silver, as in all cases of native gold. The value of the gold in bars, allowing for the silver, is nearly or quite \$17 50 per ounce, on the average. It is not so easy to arrive at an average of the gold in grains or amalgam, on account of the variable loss in melting. Until within a recent period it was found that this loss would make a reduction of about two dollars per ounce upon the value above stated; but latterly the manipulations at the mines seem to be improving, as is indicated by the loss being reduced to about one dollar and fifty cents per ounce; and it may ere long be brought down to one dollar or less. At present, therefore, the mint value of Kansas gold in grains or amalgam, to speak in general terms, is about sixteen dollars an ounce, troy weight. It will be seen by reference to the tables attached to this report that the amount of gold received from the country just referred to, during the last fiscal year, is quite inconsiderable. But it may be noted that since the close of the year the receipts have increased. The amount received at the mint in Philadelphia up to the date of this report is \$97,485.

In consequence of the frequent application made for copies of our national and public medals, I am induced to renew the recommendation heretofore made, that a medal office be established at the mint. Most of the dies from which the medals ordered by Congress were struck are preserved at the mint. But the medals of gold and silver which were prepared from them have nearly all disappeared. They are either lost or melted or otherwise destroyed. A few of them having fallen into the hands of persons unconnected with the heroes to whom they were presented, have been brought to the mint for coinage. It is proposed to multiply these memorials of our national history by striking copies from the dies which now belong to the government, and supply them to such persons, associations, or societies as may apply for them. No appropriation will be required to accomplish this desirable object, as it is intended that the price of the medals shall cover the expenses of striking them.

In compliance with the act of Congress of the 21st February, 1857, I present herewith a tabular statement of the fineness, weight and value of foreign coins. It is similar to the one contained in my last annual report, with the addition, however, of three items of some interest. The first of these is the Canada coinage of silver, commencing with the date 1858, and consisting of denominations somewhat similar to our own, namely, of five, ten, and twenty-cent pieces. But they do not in any other particular agree with our coinage, being of different weight, and of the British standard of fineness commonly called sterling. The twenty-cent piece, compared with two dimes of the United States, is equal to 19.27 cents, but at the mint price of purchasing silver will yield only 18.66 cents. The smaller pieces are in the same proportion. It is certainly to be regretted that the English government, in thus providing for a coinage of similar terms to our own, did not make the values the same. This would have been a step in the direction of an international coinage, although of not much importance, considering

that silver in England and her colonies, as well as with us, occupies a subordinate position to gold.

The other two items requiring some notice are the "Vereinsthaler," or union dollar of Austria, and the same of Prussia. These pieces have been coined in conformity with the basis established by a very recent convention of all the states of Germany. This dollar, although differing in the standards of weight and fineness from the former German thaler or dollar, is of the same value; the variation of 71.7 cents in the case of the old coin, from 72 cents in the new, is merely due to the worn condition of the former. It is very interesting to observe that the German states have discarded the pound and mark weight of various and discordant sizes heretofore in use, and adopted a new *pfund*, or pound, identical with the half kilogramme, or 500 grammes, of the French system; and on the new coins of Austria and Prussia we have the legend, "thirty to the pound fine," meaning a half kilogramme of fine silver to thirty pieces. The standard of fineness—900-thousandths, or nine-tenths—is the same as our own. It is worthy of note that there is a tendency towards the adoption of a uniform fineness in the coinage of the different countries of Europe and America. At this moment the rule of nine-tenths fine is employed wholly, or partially, in the following countries: Austria, Belgium, Chili, France, German states, Greece, Mexico, New Granada, Peru, Prussia, Rome, Sardinia, Spain, Switzerland, and the United States. If England and Russia were to adopt the same fineness there would be a uniform standard in all the principal nations of the world, and hence the coins of each country would be of equal value if of equal weight, or of a difference in value in proportion to their weight. This is as far, I apprehend, as it will be found judicious to carry into effect the suggestion of an international coinage, which has been attracting the attention of statesmen and men of science in our country and abroad. But it is believed to be practicable to establish a uniform system of weights and measures based upon scientific and immutable principles. Such a system is undoubtedly to be found in the French metrology; and we find that it is gradually extending itself on the continent of Europe, as we have seen in noticing the recent coinage of Austria and Prussia. The adoption of a similar system by us, to supplant the innumerable arbitrary measurements which now prevail, is an object greatly to be desired, and is well worthy the attention of the government and of Congress.

The tabular statements attached to this report are as follows: *A.* The deposits and coinage at the mint and its branches, and the assay office during the year ending June 30, 1859. *B.* Statement of the amount of gold and silver of domestic production deposited at the institutions abovenamed during the same period. *C.* The coinage operations of all the minting establishments of the United States from their respective organizations to the 30th June, 1859, numbered from 1 to 7, inclusive. *D.* The entire deposits of domestic gold at these institutions for the same period, numbered from 1 to 7, inclusive. *E.* A statement of the production of domestic silver from the 1st of January, 1841, to the close of the last fiscal year. *F.* The amount of silver of less denomination than one dollar coined since the passage of

the act of February 21, 1853, reducing the weight of such coins. *G.* The amount and denomination of fractions of the Spanish and Mexican dollar, and the cents of former issues, deposited at the mint at Philadelphia for the new cent. *H.* A statement of the amount of fractions of the Spanish and Mexican dollar purchased for silver coinage since the passage of the act of February 1, 1857, entitled "An act relating to foreign coins and to the coinage of cents at the mint of the United States." *I.* A statement of the weight, fineness, and value of foreign gold coins. *J.* A similar statement of the weight, fineness, and value of foreign silver coins.

I have the honor to be, with great respect, your faithful servant.

JAMES ROSS SNOWDEN,

*Director of the Mint.*

Hon. HOWELL COBB,

*Secretary of the Treasury, Washington City.*

## No. 13.

## REPORT OF THE ENGINEER IN CHARGE OF THE OFFICE OF CONSTRUCTION UNDER THE TREASURY DEPARTMENT.

TREASURY DEPARTMENT, *September 30, 1859.*

SIR: I have the honor to submit the following report of the progress of the various public buildings under my charge during the year ending September 30, 1859.

On the 30th September, 1858, the amount in the treasury and in the hands of disbursing agents, appropriated for the erection of public buildings authorized to be constructed under this department, was \$4,215,329 41.

Under the policy of the last Congress, suspending appropriations for the continuance of the larger works under this office, and declining to appropriate for new ones, there was appropriated only \$160,000 for preserving the large works and completing those at Detroit, and Indianapolis, together with the usual amount for the annual repairs of custom-houses and marine hospitals, making a total of \$4,375,329 41; to which has been added the sum of \$3,925, (being the gross amount of sale of the old custom-house at Bath, Maine,) giving an available aggregate for the year of \$4,380,254 41.

Of this amount \$1,051,458 25 was for works not commenced at the date of my last report, and which, under your instructions, have not since been commenced. These works were: CUSTOM-HOUSES at *Ogdensburg*, New York, *Perth Amboy*, New Jersey, *Knoxville*, Tennessee, *Nashville*, Tennessee, and *Cairo*, Illinois, with the one previously authorized at *Astoria*, Oregon; and court-houses and post offices at *Boston*, Massachusetts, *Baltimore*, Maryland, *Columbia*, South Carolina, *Raleigh*, North Carolina, *Key West*, Florida, *Tallahassee*, Florida, *Memphis*, Tennessee, *Springfield*, Illinois, and *Madison*, Wisconsin, and the post office at Philadelphia.

For many of these works the appropriation is insufficient; others are without appropriations for sites; and all were without the customary ten per centum for contingent expenses, as detailed in my last annual report. Before these works can be properly commenced appropriations for furnishing sites and contingent expenses will be required, as well as additional appropriations where the amounts are insufficient to complete suitable buildings.

Under your specific instructions, made at the close of the last session of Congress, (in accordance with what seemed to be the policy indicated by Congress in its appropriations,) directing the operations on all the buildings to "be kept strictly within the available means at the department's disposal, and when those means were exhausted to stop the work," I have carefully avoided incurring any expense, present or prospective, which was not fully warranted by the available means, and neither of the appropriations for the three large works now in hand are yet exhausted, though they doubtless will be before the close of the present fiscal year.

In pursuance of the policy then inaugurated, the total amount drawn from the treasury for disbursements upon public buildings under this office for the year ending September 30, 1859, has been \$1,871,316 37,

being \$1,039,698 38 less than was expended for a like purpose during the previous year. During this period the following buildings have been completed, and most of them inclosed and occupied, viz :

CUSTOM-HOUSES at *Newark*, New Jersey, *Norfolk*, Virginia, *Wheeling*, Virginia, *Petersburg*, Virginia, *Mobile*, Alabama, *Cleveland*, Ohio, *Galena*, Illinois, and *Milwaukee*, Wisconsin ; and MARINE HOSPITALS at *Cincinnati*, Ohio, *Evansville*, Indiana, and *Galena*, Illinois ; and COURT-HOUSES and POST OFFICES at *Rutland*, Vermont, *Windsor*, Vermont, and POST OFFICE at *Baltimore*, Maryland ; making, in all, fourteen buildings made ready for occupancy the past year. The previous year there were twenty-one completed.

A little outdoor work yet remains to be done for some of these buildings, but it is comparatively of small importance, and does not interfere with their occupancy.

The only new contract made during the past year has been for the UNITED STATES WAREHOUSES at the *quarantine station*, below *New Orleans*, for which \$50,000 are appropriated. A contract has been concluded with an experienced builder for the sum of \$31,954, being the lowest bid offered for the work.

The total number of buildings, and the uses for which they were designed, or for which unexpended balances remain of former appropriations, is as follows :

Custom-houses, court-houses, and post offices .....	80
Marine hospitals.....	24
Mints and branch mints and assay offices.....	6
Territorial public buildings.....	5
Extension of Treasury .....	1
Ventilation of old Treasury building.....	1
Warehouses .....	4
Fire-proof vaults.....	67

Total.....	188
------------	-----

Total amount available for the prosecution of these works on September 30, 1858.....	\$4,215,329 41
Amount appropriated last session.....	160,000 00
Proceeds of sale of old custom-house at Bath, Maine.....	3,925 00

Amount available for the year 1858-'59.....	4,379,254 41
Amount expended from September 30, 1858, to September 30, 1859.....	1,870,316 37

	2,508,938 04
Amount repaid into treasury by disbursing agents.....	2,876 14

Unexpended amount now in the treasury appropriated to these works on September 30, 1859.....	2,511,814 18
Amount in the hands of disbursing agents on September 30, 1859.....	93,467 98

Total amount available September 30, 1859.....	2,605,282 16
--	--------------

All the buildings now in course of construction under this department are being executed by contract, except the *extension of the Treasury*, the CUSTOM-HOUSES at *New Orleans, Charleston, New Haven, Detroit, Michigan, and Portsmouth, New Hampshire.*

The works at *New Haven, Detroit, Portsmouth, and Indianapolis* were given out by contract. On the contractors failing to fulfil their conditions, they were taken from them, under a clause providing for such an emergency, and are now being prosecuted to completion, under the government, by day's work, and by partial contracts for the several parts of the work.

I beg leave respectfully to refer you to my former reports for general suggestions upon the present method of appropriating the revenues of government for its public buildings. Further experience only strengthens and confirms the opinions heretofore expressed, and it is to be hoped that Congress may hereafter adopt a different method of inaugurating expenditures for similar works.

I have the honor again to call your attention to the growing variety of uses for which iron is most desirable in public buildings. Every new trial suggests new uses, and the opportunity thus given to stimulate the production of this national staple, with both present and ultimate economy to the government, will not be neglected when the finances of the country shall again permit me to call your attention to the new works already authorized. The instructions of Congress in regard to the analysis of the various ores and their products, from all sections of the country, have been complied with so far as time has permitted. The careful examination of such a large variety of specimens as have been exhibited is necessarily a tedious matter, many of the processes requiring a period of *time* which no scientific or chemical experience can shorten; but the results will be laid before you at the earliest practicable date.

#### BATH, MAINE.

The fencing and grading about the custom-house building at Bath, Maine, has been completed during the past year. The old building has been sold, under the act of Congress approved May 11, 1858, realizing the sum of thirty-nine hundred and twenty-five dollars, which has been paid into the treasury of the United States, and a portion thereof, in accordance with the requirements of the act, expended in furnishing the new building.

Total amount of appropriation.....	\$105,391 25
Amount withdrawn to September 30, 1859.....	99,686 56

Balance available.....	<u>5,704 69</u>
------------------------	-----------------

#### BELFAST, MAINE.

The fencing and grading of the grounds of the Belfast custom-house have been completed, and the building surrendered to the collector.

Total amount of appropriation.....	\$34,650 00
Amount withdrawn to September 30, 1859.....	30,500 38

Balance available.....	<u>4,149 62</u>
------------------------	-----------------

## BATH, MAINE.

The fencing and grading about the custom-house building at Bath, Maine, has been completed during the past year. The old building has been sold, under the act of Congress approved May 11, 1858, realizing the sum of thirty-nine hundred and twenty-five dollars, which has been paid into the treasury of the United States, and a portion thereof, in accordance with the requirements of the act, expended in furnishing the new building.

Total amount of appropriation.....	\$105,391 25
Amount withdrawn to September 30, 1859.....	99,686 56

Balance available.....	5,704 69
------------------------	----------

## BELFAST, MAINE.

The fencing and grading of the grounds of the Belfast custom-house have been completed, and the building surrendered to the collector.

Total amount of appropriation.....	\$34,650 00
Amount withdrawn to September 30, 1859.....	30,500 38

Balance available.....	4,149 62
------------------------	----------

## ELLSWORTH, MAINE.

The grounds about the new custom-house building at Ellsworth, Maine, have been graded and prepared for the fence. The iron fence is nearly ready to be set up, and will be in place this season. The custom-house and post office have been finished, and are now occupied by the various federal officers.

Total amount of appropriation.....	\$23,500 00
Amount withdrawn to September 30, 1859.....	21,456 97
Balance available.....	<u>2,043 03</u>

## BANGOR, MAINE.

Nothing has been done the past year in reference to bridging the Kenduskeag river, at Bangor, Maine, that city still omitting to furnish its agreed-upon moiety. Some small expenses for repairs have accrued, slightly reducing the existing balance to the credit of the work, and the amount remaining is now the exact sum appropriated by Congress for bridging the river.

Total amount of appropriation.....	\$106,800 00
Amount withdrawn to September 30, 1859.....	101,500 00
Balance available.....	<u>5,300 00</u>

## PORTSMOUTH, NEW HAMPSHIRE.

The difficulties alluded to in my last annual report in obtaining granite for the new custom-house and post office constructing at Portsmouth, New Hampshire, continued to retard the progress of the work last season. The necessary suspension of out-door work during the winter months, however, enabled the contractor to accumulate material, so that, since resuming operations in the spring, the work has progressed vigorously and rapidly, and is now near completion. The masonry is completed, with small exceptions, and but little of the iron work remains unfinished. The plastering and stucco-work are entirely complete. The carpentry and painting of the interior are the principal remaining work. Both are actively going on, and the whole work will probably be completed by the first of December next.

Total amount of appropriation.....	\$166,300 00
Amount withdrawn to September 30, 1859.....	151,897 94
Balance available.....	<u>14,402 06</u>

## BURLINGTON, VERMONT.

The fencing and grading of the custom-house at Burlington, Vermont, authorized by the last Congress has been completed, and the building is in the custody of the collector.

Total amount of appropriation.....	\$56,350 00
Amount withdrawn to September 30, 1859.....	53,538 14
	<hr/>
Balance available.....	2,811 86
	<hr/>

## BARNSTABLE, MASSACHUSETTS.

The custom-house and post office at Barnstable has been newly roofed during the past season, and is now deemed to be amply secured against the severe storms of that locality. The entire appropriation for the work, \$33,370 80, has been expended.

## BRISTOL, RHODE ISLAND.

The grading, paving, and fencing of the grounds about the new custom-house at Bristol, Rhode Island, have not yet been commenced. Offers for the work are now under consideration.

Total amount of appropriation.....	\$31,400 00
Amount withdrawn to September 30, 1859.....	26,495 75
	<hr/>
Balance available.....	4,904 25
	<hr/>

## NEW HAVEN, CONNECTICUT.

The work upon the new custom-house and post office at New Haven, Connecticut, has progressed with less rapidity than was either economical or desirable in consequence of local difficulties, which for a time seemed beyond the department's control. These have, however, been adjusted, and the work is now near completion. Unless something should occur at New Haven to prevent it, there is no good reason why the building should not be completed and occupied before the weather is cold enough to suspend work.

Total amount of appropriation.....	\$190,800 00
Amount withdrawn to September 30, 1859.....	168,861 20
	<hr/>
Balance available.....	21,938 80
	<hr/>

## BUFFALO, NEW YORK.

The enlargement of the custom-house building at Buffalo, New York, has been delayed, pending the action of Congress upon a peti-

tion for authority to have the remaining balance expended upon a new building instead of an enlargement of the old one.

The past year's experience confirms the opinion I have heretofore expressed to you, that the present building is amply large enough for all the uses of the custom-house, post office, and court-rooms, for which it was originally designed, and is likely to continue to be for a very long period to come, the growth of the city being in an inverse ratio to the appropriations; and I can but repeat my firm conviction that the proposed expenditure is uncalled for by actual want, and unnecessary for any probable future contingency. If, however, it is the will of Congress that the money should be there expended, I have no hesitation in recommending its use for another building instead of an enlargement of the old one. The land adjoining the present building is held at an exorbitant price, while a more desirable and convenient location can be elsewhere obtained for a much less sum than is asked for the addition to the present site. I respectfully suggest, however, that the interests of the service would be better promoted by transferring the remainder of this appropriation to finish buildings in localities where it is absolutely needed, than by its use at Buffalo, and have the honor to recommend that Congress be asked to authorize its transfer, under your direction, from time to time, when the interests of the service most require it for similar uses.

Total amount of appropriation.....	\$290,800 00
Amount withdrawn to September 30, 1859 .....	194,696 39
Balance available .....	<u>96,103 61</u>

#### OGDENSBURG, NEW YORK.

Nothing has been done the past year in reference to the construction of a building authorized at Ogdensburg, New York, for the accommodation of a custom-house, post office, and court-room.

Total amount of appropriation.....	\$118,000 00
Amount withdrawn to September 30, 1859.....	9,123 75
Balance available .....	<u>108,876 25</u>

#### PLATTSBURG, NEW YORK.

The grading of the grounds about the new custom-house at Plattsburg, as well as the surrounding work and fence, was, after being duly advertised, contracted for with different parties, and is now nearly finished. The foundation wall and the brick fence are completed, and the iron fence is nearly ready for placement. The grading is three-fourths finished, and it is expected the whole work will be completed this season. The different portions of the building are already occupied by their respective officers.

Total amount of appropriation.....	\$79,900 00
Amount withdrawn to September 30, 1859.....	65,678 82
Balance available.....	<u>14,221 18</u>

## NEWARK, NEW JERSEY.

The custom-house, court-house, and post office at Newark, New Jersey, is completed and occupied, and the grounds graded and enclosed.

Total amount of appropriation .....	\$162,000 00
Amount withdrawn to September 30, 1859.....	158,519 50
	<hr/>
Balance available .....	3,480 50
	<hr/>

## PERTH AMBOY, NEW JERSEY.

The proposals for the construction of the custom-house and post office at Perth Amboy, New Jersey, which were duly invited by advertisement, have been for some time before the department, but no action has yet been had upon them.

In view of the many changes which have occurred in the value of materials and labor since these proposals were made, it may become necessary to readvertise the work before awarding the contract, whenever it shall be decided to commence it.

In this connection, I respectfully refer you to the suggestions in reference to this work in my annual report of last year, upon the subject of awarding contracts to the lowest bidder, irrespective of the fairness and equity of the proposed terms. Additional experience confirms me in the soundness of the views then expressed, and I again respectfully invite your attention to them.

Total amount of appropriation .....	\$24,000 00
Amount withdrawn to September 30, 1859.....	3,087 16
	<hr/>
Balance available .....	20,912 84
	<hr/>

## ALEXANDRIA, VIRGINIA.

The additional land required for the site of the new custom-house and post office at Alexandria, Virginia, which had been purchased at the date of my last annual report, conditioned that its title papers met the requirements of the joint resolution of Congress, approved September 11, 1841, has passed into possession of the government, the title being found satisfactory, and the grounds have been graded and inclosed.

Everything is now completed, and the building surrendered to the collector. It is a beautiful and sightly edifice, highly ornamental to the city, and creditable to those engaged in the construction of it.

Total amount of appropriation .....	\$75,217 50
Amount withdrawn to September 30, 1859.....	73,193 64
	<hr/>
	2,023 86
	<hr/>

## NORFOLK, VIRGINIA.

The grounds about the new custom-house and post office at Norfolk, Virginia, have been finally completed, and enclosed with a handsome iron fence. The collector has moved in during the past year, and the business of both custom-house and post office is now conducted in the building.

Total amount of appropriation .....	230,652 53
Amount withdrawn to September 30, 1859. ....	218,354 75
Balance available.....	<u>12,297 78</u>

## PETERSBURG, VIRGINIA.

The new custom-house and post office at Petersburg, Virginia, which is built of granite, is now entirely completed, and its grounds graded and inclosed. The officers of the postal and customs department have for some time occupied their respective portions, and found them admirably adapted for their uses. The building is massive and imposing, and has an exceedingly favorable location.

Total amount of appropriation.....	\$103,200 00
Amount withdrawn to September 30, 1859.....	99,754 89
Balance available.....	<u>3,445 11</u>

## WHEELING, VIRGINIA.

The new custom-house at Wheeling, Virginia, was completed in April last, and is now occupied by the proper federal officers.

Total amount of appropriation.....	\$117,300 00
Amount withdrawn to September 30, 1859.....	117,148 64
Balance available.....	<u>151 36</u>

## CHARLESTON, SOUTH CAROLINA.

As no additional appropriation was made by the last Congress to continue the work upon the new custom-house at Charleston, South Carolina, and as it directed in the act making appropriation for sundry civil expenses, approved March 3, 1859, that the unexpended balance of former appropriations should be used in finishing the building, a reduction of the force upon the work became necessary.

It was manifestly a physical impossibility to comply literally with the directions of Congress to *finish* the building with the unexpended balances, as these balances, at the date of this direction, amounted only to \$251,963 97, while the then estimated cost of completion, including the massive dome, was nearly *two millions of dollars*.

Under these circumstances, the best course that could be pursued was adopted. The contractors for marble were ordered to deliver only such pieces as were necessary to enable those then on hand to be placed. The working force on the building was largely reduced, and the pay of the remainder, as well as that of the officers of the work, was correspondingly diminished. In this way the work has progressed but slowly, and under great disadvantages, as well as with bad economy; but the expenditure has been distributed through the year, keeping the organization intact, and protecting the property, as far as practicable, from undue exposure during this period of partial suspension.

The work done during the year is as follows: the first and second courses of architrave have been set on all sides of the building excepting the north and east fronts; the frieze dentil and modillion courses of cornice set in northwest and southwest angles of building; six attached columns have been finished, and five sections of other columns set; the third flight of steps and platforms of western front, and the steps of small doors of basement finished; the ornamental iron work of third story put up; the girders for the floor of attic in east wing and the same in south wing have been set; the brick masonry of walls has been carried up to the level of the marble work; the interior walls and towers have been built up as high as they can at present be carried; the flues and drains of basement built; the pits and pipes for water-closets in basement laid; the lower arch of rotunda in basement built, and the center of the arch of rotunda, for floor of principal story, now in course of construction.

During the year 66,093 feet of lumber have been used, and 236,615 bricks; 291,473 lbs. of iron, and two cargoes of marble for the exterior—in all 147 pieces. Of these only fifty-six have yet been used, the remainder having been quarried and cut prior to the department's instructions to suspend quarrying all but those of immediate necessity. The total number set during the year has been 141. Fourteen pieces of Tennessee marble have also been delivered, designed to be used for mantels, washstands, &c.

The force upon the work has been reduced from 119 men to 42—the latter number being now employed upon the building, but the small remainder of the unexpended balance will be likely to be exhausted before any new appropriation will be made available, (unless the ordinary available time of the general appropriation bill is anticipated by congressional action,) and this small force entirely disbanded, which would cause much ultimate inconvenience to the department and loss to the government.

If the policy of the last Congress is to be continued, an appropriation of \$5,000 will only be required to protect the work; but if the work is to be continued in a manner which true economy would make necessary, an appropriation of \$500,000 would be necessary during the coming fiscal year, to be made available as early as the necessities of the work require.

For my views as to the proper method to be pursued under existing circumstances for this and the other large works now constructing under my charge, I have the honor to refer you to my report herewith

upon the treasury extension, to which I respectfully invite your attention, with a view to early congressional action :

Total amount of appropriation.....	\$2,053,000 00
Amount withdrawn to September 30, 1859.....	1,956,185 58
Balance available.....	<u>96,814 42</u>

## MOBILE, ALABAMA.

The building designed for a custom-house, court-house, and post office at Mobile, Alabama, has been completed during the past year, and furnished. It is now occupied by the officers of the customs and of the post office. The damage which was occasioned to the exterior of the building by the large fire adjoining, of which a detailed account was given in my last report, has not yet been repaired. The appropriation for this purpose by the last Congress is believed to be sufficient, and the work will be commenced after the necessary preliminary action has been had.

Total amount of appropriation.....	\$402,600 00
Amount withdrawn to September 30, 1859.....	389,819 73

## PENSACOLA, FLORIDA.

The grounds about the new custom-house, court-house, and post office at Pensacola, Florida, have been inclosed during the past season, and the building surrendered to the collector. Nothing more remains to be done on this work.

Total amount of appropriation.....	\$51,000 00
Amount withdrawn to September 30, 1859.....	48,504 27
Balance available.....	<u>2,495 73</u>

## NEW ORLEANS, LOUISIANA.

Congress having made no appropriation at its last session for the continuation of the work upon the new custom-house at New Orleans, Louisiana, the unexpended balance of former appropriations has been applied, pursuant to the direction of Congress, in the most judicious manner I could devise, to finishing up work now in progress, and protecting the work, as far as possible, from injury, during the necessary suspension of such work as required additional appropriation. Its entire completion with this balance, which the phraseology of the act would seem to imply was the intention of Congress, is of course impracticable.

At the end of the first quarter of the present fiscal year the marble walls of collector's room were finished, with their brick backing, to

the lower line of antae cap necking, and there remained but nine pieces to complete setting of column shafts. Brick cornices of Canal street vestibule had been completed. Staircases No. 3 and 4 finished to fourth floor. The iron floors of fourth story were in good progress, and intersecting walls fourth story had been commenced; the whole work going on actively with an average force of one hundred and thirty hands. The operations were continued in a corresponding ratio up to the month of April, of the present year, when the omission of Congress to appropriate for the continuance of the work called for a reduction of force from one hundred and thirteen in March to eighty-nine in April; which has been further reduced to seventy-two in June, together with the discharge of certain assistant officers. This necessary reduction is greatly to be regretted, as the organization of every department had been raised to the highest point of efficiency, and had no interruption occurred would have resulted in the speedy completion of accommodations, destined for important branches of the public service, namely, the post offices, United States courts, &c., which will now be greatly retarded. Still the progress since the reduction has been uniform and satisfactory as far as the limits of the force employed would allow, and the work has reached a point at which it becomes imperatively necessary to make arrangements for a permanent roof cover, and the completion of the external granite work, so soon as Congress shall supply the necessary means for those objects.

The four granite stairways have been finished up to the level of fourth floor with their iron railing complete.

On the fourth floor the beams and most of the arches have been set complete, except that part over the United States court-room; all the beams for which have been shipped by the contractors per ship "Clifton," and are daily expected at the levee.

In the central marble room the column shafts, with their Corinthian capitals, and their enriched antae caps around the walls, have all been set complete; and also all the heavy architrave pieces, less nine, are in place; nearly all the wall architrave is set complete, and the work on the upper architrave course is in active progress; most of it being already in place. The brick backing of all this work around the central room, and the brick work of several cross-walks on fourth story, are finished up square, ready to receive the gutters, which form a part of the roof system. The line of work throughout will compare favorably with the very best ever executed in the United States. The marble work has been set with the utmost care; the brick work is of the best material, with close and well-fitted joints, and the iron work well secured, set perfectly true, and the connecting segmental arches turned with accuracy, and well backed up with tested cement concrete, all smooth and even, ready for the flooring of marble, or otherwise, as shall be determined.

During the year the force of mechanics and laborers has varied from the cause stated above; the general average, exclusive of officers, has been one hundred and twelve hands per day, (a decrease of eleven over the preceding fiscal year;) that is, fourteen brick-masons, eight stonemasons, thirteen carpenters, eleven blacksmiths, and sixty-six laborers. The highest number employed at any one time during the year being

one hundred and thirty-eight, and the lowest seventy-two. This latter figure must continue to represent the force employed until a further appropriation by Congress shall warrant the prosecution of the work with greater vigor.

There has been used during the year 397,388 pounds of iron, 953,347 bricks, 48 tons of granite, nearly 600 tons of marble, with other materials in proportion. The iron on hand and shipped will complete the fourth floor; and the marble on hand, with the architrave moldings ordered, and say from \$30,000 to \$40,000 worth not yet ordered, will complete the entablature of collector's room to the ceiling. This latter order, however, cannot be made until a further appropriation is passed by Congress.

The balance of appropriation available for the present prosecution of the work will, with the strictest economy, be insufficient to set all the materials now on hand, and will doubtless, even with the present reduced force, be wholly consumed during the fiscal year ending June 30, 1860. It is therefore of the utmost consequence to the early completion of the whole, and the protection of the work that will then be finished, that a full appropriation should be obtained from Congress for the continuance of the work during the fiscal year ending June 30, 1861, say to the amount of \$500,000, (five hundred thousand dollars,) without which the roofing of this edifice will be found impracticable. The safety of the vast and valuable works completed will be greatly endangered, and the government unnecessarily deprived, for a long period, of the use of accommodations for the public service, which are perhaps more perfect in design, and will, when finished, more thoroughly meet all the objects contemplated than any other public constructions in the United States.

For my views upon the most judicious and economical course to be pursued with these and other large works, I respectfully refer you to my remarks upon the treasury extension, made herewith, which apply with equal force to this work and the similar large work at Charleston.

The subsidence of this building has been less during the past year than during the previous year, being little more than one-half the settlement of 1857 and 1858, and a mean of only 1.52 inch against 2.08 of the precedent year. This may be indicative that this immense structure has nearly reached a permanent bearing, as the entire settlement for the year is reported to be much less in proportion than is usual in large buildings on the peculiar soil of the city of New Orleans, but it may be only owing to the less weight of superstructure added during the past season, in the absence of the usual appropriation.

The ratio of settlement of the foundation walls, as compared with last year, will be found in the following table:

	Inches.
Maximum settlement since December, 1857.....	22.57
Minimum settlement since December, 1857.....	15.63
Mean settlement since December, 1857.....	18.90
Maximum settlement in 1857-'58.....	3.50
Minimum settlement in 1857-'58.....	.66
Mean settlement in 1857-'58.....	2.05

	Inches.
Maximum settlement during the past year.....	2.63
Minimum settlement during the past year.....	Nil.
Mean settlement during the past year.....	1.52

Total amount of appropriation.....	\$2,925,258 00

## QUARANTINE WAREHOUSES BELOW NEW ORLEANS.

A contract has been made for the construction of the new warehouses authorized to be constructed at the quarantine station, about 60 miles below New Orleans, with the lowest bidder upon the advertised proposals, and the preliminary steps taken for the construction of the work. The situation of the site, which was donated by the board of health to the government, is such that a levee will have to be built upon its front and rear to protect it from inundation, but it is believed the appropriation already made will be sufficient for this, as well as for the construction of the building.

Total amount of appropriation.....	\$50,000 00
Amount withdrawn to September 30, 1859.....	543 00
Balance available.....	49,456 50

## GALVESTON, TEXAS.

The lingering nature of the work upon the new custom-house, court-house, and post office authorized to be constructed at Galveston, Texas, to which I had the honor to call your attention in my last annual report, has continued through the year, and I have now to report that no progress has been made with its construction. The building remains in precisely the same condition as at this date last year, except what injury may have arisen from its exposure during the period when the contractors have suspended work. This injury has been guarded against as far as the nature of the case would admit.

The contractors, who undertook the work at a less price than I think it would have cost to construct it properly according to the original plans and specifications, petitioned Congress for a change of plan, which has been authorized. The details of the new plan, under the direction of Congress, have been prepared, and a new contract will now be made with the contractors. It is hoped when this is completed that they will again enter upon the work, and pursue it vigorously to completion.

Total amount of appropriation.....	\$116,000. 00
Amount withdrawn to September 30, 1859.....	34,803 62

## ST. LOUIS, MISSOURI.

The authorized changes in the construction of the new custom-house, court-house, and post office at St. Louis, Missouri, alluded to in my last report, have all been completed, and the building is now occupied. It can scarcely be considered as completed, for still other changes are asked for, which are now under consideration by the department. The building has a very imposing exterior, and is highly ornamental to the city; but so many changes have been made in its interior design, at the instance and urgent request of citizens of St. Louis, that I do not think it as convenient or useful as it would have been if the original design had been followed out to completion.

Architectural changes, after a design has been maturely considered and wrought out, are always of questionable utility, and, in my opinion, should not be allowed, except for the gravest reasons. In the present case, the changes involved inconveniences which I foresaw and protested against; but the persistent urgency of those desiring the change overruled my protest, and the occupants are now seeking relief from the very inconvenience which I predicted would occur. A plan should be *very* maturely considered and all its details carefully studied, and when completed, and made to unite in one harmonious whole, changes, except of the most necessary character, should be avoided, or not only the architectural beauty may be lost, but the convenience of more or less of the number occupying the building will be hindered. Especially is this the case in buildings designed for such various uses as a custom-house, court-house, and post office under one roof, whose various requirements demand careful study to be properly combined without unduly interfering with the comfort or convenience of any of the occupants.

The unexpended balance of the appropriation for this work is insufficient to complete the building, with the changes proposed and in progress.

The department has been misled by the local superintendent as to the aggregate cost of the completion under the many changes authorized. At the time when the department had \$79,085 35 remaining available from the appropriation for the work, this superintendent reported that the total cost of all the changes in the court room and sub-treasurer's office, and the total cost of all the furniture and fitting up of the buildings complete, added to the amount which would be due the various contractors on the entire completion of the building, would only amount in the aggregate to \$68,748 22; thus leaving the sum of \$10,337 13 to the credit of the work after it was fully completed and furnished.

The work has progressed since that date, under his care and direction, and he has now not only absorbed all the available means for the work, including the expected surplus of \$10,337 13, but incurred liabilities to an amount of over fifteen thousand dollars (\$15,000) more than the appropriation would warrant. Claims for this amount are now outstanding against the government, which have been certified to by the superintendent, but remain unpaid.

Total amount of appropriation.....	\$387,900 00
Amount withdrawn to September 30, 1859.....	385,649 73
Balance available .....	<u>2,250 27</u>

## LOUISVILLE, KENTUCKY.

The small remainder of the work upon the custom-house, court-house and post office at Louisville, Kentucky, noted in my last annual report, has been completed, the building fully occupied, and turned over to the surveyor.

The rooms designed for the use of the United States court are ready for occupancy, but the necessary legislation has not yet been had to remove the place of holding the court from Frankfort, as now authorized, to Louisville.

The appropriations for this work have been entirely expended upon it. They amount in all to \$387,900.

## KNOXVILLE AND NASHVILLE, TENNESSEE.

Nothing has been done towards commencing the works authorized at Knoxville and Nashville since my last annual report. Offers of sites have been made at Knoxville, but no action has been had upon them. The site at Nashville was purchased two years since, and is now rented and occupied as a wood and coal yard.

*Nashville.*

## CLEVELAND, OHIO.

The new custom-house, court-house, and post office at Cleveland, Ohio, has been entirely completed, and its grounds graded and inclosed. It is a beautiful building, and most admirably located, not only for architectural effect, but for the convenience of the citizens. It has been some time occupied, and has given general satisfaction, not only to the occupants, but to all who transact business with the federal officers, and to the still larger number who daily throng the vestibule of the post office. The work is creditable to the contractor, who pursued it with commendable zeal and vigor from its commencement to its conclusion.

Total amount of appropriation.....	\$166,900 00
Amount withdrawn to September 30, 1859.....	160,568 54
Balance available.....	<u>6,331 46</u>

## SANDUSKY, OHIO.

Arrangements have been completed to inclose the custom-house and post office at Sandusky, Ohio, and the iron fence is delivered on the ground, and will be set up this fall. The building was reported completed in my last report.

Total amount of appropriation.....	\$76,450 00
Amount withdrawn to September 30, 1859.....	74,259 16
Balance available.....	<u>2,190 84</u>

## TOLEDO, OHIO.

No additional appropriation having been made for the work upon the new custom-house and post office at Toledo, Ohio, the grounds still remain uninclosed, as at the date of my last annual report. A small appropriation is necessary to protect the grounds from trespass and finish some interior work. Two thousand dollars, with what remains unexpended, I think sufficient for the purpose, and it is highly necessary the work should be done as early in the spring as practicable.

Total amount of appropriation.....	\$77,450 00
Amount expended to September 30, 1859.....	76,395 60
Balance available.....	<u>1,054 40</u>

## DETROIT, MICHIGAN.

The work upon the new custom-house, court-house, and post office, at Detroit, Michigan, has progressed very satisfactorily during the past year. The exterior walls are nearly completed, and for excellence of workmanship and beautiful effect will compare favorably with any public building in the country. The building has been covered in, its iron roof put in place and finished, with the blocking course and leaders. The work upon the interior is well advanced, and, so far, executed to my satisfaction. All the interior brick walls have been built, the arches of all the floor and roof are turned, the joists laid upon them, the concrete finished, and asphalt coating under roof put on. All the staircases are set, except that from post office floor down to basement. The ceilings are all furred ready for lathing, and the lathing and plastering are in progress in the post office floor. The post office framing is all put up, part of the main entrance doors are hung and the balance in hand. The whole of the iron work of the basement is complete, and the floor concreted ready for paving. The sash-frames are all in, the

sashes fitted and primed all over the building, and the glazing is now being done. All the doors and frames for inside of building are ready done, and the joiner's work ready for fitting up so soon as the plastering is finished, except the post office boxes, paneling, &c., which are now in hand.

The lease of the building now occupied as a post office will determine by its own terms on the 1st of January next, and cannot be renewed. It became necessary, therefore, to push the post office portion of the work to completion in advance of the remainder, and orders to that effect have been issued. It is confidently expected by the local superintendent that he will have the post office part ready for the postmaster by or before the period when that officer will be compelled to occupy new quarters. The balance of the work will be completed during the coming season.

## CHICAGO, ILLINOIS.

The work upon the large building at Chicago, designed for a custom-house, court-house, and post office, has proceeded vigorously and without interruption during the past year. The entire exterior walls of the edifice are completed, and, being built of an excellent magnesian limestone, (quarried in Athens, about 25 miles south of Chicago,) of a delicate but uniform straw color, presents a beautiful façade, not exceeded by any similar structure within my knowledge. The workmanship upon the stone corresponds well with the quality of the stone itself, and is highly satisfactory, and creditable to those engaged upon the work. The chimneys and gutters are complete, and the iron frame of the roof in place, ready to receive its covering. The cap-stones of the chimneys have been cut—the smaller from one stone, and the larger from two—the flue-holes being cut out of the solid stone, not only increasing their strength and durability, but giving them a handsome and substantial frame, and protecting them from storms and other weather action. The exterior work upon the post office portion is in an advanced stage, and very thoroughly done, so far as finished. The doors, sashes, &c., are all finished, and ready to be put in place, and made in a highly creditable manner, the iron doors, in particular, being massive and of most excellent workmanship.

Upon a recent inspection of the work, the materials generally, as well as the workmanship, were found of excellent character, and evincing great care and pains on the part of those intrusted with the work. The contractor's agent is in every way competent to fulfil the engagements of the deceased contractor, and he has, together with his experienced foreman, used every exertion to discharge creditably his duties, and has shown much laudable pride in making the structure, in all its parts, an unexceptionable work—worthily carrying out all the designs of this office for its perfection.

It will be remembered that doubts existed if the original cession of jurisdiction covered the area bought subsequent to the first purchase for increasing the site of the building. This defect is now cured; the legislature of Illinois having, at its last session, passed a new act ceding jurisdiction to the whole, which has been approved by the Attorney General, as directed in the joint resolution of Congress, approved September 11, 1841. The entire site has therefore been paid for.

Total amount of appropriation .....	\$447,733 88
Amount withdrawn to September 30, 1859.....	321,062 26
Balance available .....	<u>126,671 62</u>

## CAIRO, ILLINOIS.

No action has been taken by the department in reference to the construction of the building authorized to be erected at Cairo, Illinois. The Illinois Central Railroad Company have gratuitously offered a site for the purpose, but it has not yet been examined. The time I visited Cairo the whole place was covered with water, and no satisfactory information could be obtained as to the best location of the custom-house site.

Total amount of appropriation.....	\$50,000 00
Amount withdrawn to September 30, 1859.....	.....
Balance available.....	<u>50,000 00</u>

## GALENA, ILLINOIS.

The building designed for a custom-house and post office at Galena, Illinois, has been completed the past year and furnished, its grounds graded and fenced, and is now occupied by the proper officers and in the custody of the surveyor of the port.

Owing to the inundation consequent upon the overflow of the Fever river some alteration has been required in the basement of this building, and some other trifling details are yet unsettled with the contractors, so that no formal acceptance of the work has been made by the department; but there is nothing to interfere with its permanent occupancy.

This work is constructed from the Nauvo stone, a fossiliferous limestone, of extreme hardness and durability, and, as it is surrounded by an open space on all sides, it presents a beautiful and effective appearance; but the manifest discordance between the size of the building and the purposes for which it is designed renders most apparent the fact that the appropriation was made without the full information which should precede legislative action for such purposes.

The exact size of the building, and the nature of the materials of which it was to be built, were distinctly prescribed by Congress, and \$55,000 appropriated for the purpose. It has been built in accordance with congressional direction, and has cost \$49,872 74, beside the site, for which \$16,500 was appropriated, making a total cost of \$66,372 74;

and this cost has produced a building far beyond the present or prospective wants of the port. No exports are made from Galena, and the gross revenue from imports of merchandise for the past fiscal year only amounts to \$96 30. The business of the office is confined to the enrolment and license of river craft and the collection of hospital money from those who navigate them, and is transacted by one man only, the surveyor of the port being the only person employed, and he has hitherto occupied but a single room of moderate dimensions. He has now one entire story of a building sixty feet long and forty-five feet wide. The postal service is performed by the postmaster and one clerk, who now also occupy one story of the large building.

Total amount of appropriation.....	\$85,200 00
Amount withdrawn to September 30, 1859.....	70,891 92
Balance available.....	<u>14,308 08</u>

## DUBUQUE, IOWA.

The delays attendant upon the construction of the new custom-house, court-house, and post office at Dubuque, Iowa, to which I had the honor to call your attention in my last annual report, have continued through the present year, and the building is not yet up one story, though it was contracted for two and one-half years since, and the contracted time for completion expired on the 1st December, 1858. These delays are mainly owing to the fact that the contract was awarded at a less price than the building could properly be constructed for, and in the contractors' struggles to avoid a loss, difficulties are engendered between them and the local superintendent, involving more or less of delay, to be adjusted at the department. I cannot see any reasonable prospect of a vigorous prosecution of the work, and greatly fear it may eventuate in its abandonment by the present contractors, and its consequent prosecution by the government at the ultimate cost of their securities.

It will be remembered that jurisdiction over this site has never been ceded to the government by the State of Iowa, but Congress, in the act making additional appropriation for the work, approved March 3, 1857, authorized the Secretary of the Treasury to take possession and pay for the land, conditioned upon the city of Dubuque entering into a bond, in its corporate capacity, with good and sufficient individual security for twice the amount of the appropriation, that the legislature, at its then next session, should pass a proper act ceding such jurisdiction. Such a bond was entered into, and by its terms became payable three months after the adjournment of the legislature of the State without having passed such an act. No act was passed by the legislature, and the bond became due three months after the adjournment of the session which commenced January 1, 1859. No steps have been taken by the department to collect the penalty of the bond.

Total amount of appropriation.....	\$138,000 00
Amount withdrawn to September 30, 1859.....	58,177 92
Balance available.....	<u>79,822 08</u>

## MILWAUKIE, WISCONSIN.

The new building designed for the purposes of a custom-house, court-house, and post office at Milwaukie has been entirely completed, furnished, and occupied during the past year. It is built of the same material as that constructed at Chicago, magnesian limestone, and is a beautiful and imposing edifice on a slightly location. One of its exterior walls has recently been injured by a serious fire, which destroyed the whole of an adjoining block five stories in height. The intense heat from the burning mass being driven by the wind directly upon and over the custom-house thoroughly tested its fire-proof capacity. Its interior was not injured, but the firemen having injudiciously played their engines upon the heated stones, the exterior, particularly the entablature, was badly cracked and spauled. The superintendent of the Chicago building was ordered to inspect the damage and report the probable cost of repairs. He reports that it will probably cost seven thousand dollars to replace the damaged and defaced stone in the injured front, and restore the iron fence, which was crushed by the falling walls of the burning building.

The entire appropriation for this work is expended, amounting to \$159,700.

## MARINE HOSPITALS.

I respectfully refer you to my last year's report upon the indiscriminate and often unjust appropriations for marine hospitals, and beg to call your special attention to the facts therein set forth. Another year's experience has but added force to the arguments then adduced against the method that has heretofore existed, but which, happily, was not followed by the last Congress.

## BURLINGTON, VERMONT.

A temporary fence has been erected, but the grading of the grounds of the Burlington, Vermont, marine hospital remain as at the date of my last annual report. The building being unfurnished and unoccupied, is being injured from dampness, but there seems no necessity for its use in this district.

Total amount of appropriation .....	\$43,600 00
Amount withdrawn to September 30, 1859.....	36,937 24
<b>Balance available .....</b>	<b>6,662 76</b>

## PORTLAND, MAINE.

The marine hospital at Portland, Maine, has been furnished during the past year, and is now occupied. It proves to be too large for the

number of patients at present, and it is proposed to close up the third story of the building, for economy in heating it.

Total amount of appropriation .....	\$115,000 00
Amount withdrawn to September 30, 1859.....	111,758 73
Balance available .....	<u>3,241 27</u>

## CHELSEA, MASSACHUSETTS.

The remaining outdoor work about the new marine hospital at Chelsea, Massachusetts, is very nearly finished, and it is anticipated that all the work necessary will be completed this season. The building has been, for some time, occupied, and is admirably designed for its uses.

Total amount of appropriation .....	\$234,700 00
Amount expended to September 30, 1859.....	230,482 31

Amount withdrawn to September 30, 1859.....	22,964 70
Balance available.....	<u>2,735 30</u>

## PENSACOLA AND KEY WEST, FLORIDA.

Nothing has been done in reference to the buildings authorized to be constructed at Pensacola and Key West, Florida, since my last annual report.

Amount of appropriation at Pensacola.....	\$22,000 00
Amount of appropriation at Key West, United States...	<u>27,100 00</u>

## NEW ORLEANS, LOUISIANA.

The work upon the large iron edifice authorized to be constructed at New Orleans for a marine hospital has progressed satisfactorily during the year, the only obstructions to uniform progress having been such as are inseparable from a work of this magnitude, whose peculiar construction requires almost the entire of its material to be transported from the north, involving more or less of delay from shipwreck and other uncontrollable causes. The contractors have steadily pushed the work, and exhibited commendable zeal and energy in its progress, meeting and overcoming its peculiar difficulties in a manner creditable to themselves and the government.

During the past year all the iron wall posts of second and third stories in the main building have been set in place, and those also of the second story of the wings; and the veneering of the external walls has been completed.

All columns, bases, and connecting shoes, girders, and covering for the same, are in place.

All beams of third and fourth floors, with their ties and connecting bolts, segmental arches of brick, and backing up of the same, have been set and finished throughout the building.

The first tier of veranda columns, with their shoes, bases, and connecting shoes at top, are placed, and the iron beams of first and second veranda floors set complete.

All party walls of first story of White street wing, and party walls of the entire second and third stories of main building, have been completed, except a few party walls, 4-inch and 9-inch, viz: privies and bath-rooms.

The chimneys and ventilating flues of both wings have been finished, and 7,000 cubic feet of concrete have been spread on first and second floors in wings; and the concreting of roof floors of both wings, say 4,000 cubic feet, has been executed.

One dome has been set complete on White street wing, except plastering, and also its adjacent passage. The passage from the main building to Broad street dome finished, and dome in progress.

The cornice and eave gutter of the main building are done, and the roofing of both wings set in place, ready for the corrugated galvanized roof cover.

The contract time for completion (July 1, 1859) has been necessarily extended, from losses of material at sea and other causes beyond the contractor's control; yet I have but little doubt but the building will be ready for occupancy during the coming season, unless now unforeseen causes delay it.

The work of filling up the site under the contract has been in active progress, and 15,457½ cubic yards have been laid on the ground, leaving but 2,977½ yards of filling yet to be done.

The great expense attending the piling for foundation has swelled the cost of this work beyond the original computation. The local superintendents estimate that there will be required an additional appropriation of \$100,000 to complete the edifice and grounds after the contractors have finished their work and been fully paid therefor according to the contract price. The cost of furnishing the building is not included in this estimate; it only includes work around the building not covered by the contract originally entered into for construction, such as outbuildings, fence, walls, flagging, roads, gas and water pipes, fixtures, &c.

Total amount of appropriation.....	\$521,459 20
Amount withdrawn to September 30, 1859.....	427,763 77

Balance available.....	<u>93,695 43</u>
------------------------	------------------

## ST. LOUIS, MISSOURI.

The work upon the sewer at the St. Louis marine hospital, which was under the charge of the resident physician, and performed by persons employed about the building, is nearly completed; but nothing has yet been done toward grading and inclosing the grounds, as the city has not yet established the adjoining streets.

Total amount of appropriation.....	\$118,574 00
Amount withdrawn to September 30, 1859 .....	93,589 00

Balance available.....	<u>24,985 00</u>
------------------------	------------------

## LOUISVILLE, KENTUCKY.

Some necessary repairs and improvements have been made in and about the marine hospital at Louisville, Kentucky, during the past year, which have been paid for out of the appropriation for the annual repairs for marine hospitals.

## PADUCAH, KENTUCKY.

The grounds about the marine hospital at Paducah, Kentucky, have been improved and inclosed, stable built, and other work done, which was reported as being in progress at the date of my last annual report.

Total amount of appropriation.....	\$61,625 00
Amount withdrawn to September 30, 1859.....	58,285 49
Balance available.....	<u>3,339 51</u>

## CINCINNATI, OHIO.

The building authorized to be erected at Cincinnati, Ohio, for a marine hospital, has been entirely completed during the past season, its grounds improved, and the original inclosure repaired and completed. It is now occupied. It is a beautiful building, and, from its commanding location, has a fine architectural effect, and ornaments the city.

A large additional expenditure was made necessary for this work, as quicksand was unexpectedly met in sinking the foundations. The foundations were sunk an average of *thirty feet* below the line originally contemplated; but they now rest upon hard pan, and the building has not settled in the slightest degree since its construction.

Total amount of appropriation.....	\$186,000 00
Amount withdrawn to September 30, 1859.....	178,528 04
Balance available.....	<u>7,471 96</u>

## EVANSVILLE, INDIANA.

The fence about the grounds of the marine hospital at Evansville, Indiana, has been built, a stable erected, and the other authorized work completed during the past season, and within the amount appropriated for the purpose.

The portion of the hospital grounds fronting on the river is being rapidly worn away by the action of a powerful current which impinges against the bank and carries away the soil in large quantities every spring. The bank should be sloped and paved, and a wharf should be built for its safety whenever the owners of the river-front above shall make similar protection to their property. Until they shall do so it will be useless to attempt it on the hospital lot. It is absolutely a work of necessity, and the only reason it has not heretofore been done is

because it will be of but little use to attempt it unless the adjoining property above it is cared for in a similar manner.

Total amount of appropriation.....	\$62,500 00
Amount withdrawn to September 30, 1859.....	55,518 85
Balance available.....	<u>6,981 15</u>

## GALENA, ILLINOIS.

The building authorized to be constructed at Galena, Illinois, for a marine hospital, has been completed and furnished the past year, and is now ready for occupancy. It is a slightly brick edifice, and imposingly located on a high bluff overhanging the Fever river, forming the most prominent object from every point of view in this irregular city. The grounds are extensive, and capable of cultivation and great ornamentation. But this building, with many similar ones, is by no means necessary for the wants of sick seamen at this point. The average of patients does not exceed five or six in number, who could be quite as well cared for and at much less expense in the ordinary mode of managing patients by contract than they can be in an organized hospital.

Total amount of appropriation.....	\$48,800 00
Amount withdrawn to September 30, 1859.....	42,652 71
Balance available.....	<u>6,147 29</u>

In corroboration of my views upon the lack of necessity for an organized marine hospital at Galena, I beg herewith to submit an extract from the report of the special agent of the department, who has recently visited this point.

He says: "The marine hospital has been completed and partially furnished, but the officers have not yet been appointed. It will take \$300 or \$400 to fully furnish it, and I do not think there is any necessity to put it in operation until a couple of weeks before the opening of navigation, say about the middle of February. The government would save money by not putting it in operation at all. The average number of sick and disabled seamen boarded, &c., at this port by the government, from the opening until the close of navigation, has been about five per week. It will doubtless be less when the hospital is opened, as the better class of seamen seldom go into them. The pay per week for each patient, for boarding, nursing, and washing, is \$3; physician's fees, 25 cents per day, and 10 cents for medicine, until it amounts to \$6 25 for each patient, which is the limit allowed. The whole expense on this account last year was \$565 48. The hospital cannot be officered for less than this amount; so that it will be seen at once that the present system is much more economical than it will be when the hospital is put into operation. And such is the history of the matter at all small ports."

The special agent under estimates the cost of organizing the hospital. The pay of physicians, nurses, &c., with contingent expenses,

would probably be more than quadruple the amount of last year's expenses.

## BURLINGTON, IOWA.

During the past summer the city of Burlington was visited by a severe tornado, which entirely stripped off the roof of the United States marine hospital in that place, and seriously injured the columns and railing of the upper veranda. Other smaller damage was also occasioned by the storm upon the entire work. A new roof has been put upon the building, and the repairs completed. The grounds have also been sewered, graded, planted, and inclosed; the whole building furnished and ready for occupancy.

Total amount of appropriation.....	\$28,195 11
Amount withdrawn to September 30, 1859.....	26,944 82
Balance available.....	<u>1,250 29</u>

## DETROIT, MICHIGAN.

Orders have been issued for the proper drainage of the Detroit marine hospital grounds, and for a suitable iron fence at its principal front, which it is expected will all be completed before the cold weather prevents operations. The building has been for some time occupied, and its convenience and suitableness is daily manifested by the rapid improvement of sick seamen who avail themselves of the protection and care under the judicious management of the resident physician.

## COURT-HOUSES, POST OFFICES, &amp;c.

## RUTLAND AND WINDSOR, VERMONT.

The new court-houses and post offices at Rutland and at Windsor, Vermont, which are built from similar plans and drawings, but by different contractors, are both completed, furnished, and occupied by the postmaster of each place, and the court-rooms are ready for use whenever the courts shall be held.

The grading and inclosing the grounds, which is a work of some magnitude at each place, is now nearly finished, and will be entirely completed, it is expected, before winter sets in. The intense rigor of the winter in this locality renders necessary a very substantial founda-

tion and structure for all outside work, and the walls and fences have been built in accordance with such necessity.

These buildings are built of brick, with iron doors, iron ornamental window casings, &c., and are beautiful and imposing edifices, but are largely in advance of the necessities or wants of either place, both in size and cost.

The honorable Solomon Foot, United States senator from Vermont, has very liberally donated his extensive and valuable law library to the government for the use of the officers of the United States courts in that State, to be deposited in the new court-house at Rutland, provided this department will erect suitable cases for its reception and safe-keeping. The unexpended balance of the appropriation, after finishing the grounds, will be sufficient to build suitable cases, and I respectfully recommend that it be so expended, the expense of them being inconsiderable.

## BALTIMORE POST OFFICE.

The necessary changes in the property bought from the Baltimore Exchange Company to convert the building into a post office, for which a contract was made by your predecessor under the direction of the President, have been completed, and the building occupied by the officers of the department.

It is against the experience of this office to purchase an old building to be remodeled for government uses; the cost in every instance hitherto having exceeded the cost of a new, more suitable, and better building. In this case the contractors have evinced a determination to finish the building in a style worthy of the government and its proposed use. In their laudable zeal to do this, they have made some improvements and incurred expenses without authority. The appropriation for the service is nearly exhausted, and the contractors can only look to Congress for relief. The repairs upon the building are highly creditable to the contractors, and it is now very convenient for a post office, and an ornament to the city.

------------------------	-------------------------

## INDIANAPOLIS, INDIANA.

The commencement of the work upon the new court-house and post office authorized to be constructed at Indianapolis, Indiana, was retarded by the failure of the contractor, and by the subsequent failure of a sub-contractor, to whom he assigned his contract under the consent of the department. The foundations were commenced at the ultimate cost of the contractor's securities under this office, but before getting to a proper depth springs and quicksands were encountered, which rendered much additional work and expense necessary. These difficulties have been overcome, and a permanent and secure foundation laid. Portions of the superstructure have been contracted for with different parties, and the work has progressed very satisfactorily the past season. It is now nearly ready to receive the roof, the exterior walls being almost to the top of the upper story; and it is expected that the roof can be put in place and the building covered in this fall, so that the interior work may progress during the winter. So much of the exterior walls have been laid as to satisfactorily test the foundation, which proves amply sufficient, not the least sign of settlement or fracture having occurred; while an adjoining building, erected by a corporate company who contented themselves with a more shallow and slighter foundation, has already become badly fractured and the wall evidently settled. The exterior work is well advanced. All the columns, antaes, girders, and beams, up to the half story, are in their

\* November 1.—\$1,150 74 of this sum has since been paid, leaving but \$363 56 to the credit of the work.

proper places, three floors of segmental arches are completed, and all of the partition walls up to the half story.

Proposals for sites have been invited by advertisement and received for the new court-houses and post offices at Columbia, South Carolina, Raleigh, North Carolina, Tallahassee, Florida, Memphis, Tennessee, and Madison, Wisconsin; but no action has yet been taken upon them.

In this connection I respectfully invite your attention to the suggestions in my former report as to the necessity of special legislation in reference to the authorized buildings at Memphis, Tennessee, and Springfield, Illinois, before the works can be commenced. At Memphis the appropriation is for a *court-house*, but no courts are holden there. It was doubtless intended for a custom-house and post office, and may be an error of the engrossing clerk. At both places the contemplated plans will have to be reduced, or an additional appropriation made, before the work can with propriety be commenced.

The construction of the territorial buildings in New Mexico, viz: a state-house and penitentiary, has been measurably under this department, the plans having been prepared in my office; but the money appropriated has been disbursed under the direction of the governor of the Territory.

The appropriations for the state-house, seventy thousand dollars in all, have been exhausted, and the building is but partially erected, the walls only being raised to a level with the arches of the windows in the second story; and it is estimated by the superintendent of public buildings in that Territory that a further appropriation of \$60,000 will be required to complete it.

The appropriation for the penitentiary, \$20,000, has also been entirely expended without completing the building. It is estimated by the same officer that \$33,400 additional appropriation will be required to complete the work in such a manner as its importance and convenience require.

I am satisfied that much injury arises to these buildings from their exposure to the elements in an unfinished state; and I am advised by the federal officers, and by the delegate from the Territory, that the accommodations provided for in these structures are imperatively needed for the business necessities of the territorial government. I therefore respectfully recommend that the attention of Congress be called to this subject.

## TREASURY EXTENSION.

The work upon the Treasury extension during the past year has progressed as satisfactorily as the limited means would admit. The amount available at the date of my last annual report was \$516,681 94; and the work from that date, until the date when Congress indicated its desire to have the work measurably suspended, proceeded in the usual manner, leaving at the latter date, March 1, 1859, but \$294,994 69. Of this there has been withdrawn since March 1, 1859, but \$90,092 98, leaving still to the credit of the work \$204,901 69, to which is to be added the sum of \$50,000, appropriated for "preserving" the work. A portion of this sum is the retained per centage of the contractor upon the work, and the amount due for materials delivered and unpaid for, so that the balance for continuing the work will probably be exhausted in finishing the south wing.

Under the omission of Congress to make appropriation for *continuing* the work, it became necessary to instruct the contractors not to deliver any more materials upon their contracts. This was done, and was deemed by them to be a violation of the contract; but no other course could be pursued under the circumstances, and whatever damage may have been thereby occasioned to the contractors will be for Congress to adjudicate.

The contractors for the granite of the exterior have continued with unabated energy to quarry, cut, and deliver materials under the contract, (although they have not been paid therefor,) and the vicinity of the work is now cumbered with large masses of material which the department has neither the means to pay for nor put in place upon the building, and at the same time correspondingly continue the other part of the work. It now lies exposed to injury, and receives more or less, from wanton depredation, though guarded night and day by watchmen—the vandals desirous to do the injury easily availing themselves of the intervals in the watchmen's rounds to mutilate costly and carefully-wrought stone of great value. This is to be deplored; but-until means are furnished to put them in place, and continue the work, I see no remedy for it.

My endeavor has been, under your instructions, to finish the south wing, with the available balance, to the neglect of the other part of the work. For this I deemed that available balance sufficient. In this way all the force employed has been devoted to the south wing, which is now well advanced, and will probably be finished before the end of the present fiscal year.

If it shall be the policy of Congress to suspend the work upon this building, (as indicated at its last session,) then a much smaller sum than was appropriated for preserving the work last year will be sufficient. The appropriation of \$50,000, made the last session, was entirely too large for simply preserving the work, and totally inadequate for continuing it with any approach to economy or vigor. If the work is to stand still, and its corps of operatives disbanded and scattered, the sum of \$5,000 will fully pay for the watchmen and all incidental services; but if it is to be prosecuted with that vigor which a true

economy dictates, and which the necessities of the service imperatively require, then an appropriation of from eight hundred thousand to one million of dollars for its continuation should be made, the latter being the more desirable sum. And it should be made available as early in the coming spring as the weather will permit outdoor work to commence. If delayed until the general appropriation bill becomes available, viz.: 1st July, 1860, then half of the working season will have been lost, and the consequent damage incurred.

My experience upon this and other works, and my daily knowledge of the existing necessity of an enlarged accommodation for the working force of your department, constrain me most earnestly to advise and recommend a full appropriation. The security of valuable public documents, whose loss would involve a greater cost to the government than the entire work; the saving of rents now paid for inferior, unsafe, and inconvenient buildings, together with the loss of interest on the cost by the non-use of portions on which a large amount has already been expended, all combine to urge the speedy and vigorous completion of the work, and certify to the absolute necessity and economy of a liberal appropriation. The loss by damage to materials on the ground ready for use can hardly be definitely estimated. A massive stone, whose cost of quarrying and workmanship is a very considerable sum, may, by a wanton or careless blow from a passer-by, be irreparably injured, and a new one made necessary, when if timely put in its place upon the building all injury would be avoided. Especially is this true of the large works constructing at Charleston and New Orleans, for which no appropriation was made last year; the materials there used being much more friable, more elaborately wrought, of greater cost, and more readily susceptible of wanton injury or defacement.

The economy of a vigorous prosecution of the work is more apparent from the fact that the contingent expenses thereof—the payment to its officers and master workmen—are the same, whether the force employed be a large or a small one, and the work may be finished with a two years' contingent cost, as well as (indeed better than) to continue its contingent expenses for a longer period, if a full appropriation is made this winter. In this way a heavy item of expense may be largely lessened. But other reasons strongly impel me to urge its continuance. If now stopped, the trained force upon the work must be disbanded and scattered. There are many valuable officers upon it, men who have been trained at the public cost to the peculiar work to which each one is consigned, and who are now actually of double worth to the service than they were before such training. My experience proves in such cases the almost impossibility of getting them together again after a suspension, as they meanwhile get employed upon other and distant works, so that whenever the work is resumed and finished, (as resumed and finished it will be, sooner or later,) a new force must be gotten and organized, at an additional outlay of money and time, at consequent additional cost to the work, and a striking depreciation in the workmanlike character of its construction for a period. This reason may not seem a forcible one to those not familiar with the practical operation of it, but during the past thirty years in which I

have been engaged in the construction of public works under annual appropriations, I have so often seen it exemplified, and know so well the result, that it has a very grave importance on my mind, and I esteem it worthy of thoughtful consideration in reference to future appropriations.

If sufficient means are appropriated and made available this winter the work whole can be finished easily in two years. Almost the entire of the granite for the west wing is quarried, cut, and delivered, and encumbers the adjacent ground, and a large portion of the north wing is also delivered; all of which is yet unpaid for. The large and well-trained force of the contractor is now so well drilled and organized, and such are the facilities now prepared at the inexhaustible granite quarry, upon Dix island, that the remainder can be quarried and got ready, beyond all peradventure, in season for the other materials and the necessary labor, and quite as rapidly as such materials and labor can be procured; while there is no limit other than the dictation of convenience and economy to the force that can be marshaled under the present efficient officers.

I respectfully but earnestly recommend these views to your consideration, as not only applied to the work upon the Treasury extension, but also to the work upon the new custom-houses at Charleston and New Orleans.

During the past year there has been used upon the Treasury extension 2,700 tons of granite, 1,175,000 bricks, and about 637,000 pounds of wrought and cast iron.

The value of the materials, machinery, teams, tools, &c., on hand amounts to \$262,331 22. Of this there are about 3,800 tons of granite, costing \$189,591 15; 105,000 bricks, costing \$1,140; and about 294,818 pounds of wrought and cast iron, costing \$19,184 39.

Total amount of appropriation.....	\$1,750,000 00
Amount withdrawn to September 30, 1859.....	1,495,098 33
Balance available.....	<u>254,901 67</u>

In the above detailed history of each work I have given the amount of appropriation which I deem most suitable, consistent with a true economy, for a proper prosecution of the works under my charge, provided such appropriations can be made available as early in the spring as outdoor operations can be resumed. But if the appropriations are not made available before the close of the fiscal year, as has heretofore been the practice of Congress, then *one-half* of the working year will have been wasted, and it will not be necessary to appropriate the entire amount named for the larger works, as it could not be judiciously expended during the remaining half of the working year.

While I, therefore, very earnestly recommend that the full amount named in my report should be appropriated by separate bills, and made at once available, it is, at the same time, proper to say that if the availability of the appropriation is to be delayed until the close of the

present fiscal year, then only a *pro rata* of the amount named for the larger works will be required.

The following is a recapitulation of the sums which, in my judgment, should be appropriated for the works now constructing under this office, and made immediately available:

For completing the grounds, &c., at the Toledo custom-house.....	\$2,000
For repairing the damage occasioned by fire at the Milwaukee custom-house.....	7,000
For repairing the damage occasioned by fire at the Baltimore custom-house .....	15,000
For completion of grounds and outbuildings, &c., at the New Orleans marine hospital, as estimated by the local superintendent .....	100,000
For the continuance of the Charleston custom-house.....	500,000
For the continuance of the New Orleans custom-house....	500,000
For the continuance of the Treasury extension.....	1,000,000
For the annual repairs of marine hospitals.....	25,000
For the annual repairs of custom-houses.....	25,000

Appended to this report will be found nine tables exhibiting in tabulated form various details of the business of this office, viz:

- TABLE 1. List of custom-houses and marine hospitals built or purchased prior to 1850.
2. List of custom-houses, court-houses, post offices, marine hospitals, and miscellaneous works constructed since 1850, together with those now in course of construction, and those for which appropriations have been made, but the work not yet commenced.
  3. Shows the amount disbursed in each year since 1807 for the various public works under the Treasury Department.
  4. Shows the cost of public buildings finished since 1850, and prior to September 30, 1857, with the amount of revenue collected at each, and the cost of its collection.
  5. Gives the place where custom-houses, court-houses, and post-offices have been asked for prior to September 30, 1857, but not authorized; the amount of revenue collected at each place, its cost of collection, and the probable cost of the buildings asked for.
  6. List of custom-houses, court-houses, and post offices constructing on the 30th June, 1850, their probable cost, revenue derived, and cost of collecting revenue.
  7. Shows the places where custom-houses, court-houses, and post offices have been authorized, but not commenced, with the amount of revenue collected at each place, its cost of collection, and the probable cost of the building.

TABLE 8. Shows the location and nature of each work purchased, constructed or constructing; the total appropriations for each; date of purchase and cost of sites; amount expended, amount available, and amount required for completion of each; date and amount of each contract, time of completion, and total cost.

All of which is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

A. H. BOWMAN,

*Engineer in charge, Treasury Department.*

Hon. HOWELL COBB,

*Secretary of the Treasury.*

NOTE.—These estimates are such as would be asked for, judging by others for like places and purposes.

OFFICE OF CONSTRUCTION, Treasury Department.

A. H. BOWMAN, Engineer in charge.

have been engaged in the construction of public works under annual appropriations, I have so often seen it exemplified, and know so well the result, that it has a very grave importance on my mind, and I esteem it worthy of thoughtful consideration in reference to future appropriations.

If sufficient means are appropriated and made available this winter the work whole can be finished easily in two years. Almost the entire of the granite for the west wing is quarried, cut, and delivered, and encumbers the adjacent ground, and a large portion of the north wing is also delivered; all of which is yet unpaid for. The large and well-trained force of the contractor is now so well drilled and organized, and such are the facilities now prepared at the inexhaustible granite quarry, upon Dix island, that the remainder can be quarried and got ready, beyond all peradventure, in season for the other materials and the necessary labor, and quite as rapidly as such materials and labor can be procured; while there is no limit other than the dictation of convenience and economy to the force that can be marshaled under the present efficient officers.

I respectfully but earnestly recommend these views to your consideration, as not only applied to the work upon the Treasury extension, but also to the work upon the new custom-houses at Charleston and New Orleans.

During the past year there has been used upon the Treasury extension 2,700 tons of granite, 1,175,000 bricks, and about 637,000 pounds of wrought and cast iron.

The value of the materials, machinery, teams, tools, &c., on hand amounts to \$262,331 22. Of this there are about 3,800 tons of granite, costing \$189,591 15; 105,000 bricks, costing \$1,140; and about 294,818 pounds of wrought and cast iron, costing \$19,184 39.

Total amount of appropriation.....	\$1,750,000 00
Amount withdrawn to September 30, 1859.....	1,495,098 33
Balance available.....	254,901 67

In the above detailed history of each work I have given the amount of appropriation which I deem most suitable, consistent with a true economy, for a proper prosecution of the works under my charge, provided such appropriations can be made available as early in the spring as outdoor operations can be resumed. But if the appropriations are not made available before the close of the fiscal year, as has heretofore been the practice of Congress, then *one-half* of the working year will have been wasted, and it will not be necessary to appropriate the entire amount named for the larger works, as it could not be judiciously expended during the remaining half of the working year.

While I, therefore, very earnestly recommend that the full amount named in my report should be appropriated by separate bills, and made at once available, it is, at the same time, proper to say that if the availability of the appropriation is to be delayed until the close of the

present fiscal year, then only a *pro rata* of the amount named for the larger works will be required.

The following is a recapitulation of the sums which, in my judgment, should be appropriated for the works now constructing under this office, and made immediately available:

For completing the grounds, &c., at the Toledo custom-house.....	\$2,000
For repairing the damage occasioned by fire at the Milwaukee custom-house.....	7,000
For repairing the damage occasioned by fire at the Baltimore custom-house .....	15,000
For completion of grounds and outbuildings, &c., at the New Orleans marine hospital, as estimated by the local superintendent .....	100,000
For the continuance of the Charleston custom-house.....	500,000
For the continuance of the New Orleans custom-house....	500,000
For the continuance of the Treasury extension.....	1,000,000
For the annual repairs of marine hospitals.....	25,000
For the annual repairs of custom-houses.....	25,000

Appended to this report will be found nine tables exhibiting in tabulated form various details of the business of this office, viz:

**TABLE 1.** List of custom-houses and marine hospitals built or purchased prior to 1850.

2. List of custom-houses, court-houses, post offices, marine hospitals, and miscellaneous works constructed since 1850, together with those now in course of construction, and those for which appropriations have been made, but the work not yet commenced.
3. Shows the amount disbursed in each year since 1807 for the various public works under the Treasury Department.
4. Shows the cost of public buildings finished since 1850, and prior to September 30, 1857, with the amount of revenue collected at each, and the cost of its collection.
5. Gives the place where custom-houses, court-houses, and post-offices have been asked for prior to September 30, 1857, but not authorized; the amount of revenue collected at each place, its cost of collection, and the probable cost of the buildings asked for.
6. List of custom-houses, court-houses, and post offices constructing on the 30th June, 1850, their probable cost, revenue derived, and cost of collecting revenue.
7. Shows the places where custom-houses, court-houses, and post offices have been authorized, but not commenced, with the amount of revenue collected at each place, its cost of collection, and the probable cost of the building.

TABLE 8. Shows the location and nature of each work purchased, constructed or constructing; the total appropriations for each; date of purchase and cost of sites; amount expended, amount available, and amount required for completion of each; date and amount of each contract, time of completion, and total cost.

All of which is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

A. H. BOWMAN,

*Engineer in charge, Treasury Department.*

Hon. HOWELL COBB,

*Secretary of the Treasury.*

Medical and hospital department.....	70,402 35
Expenses of recruiting.....	103,874 99
Private and State claims.....	17,579 31
Printing books of tactics.....	626 45
Contingent expenses of Adjutant General's department.....	323 72
Relief of E. Ingersoll.....	335 75
	<hr/>
	9,151,390 20
	<hr/>

Property accounts examined and adjusted.....	4,336
Private claims examined and settled.....	488
Private claims examined and suspended or rejected.....	314
Requisitions registered, recorded, and posted.....	2,006
Army recruits registered.....	10,115
Certificate of military service issued to the Pension office....	3,171
Dead and discharged soldiers registered.....	1,931
Letters, accounts, and other papers received, briefed, and registered.....	5,174
Letters written, recorded, indexed, and mailed.....	6,450
	<hr/>

In addition, the following statements were prepared and transmitted from this office, viz:

Annual statement of Indian disbursements, prepared for Congress, in duplicate, for the fiscal year ending June 30, 1858, comprised in 775 sheets foolscap.

Annual statement of the "recruiting fund," prepared for the Adjutant General of the army.

Annual statement of the "contingencies of the army," prepared, in duplicate, for the Secretary of War.

Annual statement of the contingent expenses of this office, transmitted to the Secretary of the Treasury.

Annual report of balances to the First Comptroller.

Quarterly reports of balances and changes therein to the Second Comptroller.

The book-keeper's register shows 1,490 settlements, which have been daily journalized and posted in the ledgers, which, as well as the appropriation ledgers, have been duly kept up.

T. J. D. FULLER,  
*Second Auditor.*

TREASURY DEPARTMENT,  
*Second Auditor's Office, November 4, 1859.*

---

C.

TREASURY DEPARTMENT,  
*Third Auditor's Office, November 17, 1859.*

SIR: I have the honor to submit the following report of the operations of this branch of the Treasury Department for the fiscal year ending the 30th of June, 1859:

BOOKKEEPER'S DIVISION.

It appears from the chief bookkeeper's statement that the total amount of drafts on the treasury, by requisitions, during the fiscal year, was \$19,061,687 98, as follows:

Amount of drafts by requisition charged to personal accounts.....	\$18,689,514 05
Amount of drafts by requisition on account of military contributions charged to personal accounts.....	14,214 73
Amount of claims paid by requisitions and charged to the appropriations, including acts for the relief of individuals.....	357,959 20
	<hr/>
	19,061,687 98
	<hr/>

REPAYMENTS.

Amount of counter requisitions by transfers.....	\$1,523,720 67
Deposits in the treasury.....	122,210 88
Drafts cancelled.....	8,450 16
	<hr/>
	1,654,381 71
	<hr/>

## REPORT ON THE FINANCES.

The total amount of settlements during the fiscal year, comprised in 2,629 reports, was \$20,634,621 95, as follows:

Accounts settled out of advances made and charged to disbursing officers and agents.....	\$20,535,395 48
Accounts settled appertaining to military contributions, under act of March 3, 1849 .....	98,035 28
Accounts settled pertaining to the civil fund of California .....	1,191 19
	<hr/>
	20,634,621 95
	<hr/>

## QUARTERMASTER'S DIVISION.

From the 1st of July, 1858, to the 30th of June, 1859, there were received 694 quartermasters' accounts, involving the sum of \$11,881,915 49. During the same period there were settled 586 accounts, involving the sum of \$10,826,937 39, leaving at the end of the fiscal year 161 unsettled accounts, as follows:

On hand, unsettled, June 30, 1858.....	53
Received during the fiscal year .....	694
	<hr/>
Total for settlement.....	747
Settled during the year.....	586
	<hr/>
On hand unsettled .....	161
	<hr/>

A large number of those remaining unsettled were accounts of officers, who claim balances due them, and therefore explanations were required before they could be adjusted. There were also received during the fiscal year 499 property accounts, exclusive of the above-mentioned, and which were settled by the 30th of June. During the fiscal year 1,753 letters were written in this division.

## SUBSISTENCE DIVISION.

In this division there were audited in the year ending 30th of June, 1859, 804 accounts of officers doing duty in the subsistence department of the army, amounting to \$2,437,921 90. The number of letters written during the year in this division was 811.

## PENSION DIVISION.

To this division are assigned the keeping and settlement of accounts of agents for paying pensions; the settlement of claims on account of arrearages of pensions and unclaimed pensions, for a period exceeding

fourteen months, made payable by law at the treasury, with other miscellaneous reports and extensive correspondence.

During the fiscal year ending June 30, 1859, there were received and recorded in this branch of the office, letters..... 1,596  
Of letters written there were..... 1,891  
Of calls for information received and answered ..... 225

Pension agents' quarterly accounts on hand June 30, 1858 ..... 17  
Pension agents' accounts received during the fiscal year ... 192

Of pension agents' accounts settled during the year there were ..... 209  
..... 172

Leaving on hand 30th June, 1859 ..... 37

Of pension claims there were received..... 583  
Of which there were settled..... 403

Leaving suspended, disallowed, or otherwise disposed of ..... 180

*Disbursements, as per settlements.*

Amount involved in pension agents' accounts..... \$964,826 35  
Claims..... 25,601 86

ENGINEER'S DIVISION.

The accounts transmitted under the regulations from disbursing officers and agents of the Engineer and Topographical Engineer Bureaus, the office of exploration and survey of the War Department, and accounts received from the War Department of officers and agents disbursing under the special direction of the Secretary of War, are assigned to this division for adjustment.

The number of accounts received from these several sources, which were on file in this division and unadjusted at the commencement of the fiscal year ending 30th of June, 1858, was..... 46  
Number received during the year..... 232

The number for adjustment was therefore..... 278  
Of this number there were adjusted during the year..... 216

Leaving unadjusted at the close of the year..... 62

The two hundred and sixteen accounts adjusted within the year involves the sum of \$5,869,699 47.

The business of a miscellaneous character consists of as follows :

Letters written during the year..... 134  
Requisitions drawn..... 23  
Special and transfer statements of accounts..... 9

## MISCELLANEOUS DIVISION.

During the fiscal year 409 claims and accounts were received and registered, involving the sum of \$527,917 82; of these and others on file, 1019 were reported on, involving the sum of \$633,411 06; of which amount the sum of \$562,322 78 was allowed, and the residue suspended or disallowed. Of the claims included in the foregoing, most of them are such as were directed to be allowed by special acts of Congress, but which came here for report thereon to the proper head of department, or for administrative action merely. On many of them, however, written reports were made, some of which were lengthy and involved considerable investigation and labor.

Of claims under the act of 3d March, 1849, for payments for horses and other property lost or destroyed in the military service of the United States, more have been acted on during the last fiscal year than any year since the passage of the act, in consequence of more favorable construction placed on the law by opinions of the Attorney General than had heretofore prevailed in this office, and which have been accepted and adopted by you as the true interpretation of the law. The claims acted on number 843, of which 621 have been allowed, in whole or in part, to the amount of \$38,547.

During the year 783 letters were written in this division; copies of papers made covering 475 pages of foolscap; record books filled to the extent of 1,005 pages; and 1,640 reports, awards and statement of accounts made.

## COLLECTION DIVISION.

The operations of this division, from the 30th of September, 1858, to the 30th of September, 1859, were as follows:

Total balance outstanding September 31, 1858, as stated in last report, exclusive of amount in suit and balances which accrued prior to the year 1820,	\$1,091,507 52
Amount charged on the docket during the year to officers having ceased to disburse or gone out of service.....	61,349 10
	<hr/>
	1,152,856 62
From which deduct amount closed by settlements and payments during the year.....	\$122,672 16
Suits brought during the year.....	17,945 95
	<hr/>
	140,618 11
Leaving a balance since 1820, due September 30, 1859, of.....	<hr/>
	1,012,238 51

During the year there were 255 letters received and registered with a brief of contents. Letters written and recorded, 234.

Nine transcripts of accounts were prepared for suit, with a brief of the facts in each case, and transmitted to the Second Comptroller, exhibiting a balance of \$17,945 95 as due the United States.

#### SOLDIERS' CLAIMS AND BOUNTY LAND DIVISION.

During the past fiscal year 973 communications, relating to pay, pension, and bounty land claims, were duly investigated and disposed of, including claims of widows and orphans, under acts of March 16, 1802, April 16, 1816, and the first section of the act of March 3, 1853, (McRae's volunteers,) which are executed in this office. Of the entire number of claims, 24 were allowed. The amount of money involved in the payment of the claims allowed was \$2,311 42. Seven thousand seven hundred and thirty bounty land claims, with 224 invalid and half-pay pension cases, were examined and certified to the Commissioner of Pensions. The number of letters written during the year in this division was 1,140. Three hundred and five bounty land claims yet remaining to be examined and certified to the Commissioner of Pensions.

In addition to the foregoing, which comprises the regular business of the office, there has been considerable extra labor performed, growing out of calls of Congress and other causes. During the last session of Congress a report was prepared, being the result of an examination of the papers connected with claims growing out of Indian hostilities in Oregon and Washington Territories in 1855 and 1856, which occupied the time of two clerks for nearly three months. By resolution of the House of Representatives, another examination and report was directed to be made at the coming session. For the last six months four clerks, and for four months past eight clerks, have been nearly constantly engaged in analyzing, classifying, and copying in detail the rolls, accounts, vouchers, &c., pertaining to these claims, preparatory to final action thereon. The force of the office remains as at the period of my last report, twenty-seven clerks, by law attached to this office, and whose salaries are paid out of appropriations made therefor, having been heretofore transferred from it and doing duty in other offices of the department.

With great respect, your obedient servant,

R. J. ATKINSON, *Auditor.*

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

---

D.

TREASURY DEPARTMENT,  
*Fourth Auditor's Office, October 1, 1859.*

SIR: I have the honor to inform you that the operations of this office for the fiscal year ending June 30, 1859, exhibit the following results:

There were settled and reported one hundred and forty-two principal accounts of pursers, including the accounts of Baring Brothers & Co., the London bankers and agents of the United States, and those of the contractors for foreign mail service, embracing seventy-nine thousand four hundred and fifty-one minor accounts, and showing actual money disbursements to the amount of eight millions two hundred and eighteen thousand four hundred and ten dollars and forty-four cents. Of this sum, two hundred and thirty-three thousand one hundred and fifty-seven dollars and thirty-nine cents is shown to have been expended by pursers on account of the marine corps, and three hundred and ninety-three thousand six hundred and eighty dollars and two cents to have been disbursed on account of the foreign steam mail service. The number of accounts of navy agents settled and reported is thirty-seven, embracing seventeen thousand eight hundred and eighty minor accounts, and showing disbursements amounting to five millions seven hundred and twelve thousand nine hundred and fifteen dollars and forty-four cents. This sum includes eighteen thousand one hundred and eight dollars and ninety-four cents expended by said agents on account of the marine corps. Of the disbursing officers of the marine corps, there were settled and reported twenty principal accounts, embracing six thousand three hundred and seventy minor accounts, and showing actual money expenditures, amounting to four hundred and fifty-five thousand and forty-two dollars and eighty-seven cents. Sixty navy pension agents' accounts, embracing one thousand three hundred and twenty-six minor accounts, were settled and reported, showing disbursements to the amount of one hundred and two thousand eight hundred and nineteen dollars.

The miscellaneous accounts settled by certificates were three hundred and seventy, and the number of such accounts settled and reported was one hundred and forty-four. These latter show direct disbursements to the amount of two hundred and thirty-eight thousand six hundred and thirty-one dollars and seventy-three cents. The amounts disbursed, as well as the number of principal and minor accounts settled, are furnished in order to afford some conception of the extent of the business done during the fiscal year. It is not pretended that the disbursements were made during the year, but mostly from one to three years anterior to the first of July, 1858. The account of a purser who has been on a foreign cruise is never settled until the termination of the cruise, when he has sixty days in which to prepare and render his final account to this office. A cruise on a foreign station occupies from two to three years. Therefore, it is not until the settlement of such an account that the amount disbursed for two or three years previous can be ascertained. The labor of the settlement is generally in proportion to the number of minor accounts and the amount expended, though this is not invariably the case. The amounts disbursed for the several branches of the service and producing the aggregate of disbursements, as shown by the operations of the office during the last fiscal year, are thus given:

Under the various heads of appropriation for the naval service.....	\$13,918,691 75
Under the various heads of appropriation on account of the marine corps.....	706,309 20
On account of foreign steam mail service.....	393,920 20
On account of navy pensions of every class.....	102,819 00
Aggregate.....	<u>\$15,121,740 15</u>

Under the various heads of appropriation for the naval service, the marine corps, foreign mail service, and for navy pensioners of the different classes, there was drawn from the treasury, during the fiscal year, upon proper requisitions from the Secretaries of the Navy and Interior, the sum of fifteen million ninety-one thousand six hundred and forty-one dollars and forty-five cents; and the amount refunded and covered into the treasury was three hundred and ten thousand seven hundred and eighty-nine dollars and one cent. The amount thus drawn imposed the labor of registering the requisitions and entering the same under the proper heads of appropriation, and the amount refunded impose, in addition, the duty of preparing the requisitions. Besides the labor growing out of this branch of duties in the office, there are always, upon the settlement of the accounts of disbursing officers, many transfer requisitions to register each, requiring various entries to be made. Seven hundred and five examinations and reports were made upon bounty land applications, and about one hundred upon applications for pensions. To give some idea of the labor which these examinations impose, I will state that rolls containing from five hundred to one thousand names have sometimes to be looked through for one name, and when it is found, it may appear that the man was transferred to another vessel of equal complement, and thence to a third, the rolls of which have in like manner to be carefully examined. It is not unfrequent, in such a case, that a whole day is necessarily occupied in the examination. The clerk charged with this duty is also engaged in making up an abstract of balances due from the United States. This work was commenced on the first of January last, and has been kept up, the entries having been regularly and promptly made as the balances are presented by the returns of pursers. The names being entered in alphabetical order, the abstract will be invaluable for future reference, especially as all payments of the balances as made are faithfully entered thereon.

The number of allotments of pay by officers, seamen, and marines, which was registered was sixteen hundred and fifty, and the number discontinued was fifteen hundred and forty. The number of letters received, briefed and registered was five thousand one hundred and eighty-five, and the number written and recorded was six thousand and eighty-one. There were six hundred and sixty-five reports recorded. These comprise the regular official reports, settled accounts, reported accounts, and miscellaneous. The latter are frequently very long. Voluminous transcripts in five cases for suit, with a brief in each case, were prepared, and the briefs recorded. Among the regular official

reports are a detailed statement of the expenditures of the contingent fund of this office, a statement of accounts standing more than three years, and the balances due, and a statement of the expenditures of the contingent fund of the navy. This last is a work of much research and labor. Besides the regular reports, much labor was thrown upon this office in the preparation of answers to special calls made by Congress, and the chairman of committees for information upon various subjects. One of such calls is worthy of special mention. On the 12th of June, 1858, the Senate passed a resolution requesting "the President of the United States to communicate to the Senate, as soon after the commencement of the next session of Congress as possible, the amount of money paid for pensions in each of the States and Territories since the commencement of the present government." This resolution was referred to the Commissioner of Pensions to answer, who called upon this office for information to enable him to answer. The information was furnished in a detailed statement, showing the amount which had been paid in each year by navy pension agents, and through this office to navy pensioners, from the commencement of the government to the 30th June, 1854, the amount paid in each State and Territory, and the amount paid to each of the different classes of pensioners, &c., viz: invalid, widows and orphans, privateer invalid and widows and orphans of privateers' men during the same period, The time of one clerk exclusively and a portion of the time of another were devoted nearly three months to the collecting and arranging of the material for this report.

Several prize accounts were settled during the year, and the lists sent to the navy agent for payment. All the attention which the limited force would allow has been bestowed upon the list of outstanding balances due the United States, and a considerable reduction of the list has been made.

I cannot close this report without briefly advertng to the fact that the business of the office seems to be constantly increasing. I have made some examination with a view of instituting a comparison between the amount of business during the last fiscal year and that during the year ending June 30, 1819, but I find that the business now exceeds so immeasurably that done in the year last referred to that a comparison is inadmissible. The act of April 20, 1818, (3d vol., Statute, p. 445,) passed one year after the office was established, fixed the number of clerks for this office at eleven, besides the chief clerk. The act of March 3, 1853, increased the number to fourteen, besides the chief clerk; since the date of the latter act, three clerks have been transferred to the office from other branches of the treasury, one of whom was transferred immediately upon the act of 1853 going into operation, and the other two in 1855. I think that, after a general examination, I hazard nothing in stating that the regular business has increased more than twenty-five per centum since 1853, and fully three-fifths of that increase since 1855. A proportionate increase of the clerical force of the office, in view of the public interest, is therefore highly necessary. But while confined to the present limited and circumscribed accommodations in the way of rooms, I cannot suggest that the desired increase of clerks be authorized. There is not room

for the present force of the office. Double the number of rooms would not be too many. The clerks, in consequence of this fact, are subjected to serious disadvantages in the performance of their several duties. Cases for files and accounts are crowded into every available space, and are full. The three or four clerks in a room are compelled to occupy an area which would not be too great for one. There is now no other depository for files and accounts than the attic of the building, where they are, to some extent, beyond the protection of the office, and where the clerks are compelled to resort when it is necessary to refer to them.

They are, therefore, unsafe, inconvenient for reference, and from their exposed situation they become more or less disarranged. The intimate connection, however, between this office and the Navy Department renders it desirable and very important that it should continue to occupy a portion of the Navy Department building.

I have the honor to be, very respectfully, your obedient servant,

A. J. O'BANNON,  
*Fourth Auditor.*

HON. HOWELL COBB,  
*Secretary of the Treasury.*

---

E.

TREASURY DEPARTMENT,  
*Fifth Auditor's Office, November 2, 1859.*

SIR: In obedience to law, I have the honor to report that the condition of this office, resulting from its current operations for the fiscal year ending June 30, 1859, has never been better.

During the year there have been settled in this office, and transmitted to the First Comptroller of the Treasury for his decision and revision, thirteen hundred and ninety accounts of the several classes referred by law to this office for adjustment; two thousand four hundred and forty-eight letters concerning the same have been written, recorded, and dispatched to their destination. The business of this office comprises the settlement of the accounts of ministers, ministers resident, commissioners, *chargés d'affaires* to foreign courts and governments, and their secretaries, consuls general, all salaried consuls, the United States bankers at London, and the disbursing clerks of the departments at home. These all transmit their accounts quarterly, and when found correct in their preparation, and properly supported by authorized charges and sufficient vouchers, they are promptly adjusted, and the parties duly advised thereof.

Besides the accounts enumerated above, those of our consular officers for disbursements made on account of relief afforded to our destitute seamen in foreign ports, are likewise transmitted quarterly, and receive immediate attention. The accounts also of masters and owners of vessels, or their assignees, for the passage of destitute seamen sent home to the United States by the consular officers, are received and promptly adjusted. And further, the accounts of the commissioners

under the boundary and fishery commissions, are audited and reported on as a part of the regular business of this office.

In connection with this report, I would invite your attention to the annexed statements in detail, marked A and B. In statement A is shown the annual salary provided by law for the salaried consular officers at the several places named, the amounts *actually* paid on account of salary, and the fees reported as received on account of the United States for the year ending December 31, 1858.

A comparison of this statement with the corresponding one made by this office for the year ending December 31, 1857, shows an excess of payments by the Treasurer of the United States over those last reported of \$16,415 39, which is accounted for by the fact that while the payments for salary have been augmented the sum of \$3,995 91 on account of transit and receiving instructions, the total amount of fees reported is less by the sum of \$12,419 48.

It is to be regretted that reports of "fees received" have not, in *all* cases, been forwarded; for a very slight investigation and analysis of the statement now furnished will show a gratifying increase in the general amount as far as received, and a steady though gradual approximation of the *revenues* of the government from this source towards the *disbursements* on account of the consular system.

In all cases, however, the delinquencies have been noticed, and those in default reminded of the requirements of the law.

The statement B exhibits, also in detail, the several sums of money disbursed, at the consulates mentioned, for the relief and protection of destitute American seamen, and the amounts received by the several consuls from seamen and passed to the credit of the "fund for relief and protection of destitute seamen."

This statement is a new feature in the reports and accompanying papers of this office, and is suggestive in many of its particulars. It will be observed that the disbursements at *three* consular ports, viz: Callao, Honolulu, and Lahaina, alone, are in excess of the whole appropriation for the relief and protection of seamen at least one-fifth, and that the total of disbursements on account of relief is in excess of the appropriation the sum of \$72,469 32.

Under the act of Congress of August 18, 1856, there have been adjusted and settled, for the year ending December 31, 1858, the accounts of the principal and subordinate salaried consular officers named in statement A, who returned fees for the above period, amounting, in the aggregate, to \$98,383 41, which have been applied towards the liquidation of their salaries, amounting, for the same period, to \$255,540 85, leaving the sum of one hundred and fifty-seven thousand one hundred and fifty-seven dollars and forty-four cents (\$157,157 44) as the amount paid by the Treasurer of the United States for excess of salaries over fees received.

It affords me pleasure to be able to state that, under the operation of the laws for remodeling the diplomatic and consular systems, and the regulations framed in pursuance of the same, the difficulties and irregularities, once so formidable and numerous, have disappeared, and that the simplicity and effectiveness of the present system are daily becoming more apparent. I have the satisfaction further to report, that the current work in all the divisions of the operations of

this office has been kept up, and that there are, at the present date, no accounts unadjusted, where it was possible, from the condition in which they were rendered, to audit and settle the same. In all such, the necessary connections have been suggested, and will doubtless be made.

The books of the office have been carefully and faithfully kept. The force employed is sufficient for the prompt and efficient transaction of the business, though the reports for some years past will show a steady increase in the annual amount of labor performed. The clerks in the office are attentive and industrious, and the performance of their several duties has been prompt and commendable, as the satisfactory result of the operations of this office for the past year sufficiently attest.

I have the honor to be, very respectfully, your obedient servant,

BARTHOLOMEW FULLER,

*Fifth Auditor.*

Hon. HOWELL COBB,

*Secretary of the Treasury.*

under the boundary and fishery commissions, are audited and reported on as a part of the regular business of this office.

† Vacant.

‡ Returns for 1858 not made.

§ Accounts unadjusted from July 1, 1857, to July 21, 1858. Incumbent not a citizen of the United States, and by the 21st section of the act of August 18, 1856, not entitled to salary.

§ Accounts for 1858 unadjusted, the incumbent having failed to comply with the requirements of sections 5 and 13 of the act of 18th August aforesaid.

TREASURY DEPARTMENT, Fifth Auditor's Office, September 27, 1859.

## MISCELLANEOUS DIVISION.

During the fiscal year 409 claims and accounts were received and registered, involving the sum of \$527,917 82; of these and others on file, 1019 were reported on, involving the sum of \$633,411 06; of which amount the sum of \$562,322 78 was allowed, and the residue suspended or disallowed. Of the claims included in the foregoing, most of them are such as were directed to be allowed by special acts of Congress, but which came here for report thereon to the proper head of department, or for administrative action merely. On many of them, however, written reports were made, some of which were lengthy and involved considerable investigation and labor.

Of claims under the act of 3d March, 1849, for payments for horses and other property lost or destroyed in the military service of the United States, more have been acted on during the last fiscal year than any year since the passage of the act, in consequence of more favorable construction placed on the law by opinions of the Attorney General than had heretofore prevailed in this office, and which have been accepted and adopted by you as the true interpretation of the law. The claims acted on number 843, of which 621 have been allowed, in whole or in part, to the amount of \$38,547.

During the year 783 letters were written in this division; copies of papers made covering 475 pages of foolscap; record books filled to the extent of 1,005 pages; and 1,640 reports, awards and statement of accounts made.

## COLLECTION DIVISION.

The operations of this division, from the 30th of September, 1858, to the 30th of September, 1859, were as follows:

Total balance outstanding September 31, 1858, as stated in last report, exclusive of amount in suit and balances which accrued prior to the year 1820,	\$1,091,507 52
Amount charged on the docket during the year to officers having ceased to disburse or gone out of service.....	61,349 10
	<hr/>
	1,152,856 62
From which deduct amount closed by settlements and payments during the year.....	\$122,672 16
Suits brought during the year.....	17,945 95
	<hr/>
	140,618 11
Leaving a balance since 1820, due September 30, 1859, of.....	<hr/>
	1,012,237

During the year there were 255 letters received and registered with a brief of contents. Letters written and recorded, 234.

Nine transcripts of accounts were prepared for suit, with a brief of the facts in each case, and transmitted to the Second Comptroller, exhibiting a balance of \$17,945 95 as due the United States.

#### SOLDIERS' CLAIMS AND BOUNTY LAND DIVISION.

During the past fiscal year 973 communications, relating to pay, pension, and bounty land claims, were duly investigated and disposed of, including claims of widows and orphans, under acts of March 16, 1802, April 16, 1816, and the first section of the act of March 3, 1853, (McRae's volunteers,) which are executed in this office. Of the entire number of claims, 24 were allowed. The amount of money involved in the payment of the claims allowed was \$2,311 42. Seven thousand seven hundred and thirty bounty land claims, with 224 invalid and half-pay pension cases, were examined and certified to the Commissioner of Pensions. The number of letters written during the year in this division was 1,140. Three hundred and five bounty land claims yet remaining to be examined and certified to the Commissioner of Pensions.

In addition to the foregoing, which comprises the regular business of the office, there has been considerable extra labor performed, growing out of calls of Congress and other causes. During the last session of Congress a report was prepared, being the result of an examination of the papers connected with claims growing out of Indian hostilities in Oregon and Washington Territories in 1855 and 1856, which occupied the time of two clerks for nearly three months. By resolution of the House of Representatives, another examination and report was directed to be made at the coming session. For the last six months four clerks, and for four months past eight clerks, have been nearly constantly engaged in analyzing, classifying, and copying in detail the rolls, accounts, vouchers, &c., pertaining to these claims, preparatory to final action thereon. The force of the office remains as at the period of my last report, twenty-seven clerks, by law attached to this office, and whose salaries are paid out of appropriations made therefor, having been heretofore transferred from it and doing duty in other offices of the department.

With great respect, your obedient servant,

R. J. ATKINSON, *Auditor.*

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

D.

TREASURY DEPARTMENT,  
*Fourth Auditor's Office, October 1, 1859.*

Sir: I honor to inform you that the operations of this office ending June 30, 1859, exhibit the following results:

During the last session of Congress a report was prepared, being the result of an examination of the papers connected with claims growing out of Indian hostilities in Oregon and Washington Territories in 1855 and 1856, which occupied the time of two clerks for nearly three months. By resolution of the House of Representatives, another examination and report was directed to be made at the coming session. For the last six months four clerks, and for four months past eight clerks, have been nearly constantly engaged in analyzing, classifying, and copying in detail the rolls, accounts, vouchers, &c., pertaining to these claims, preparatory to final action thereon. The force of the office remains as at the period of my last report, twenty-seven clerks, by law attached to this office, and whose salaries are paid out of appropriations made therefor, having been heretofore transferred from it and doing duty in other offices of the department.

With great respect, your obedient servant,

R. J. ATKINSON, *Auditor.*

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

---

D.

TREASURY DEPARTMENT,  
*Fourth Auditor's Office, October 1, 1859.*

SIR: I have the honor to inform you that the operations of this office for the fiscal year ending June 30, 1859, exhibit the following results:

## MISCELLANEOUS DIVISION.

During the fiscal year 409 claims and accounts were received and registered, involving the sum of \$527,917 82; of these and others on file, 1019 were reported on, involving the sum of \$633,411 06; of which amount the sum of \$562,322 78 was allowed, and the residue suspended or disallowed. Of the claims included in the foregoing, most of them are such as were directed to be allowed by special acts of Congress, but which came here for report thereon to the proper head of department, or for administrative action merely. On many of them, however, written reports were made, some of which were lengthy and involved considerable investigation and labor.

Of claims under the act of 3d March, 1849, for payments for horses and other property lost or destroyed in the military service of the United States, more have been acted on during the last fiscal year than any year since the passage of the act, in consequence of more favorable construction placed on the law by opinions of the Attorney General than had heretofore prevailed in this office, and which have been accepted and adopted by you as the true interpretation of the law. The claims acted on number 843, of which 621 have been allowed, in whole or in part, to the amount of \$38,547.

During the year 783 letters were written in this division; copies of papers made covering 475 pages of foolscap; record books filled to the extent of 1,005 pages; and 1,640 reports, awards and statement of accounts made.

## COLLECTION DIVISION.

The operations of this division, from the 30th of September, 1858, to the 30th of September, 1859, were as follows:

Total balance outstanding September 31, 1858, as stated in last report, exclusive of amount in suit and balances which accrued prior to the year 1820,		\$1,091,507 52
Amount charged on the docket during the year to officers having ceased to disburse or gone out of service.....		61,349 10
		<hr/> 1,152,856 62
From which deduct amount closed by settlements and payments during the year.....	\$122,672 16	
Suits brought during the year.....	17,945 95	
	<hr/>	140,618 11
Leaving a balance since 1820, due September 30, 1859, of.....		<hr/> <u>1,012,238 51</u>

During the year there were 255 letters received and registered with a brief of contents. Letters written and recorded, 234.

Nine transcripts of accounts were prepared for suit, with a brief of the facts in each case, and transmitted to the Second Comptroller, exhibiting a balance of \$17,945 95 as due the United States.

#### SOLDIERS' CLAIMS AND BOUNTY LAND DIVISION.

During the past fiscal year 973 communications, relating to pay, pension, and bounty land claims, were duly investigated and disposed of, including claims of widows and orphans, under acts of March 16, 1802, April 16, 1816, and the first section of the act of March 3, 1853, (McRae's volunteers,) which are executed in this office. Of the entire number of claims, 24 were allowed. The amount of money involved in the payment of the claims allowed was \$2,311 42. Seven thousand seven hundred and thirty bounty land claims, with 224 invalid and half-pay pension cases, were examined and certified to the Commissioner of Pensions. The number of letters written during the year in this division was 1,140. Three hundred and five bounty land claims yet remaining to be examined and certified to the Commissioner of Pensions.

In addition to the foregoing, which comprises the regular business of the office, there has been considerable extra labor performed, growing out of calls of Congress and other causes. During the last session of Congress a report was prepared, being the result of an examination of the papers connected with claims growing out of Indian hostilities in Oregon and Washington Territories in 1855 and 1856, which occupied the time of two clerks for nearly three months. By resolution of the House of Representatives, another examination and report was directed to be made at the coming session. For the last six months four clerks, and for four months past eight clerks, have been nearly constantly engaged in analyzing, classifying, and copying in detail the rolls, accounts, vouchers, &c., pertaining to these claims, preparatory to final action thereon. The force of the office remains as at the period of my last report, twenty-seven clerks, by law attached to this office, and whose salaries are paid out of appropriations made therefor, having been heretofore transferred from it and doing duty in other offices of the department.

With great respect, your obedient servant,

R. J. ATKINSON, *Auditor*.

T. S. SMITH, Auditor.

## B.

*Statement of the operations of the Second Auditor's office during the fiscal year ending the 30th June, 1859, showing the number of money accounts settled, the expenditure embraced therein, the number of property accounts examined and adjusted, together with other duties performed pertaining to the business of the office; prepared in obedience to instructions of the Secretary of the Treasury.*

The number of accounts settled is 2,105, embracing an expenditure of \$9,151,390 20, under the following heads, viz:

Pay department of the army.....	\$4,959,732 71
Ordnance department of the army.....	1,974,269 36
Indian affairs, embracing the wagon road accounts ....	1,996,246 68
Quartermaster's department.....	27,998 88
Medical and hospital department.....	70,402 35
Expenses of recruiting.....	103,874 99
Private and State claims.....	17,579 31
Printing books of tactics.....	626 45
Contingent expenses of Adjutant General's department.....	323 72
Relief of E. Ingersoll.....	335 75
	<hr/>
	9,151,390 20

Property accounts examined and adjusted.....	4,336
Private claims examined and settled.....	488
Private claims examined and suspended or rejected.....	314
Requisitions registered, recorded, and posted.....	2,006
Army recruits registered.....	10,115
Certificate of military service issued to the Pension office.....	3,171
Dead and discharged soldiers registered.....	1,931
Letters, accounts, and other papers received, briefed, and registered.....	5,174
Letters written, -recorded, indexed, and mailed.....	6,450

In addition, the following statements were prepared and transmitted from this office, viz:

Annual statement of Indian disbursements, prepared for Congress, in duplicate, for the fiscal year ending June 30, 1858, comprised in 775 sheets foolscap.

Annual statement of the "recruiting fund," prepared for the Adjutant General of the army.

Annual statement of the "contingencies of the army," prepared, in duplicate, for the Secretary of War.

Annual statement of the contingent expenses of this office, transmitted to the Secretary of the Treasury.

Annual report of balances to the First Comptroller.

Quarterly reports of balances and changes therein to the Second Comptroller.

The book-keeper's register shows 1,490 settlements, which have been daily journalized and posted in the ledgers, which, as well as the appropriation ledgers, have been duly kept up.

T. J. D. FULLER,  
*Second Auditor.*

TREASURY DEPARTMENT,  
*Second Auditor's Office, November 4, 1859.*

---

C.

TREASURY DEPARTMENT,  
*Third Auditor's Office, November 17, 1859.*

SIR: I have the honor to submit the following report of the operations of this branch of the Treasury Department for the fiscal year ending the 30th of June, 1859:

BOOKKEEPER'S DIVISION.

It appears from the chief bookkeeper's statement that the total amount of drafts on the treasury, by requisitions, during the fiscal year, was \$19,061,687 98, as follows:

Amount of drafts by requisition charged to personal accounts.....	\$18,689,514 05
Amount of drafts by requisition on account of military contributions charged to personal accounts.....	14,214 73
Amount of claims paid by requisitions and charged to the appropriations, including acts for the relief of individuals.....	357,959 20
	<hr/>
	19,061,687 98
	<hr/>

REPAYMENTS.

Amount of counter requisitions by transfers.....	\$1,523,720 67
Deposits in the treasury.....	122,210 88
Drafts cancelled.....	8,450 16
	<hr/>
	1,654,381 71
	<hr/>

The total amount of settlements during the fiscal year, comprised in 2,629 reports, was \$20,634,621 95, as follows:

Accounts settled out of advances made and charged to disbursing officers and agents.....	\$20,535,395 48
Accounts settled appertaining to military contributions, under act of March 3, 1849 .....	98,035 28
Accounts settled pertaining to the civil fund of California .....	1,191 19
	<hr/>
	20,634,621 95
	<hr/>

#### QUARTERMASTER'S DIVISION.

From the 1st of July, 1858, to the 30th of June, 1859, there were received 694 quartermasters' accounts, involving the sum of \$11,881,915 49. During the same period there were settled 586 accounts, involving the sum of \$10,826,937 39, leaving at the end of the fiscal year 161 unsettled accounts, as follows:

On hand, unsettled, June 30, 1858.....	53
Received during the fiscal year .....	694
	<hr/>
Total for settlement.....	747
Settled during the year.....	586
	<hr/>
On hand unsettled .....	161
	<hr/>

A large number of those remaining unsettled were accounts of officers, who claim balances due them, and therefore explanations were required before they could be adjusted. There were also received during the fiscal year 499 property accounts, exclusive of the above-mentioned, and which were settled by the 30th of June. During the fiscal year 1,753 letters were written in this division.

#### SUBSISTENCE DIVISION.

In this division there were audited in the year ending 30th of June, 1859, 804 accounts of officers doing duty in the subsistence department of the army, amounting to \$2,437,921 90. The number of letters written during the year in this division was 811.

#### PENSION DIVISION.

To this division are assigned the keeping and settlement of accounts of agents for paying pensions; the settlement of claims on account of arrearages of pensions and unclaimed pensions, for a period exceeding

fourteen months, made payable by law at the treasury, with other miscellaneous reports and extensive correspondence.

During the fiscal year ending June 30, 1859, there were received and recorded in this branch of the office, letters..... 1,596  
 Of letters written there were..... 1,891  
 Of calls for information received and answered ..... 225

Pension agents' quarterly accounts on hand June 30, 1858 ..... 17  
 Pension agents' accounts received during the fiscal year ... 192

Of pension agents' accounts settled during the year there were ..... 209  
 ..... 172

Leaving on hand 30th June, 1859. .... 37

Of pension claims there were received..... 583  
 Of which there were settled..... 403

Leaving suspended, disallowed, or otherwise disposed of ..... 180

*Disbursements, as per settlements.*

Amount involved in pension agents' accounts..... \$964,826 35  
 Claims..... 25,601 86

ENGINEER'S DIVISION.

The accounts transmitted under the regulations from disbursing officers and agents of the Engineer and Topographical Engineer Bureaus, the office of exploration and survey of the War Department, and accounts received from the War Department of officers and agents disbursing under the special direction of the Secretary of War, are assigned to this division for adjustment.

The number of accounts received from these several sources, which were on file in this division and unadjusted at the commencement of the fiscal year ending 30th of June, 1858, was..... 46  
 Number received during the year..... 232

The number for adjustment was therefore..... 278  
 Of this number there were adjusted during the year..... 216

Leaving unadjusted at the close of the year..... 62

The two hundred and sixteen accounts adjusted within the year involves the sum of \$5,869,699 47.

The business of a miscellaneous character consists of as follows :

Letters written during the year..... 134  
 Requisitions drawn..... 23  
 Special and transfer statements of accounts..... 9

## MISCELLANEOUS DIVISION.

During the fiscal year 409 claims and accounts were received and registered, involving the sum of \$527,917 82; of these and others on file, 1019 were reported on, involving the sum of \$633,411 06; of which amount the sum of \$562,322 78 was allowed, and the residue suspended or disallowed. Of the claims included in the foregoing, most of them are such as were directed to be allowed by special acts of Congress, but which came here for report thereon to the proper head of department, or for administrative action merely. On many of them, however, written reports were made, some of which were lengthy and involved considerable investigation and labor.

Of claims under the act of 3d March, 1849, for payments for horses and other property lost or destroyed in the military service of the United States, more have been acted on during the last fiscal year than any year since the passage of the act, in consequence of more favorable construction placed on the law by opinions of the Attorney General than had heretofore prevailed in this office, and which have been accepted and adopted by you as the true interpretation of the law. The claims acted on number 843, of which 621 have been allowed, in whole or in part, to the amount of \$38,547.

During the year 783 letters were written in this division; copies of papers made covering 475 pages of foolscap; record books filled to the extent of 1,005 pages; and 1,640 reports, awards and statement of accounts made.

## COLLECTION DIVISION.

The operations of this division, from the 30th of September, 1858, to the 30th of September, 1859, were as follows:

Total balance outstanding September 31, 1858, as stated in last report, exclusive of amount in suit and balances which accrued prior to the year 1820,	\$1,091,507 52
Amount charged on the docket during the year to officers having ceased to disburse or gone out of service.....	61,349 10
	<hr/>
	1,152,856 62
From which deduct amount closed by settlements and payments during the year.....	\$122,672 16
Suits brought during the year.....	17,945 95
	<hr/>
	140,618 11
Leaving a balance since 1820, due September 30, 1859, of.....	<hr/>
	1,012,238 51

During the year there were 255 letters received and registered with a brief of contents. Letters written and recorded, 234.

Nine transcripts of accounts were prepared for suit, with a brief of the facts in each case, and transmitted to the Second Comptroller, exhibiting a balance of \$17,945 95 as due the United States.

#### SOLDIERS' CLAIMS AND BOUNTY LAND DIVISION.

During the past fiscal year 973 communications, relating to pay, pension, and bounty land claims, were duly investigated and disposed of, including claims of widows and orphans, under acts of March 16, 1802, April 16, 1816, and the first section of the act of March 3, 1853, (McRae's volunteers,) which are executed in this office. Of the entire number of claims, 24 were allowed. The amount of money involved in the payment of the claims allowed was \$2,311 42. Seven thousand seven hundred and thirty bounty land claims, with 224 invalid and half-pay pension cases, were examined and certified to the Commissioner of Pensions. The number of letters written during the year in this division was 1,140. Three hundred and five bounty land claims yet remaining to be examined and certified to the Commissioner of Pensions.

In addition to the foregoing, which comprises the regular business of the office, there has been considerable extra labor performed, growing out of calls of Congress and other causes. During the last session of Congress a report was prepared, being the result of an examination of the papers connected with claims growing out of Indian hostilities in Oregon and Washington Territories in 1855 and 1856, which occupied the time of two clerks for nearly three months. By resolution of the House of Representatives, another examination and report was directed to be made at the coming session. For the last six months four clerks, and for four months past eight clerks, have been nearly constantly engaged in analyzing, classifying, and copying in detail the rolls, accounts, vouchers, &c., pertaining to these claims, preparatory to final action thereon. The force of the office remains as at the period of my last report, twenty-seven clerks, by law attached to this office, and whose salaries are paid out of appropriations made therefor, having been heretofore transferred from it and doing duty in other offices of the department.

With great respect, your obedient servant,

R. J. ATKINSON, *Auditor*.

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

---

D.

TREASURY DEPARTMENT,  
*Fourth Auditor's Office, October 1, 1859.*

SIR: I have the honor to inform you that the operations of this office for the fiscal year ending June 30, 1859, exhibit the following results:

There were settled and reported one hundred and forty-two principal accounts of pursers, including the accounts of Baring Brothers & Co., the London bankers and agents of the United States, and those of the contractors for foreign mail service, embracing seventy-nine thousand four hundred and fifty-one minor accounts, and showing actual money disbursements to the amount of eight millions two hundred and eighteen thousand four hundred and ten dollars and forty-four cents. Of this sum, two hundred and thirty-three thousand one hundred and fifty-seven dollars and thirty-nine cents is shown to have been expended by pursers on account of the marine corps, and three hundred and ninety-three thousand six hundred and eighty dollars and two cents to have been disbursed on account of the foreign steam mail service. The number of accounts of navy agents settled and reported is thirty-seven, embracing seventeen thousand eight hundred and eighty minor accounts, and showing disbursements amounting to five millions seven hundred and twelve thousand nine hundred and fifteen dollars and forty-four cents. This sum includes eighteen thousand one hundred and eight dollars and ninety-four cents expended by said agents on account of the marine corps. Of the disbursing officers of the marine corps, there were settled and reported twenty principal accounts, embracing six thousand three hundred and seventy minor accounts, and showing actual money expenditures, amounting to four hundred and fifty-five thousand and forty-two dollars and eighty-seven cents. Sixty navy pension agents' accounts, embracing one thousand three hundred and twenty-six minor accounts, were settled and reported, showing disbursements to the amount of one hundred and two thousand eight hundred and nineteen dollars.

The miscellaneous accounts settled by certificates were three hundred and seventy, and the number of such accounts settled and reported was one hundred and forty-four. These latter show direct disbursements to the amount of two hundred and thirty-eight thousand six hundred and thirty-one dollars and seventy-three cents. The amounts disbursed, as well as the number of principal and minor accounts settled, are furnished in order to afford some conception of the extent of the business done during the fiscal year. It is not pretended that the disbursements were made during the year, but mostly from one to three years anterior to the first of July, 1858. The account of a purser who has been on a foreign cruise is never settled until the termination of the cruise, when he has sixty days in which to prepare and render his final account to this office. A cruise on a foreign station occupies from two to three years. Therefore, it is not until the settlement of such an account that the amount disbursed for two or three years previous can be ascertained. The labor of the settlement is generally in proportion to the number of minor accounts and the amount expended, though this is not invariably the case. The amounts disbursed for the several branches of the service and producing the aggregate of disbursements, as shown by the operations of the office during the last fiscal year, are thus given:

Under the various heads of appropriation for the naval service.....	\$13,918,691 75
Under the various heads of appropriation on account of the marine corps.....	706,309 20
On account of foreign steam mail service.....	393,920 20
On account of navy pensions of every class.....	102,819 00
Aggregate.....	<u>\$15,121,740 15</u>

Under the various heads of appropriation for the naval service, the marine corps, foreign mail service, and for navy pensioners of the different classes, there was drawn from the treasury, during the fiscal year, upon proper requisitions from the Secretaries of the Navy and Interior, the sum of fifteen million ninety-one thousand six hundred and forty-one dollars and forty-five cents; and the amount refunded and covered into the treasury was three hundred and ten thousand seven hundred and eighty-nine dollars and one cent. The amount thus drawn imposed the labor of registering the requisitions and entering the same under the proper heads of appropriation, and the amount refunded impose, in addition, the duty of preparing the requisitions. Besides the labor growing out of this branch of duties in the office, there are always, upon the settlement of the accounts of disbursing officers, many transfer requisitions to register each, requiring various entries to be made. Seven hundred and five examinations and reports were made upon bounty land applications, and about one hundred upon applications for pensions. To give some idea of the labor which these examinations impose, I will state that rolls containing from five hundred to one thousand names have sometimes to be looked through for one name, and when it is found, it may appear that the man was transferred to another vessel of equal complement, and thence to a third, the rolls of which have in like manner to be carefully examined. It is not unfrequent, in such a case, that a whole day is necessarily occupied in the examination. The clerk charged with this duty is also engaged in making up an abstract of balances due from the United States. This work was commenced on the first of January last, and has been kept up, the entries having been regularly and promptly made as the balances are presented by the returns of pursers. The names being entered in alphabetical order, the abstract will be invaluable for future reference, especially as all payments of the balances as made are faithfully entered thereon.

The number of allotments of pay by officers, seamen, and marines, which was registered was sixteen hundred and fifty, and the number discontinued was fifteen hundred and forty. The number of letters received, briefed and registered was five thousand one hundred and eighty-five, and the number written and recorded was six thousand and eighty-one. There were six hundred and sixty-five reports recorded. These comprise the regular official reports, settled accounts, reported accounts, and miscellaneous. The latter are frequently very long. Voluminous transcripts in five cases for suit, with a brief in each case, were prepared, and the briefs recorded. Among the regular official

reports are a detailed statement of the expenditures of the contingent fund of this office, a statement of accounts standing more than three years, and the balances due, and a statement of the expenditures of the contingent fund of the navy. This last is a work of much research and labor. Besides the regular reports, much labor was thrown upon this office in the preparation of answers to special calls made by Congress, and the chairman of committees for information upon various subjects. One of such calls is worthy of special mention. On the 12th of June, 1858, the Senate passed a resolution requesting "the President of the United States to communicate to the Senate, as soon after the commencement of the next session of Congress as possible, the amount of money paid for pensions in each of the States and Territories since the commencement of the present government." This resolution was referred to the Commissioner of Pensions to answer, who called upon this office for information to enable him to answer. The information was furnished in a detailed statement, showing the amount which had been paid in each year by navy pension agents, and through this office to navy pensioners, from the commencement of the government to the 30th June, 1854, the amount paid in each State and Territory, and the amount paid to each of the different classes of pensioners, &c., viz: invalid, widows and orphans, privateer invalid and widows and orphans of privateers' men during the same period. The time of one clerk exclusively and a portion of the time of another were devoted nearly three months to the collecting and arranging of the material for this report.

Several prize accounts were settled during the year, and the lists sent to the navy agent for payment. All the attention which the limited force would allow has been bestowed upon the list of outstanding balances due the United States, and a considerable reduction of the list has been made.

I cannot close this report without briefly adverting to the fact that the business of the office seems to be constantly increasing. I have made some examination with a view of instituting a comparison between the amount of business during the last fiscal year and that during the year ending June 30, 1819, but I find that the business now exceeds so immeasurably that done in the year last referred to that a comparison is inadmissible. The act of April 20, 1818, (3d vol., Statute, p. 445,) passed one year after the office was established, fixed the number of clerks for this office at eleven, besides the chief clerk. The act of March 3, 1853, increased the number to fourteen, besides the chief clerk; since the date of the latter act, three clerks have been transferred to the office from other branches of the treasury, one of whom was transferred immediately upon the act of 1853 going into operation, and the other two in 1855. I think that, after a general examination, I hazard nothing in stating that the regular business has increased more than twenty-five per centum since 1853, and fully three-fifths of that increase since 1855. A proportionate increase of the clerical force of the office, in view of the public interest, is therefore highly necessary. But while confined to the present limited and circumscribed accommodations in the way of rooms, I cannot suggest that the desired increase of clerks be authorized. There is not room

for the present force of the office. Double the number of rooms would not be too many. The clerks, in consequence of this fact, are subjected to serious disadvantages in the performance of their several duties. Cases for files and accounts are crowded into every available space, and are full. The three or four clerks in a room are compelled to occupy an area which would not be too great for one. There is now no other depository for files and accounts than the attic of the building, where they are, to some extent, beyond the protection of the office, and where the clerks are compelled to resort when it is necessary to refer to them.

They are, therefore, unsafe, inconvenient for reference, and from their exposed situation they become more or less disarranged. The intimate connection, however, between this office and the Navy Department renders it desirable and very important that it should continue to occupy a portion of the Navy Department building.

I have the honor to be, very respectfully, your obedient servant,

A. J. O'BANNON,  
*Fourth Auditor.*

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

---

E.

TREASURY DEPARTMENT,  
*Fifth Auditor's Office, November 2, 1859.*

SIR: In obedience to law, I have the honor to report that the condition of this office, resulting from its current operations for the fiscal year ending June 30, 1859, has never been better.

During the year there have been settled in this office, and transmitted to the First Comptroller of the Treasury for his decision and revision, thirteen hundred and ninety accounts of the several classes referred by law to this office for adjustment; two thousand four hundred and forty-eight letters concerning the same have been written, recorded, and dispatched to their destination. The business of this office comprises the settlement of the accounts of ministers, ministers resident, commissioners, *chargés d'affaires* to foreign courts and governments, and their secretaries, consuls general, all salaried consuls, the United States bankers at London, and the disbursing clerks of the departments at home. These all transmit their accounts quarterly, and when found correct in their preparation, and properly supported by authorized charges and sufficient vouchers, they are promptly adjusted, and the parties duly advised thereof.

Besides the accounts enumerated above, those of our consular officers for disbursements made on account of relief afforded to our destitute seamen in foreign ports, are likewise transmitted quarterly, and receive immediate attention. The accounts also of masters and owners of vessels, or their assignees, for the passage of destitute seamen sent home to the United States by the consular officers, are received and promptly adjusted. And further, the accounts of the commissioners

## L.

TREASURY DEPARTMENT,  
*Register's Office, November 28, 1859.*

SIR: I have the honor to report that during the last fiscal year the business of this office has been performed with the usual dispatch in all the branches. The accounts revised by the First Comptroller and Commissioner of Customs, received at this office, have been entered and registered in the proper books, and filed as required by law. Since my last report the files room, in the south extension of the Treasury building, has been completed and fitted up with iron cases for the reception of accounts received from the Comptroller and Commissioner of Customs. All the accounts relating to the customs, all accounts settled by the Fifth Auditor and the Commissioner of the General Land Office, and a large portion of accounts settled by the First Auditor, other than those of the customs, have been removed to the room, and properly arranged and filed therein. The accounts now remaining in the basement of the old Treasury building will be removed and arranged during the coming winter. Much care has been bestowed in arranging the papers, so that there may be no delay in searching for any account called for by the officers of the government.

The annual report on commerce and navigation has been completed, placed in the hands of the printer, a large portion of it printed, and the proof-sheets read. It is hoped that the work will be printed and bound and laid on the tables of the members on the first day of the session of Congress, one month in advance of the time required by law.

The public accounts—receipts and expenditures—will be completed at an early day, ready to be laid before Congress during the first or second week of the session. This work, from present indications, will be more voluminous than that of last year.

The tables, statements, and reports to accompany your annual report, prepared in this office, have been completed and forwarded.

In conclusion, I may state that the business of the office is in good condition, and the duties of the several clerks as satisfactorily performed as at any period since my appointment.

I am, very respectfully, your obedient servant,

F. BIGGER, *Register.*

Hon. HOWELL COBB,  
*Secretary of the Treasury.*

*Statement showing the amount of moneys expended at each custom-house in the United States during the fiscal year ending June 30, 1859.*

F. BIGGER, Register.

TREASURY DEPARTMENT, Register's Office, November 22, 1859.

## No. 15.

NEW ORLEANS, *Louisiana*, November 15, 1859.

SIR: The board of supervising inspectors, now assembled in this city, at their eighth annual meeting, have the honor of submitting to you their proceedings and those of their several local boards of inspectors during the past year.

We have, from time to time, in our several reports, endeavored to form and submit to you an impartial opinion of the results which may fairly be attributed to the operation of the steamboat law of August 30, 1852, whether the same be favorable or unfavorable; and in our last annual report we were compelled to admit that the statistics of disasters for the previous year did not exhibit the continued beneficial results which the friends of the law had hoped.

Although, as a mere matter of statistics, this was the exhibit, we, at the same time, expressed the opinion that several of the most serious disasters were of an unprecedented character, having their origin, not in the ordinary and necessary risks of steam navigation, but in incendiarism or carelessness of the grossest character. We think these views have been fully borne out in the results of the past year, as it will be seen by the statistical table accompanying this report, that the losses both of life and property have been far less than in any year since the law went into operation.

We think that this decrease may be fairly attributed to the beneficial operation of the law, and to a greater familiarity with its requirements on the part of steamboat owners and officers and inspectors; also to the fact that as new causes of disaster or accident are developed, immediate measures are taken by the board to remedy the evil.

The occurrence of fires on board passenger steamers is still a source of much anxiety, and remedial measures have been taken from time to time to guard against them, and, as we know from reports of local boards, with some good results, as we learn that in many cases fires occurring have been controlled and extinguished by the means provided in accordance with the requirements of law.

In speaking upon the subject of fires in our last report, we stated that our efforts in reference to this class of accidents had been directed to a twofold object:

“1st. To provide such means and appliances as can be readily brought into use at the first alarm,” &c. “2d. To discover, if possible, some available substance which may be easily applied to this light and inflammable material, (of the upper works and cabins of steamers,) and which shall materially *retard* the progress of the flames,” &c., &c.

To these objects our attention is still directed; the first we endeavor to secure by all proper mechanical appliances, and by such arrangements in the construction of new steamers as will aid in securing the result; also, by endeavoring to impress upon the minds of all interested the great importance of keeping all their pumps, hose-pipes, &c., in the most perfect order, and ready for immediate use; and it is gratifying to know that in very many cases this is fully recognized by steamboat officers, as their arrangements and discipline are so complete that

scarce an instant will elapse from the first alarm until the means of extinguishment are at work ; but in many other cases we regret to say this importance is not so fully recognized, nor are their arrangements so complete for ready operation ; still, on the whole, there is evident improvement.

During the past year experiments have been tried by some of the members of this board with the view of discovering, if possible, some substance and mode of application which should, in a measure at least, secure the second of the objects named. These experiments were made in consequence of certain discoveries said to have been made recently, which, from the accounts given, we hoped would have secured the desired object ; the result, however, was but partially attained. In this connection we take the liberty of inserting a copy of the report of these experiments, which will give a more correct idea of the eventual probable success of the application of the materials experimented upon, (*viz*: silicate of soda, lime, and sand,) as a fire “retarder.”

NEW YORK, *November 27, 1858.*

SIR: We have made several experiments with silicate of soda as a coating on wood to guard against the rapid spread of fire. The result has been that in every instance the coating has had a perceptible influence in retarding the rapidity of combustion, according to the severity of the test. As an example, in one of our experiments we prepared several pieces of pine boards two feet long, six inches wide, one and a quarter inch in thickness ; these were dressed off in a uniform manner. No. 1 was without any preparation being applied to it. No. 2 had two coats of silicate of soda. No. 3 had one coat of the silicate, a coat of lime, (whitewash,) and then an additional coat of the silicate. No. 4 had two coats of silicate, and dusted with sand before the last coat was dry. No. 5 had two coats of silicate and three coats of paint, (white lead and oil.)

We then procured a sheet-iron box, four feet long, two feet wide, and about eighteen inches deep. The bottom of the box being perforated with holes sufficient to allow a good draft of air through, the box was filled with lightwood, and permitted to burn so as to leave a bed of live coals in the bottom of the box, and, at the same time, make a uniform heat throughout the box.

The five pieces of boards above named were then put on a rod of iron (having holes bored in the boards fifteen inches from one end) and lifted into the box, the ends of the rod resting on the ends of the box. In about three-quarters of one minute the board having no coating on it took fire and blazed very briskly. In about four minutes No. 5 began to ignite at the lower end, the fire gradually extending up the board to about three inches, burning in a smouldering-like manner, but no blaze arose from it. No. 2 ignited at the lower end, to the extent of about half an inch on the board. On the other two boards, Nos. 3 and 4, no ignition could be discovered ; but after they were taken off it was perceptible that the very ends had been ignited. The test was continued for ten minutes ; during this time none of the boards having the coating applied blazed, whilst the unprotected board blazed vigorously during the whole time from its first ignition.

Another experiment tried with four pine boxes, made in a uniform manner, thirty inches square and three feet high; the thickness of the boards was fourteen-sixteenths of an inch.

No. 1 was not protected with coating.

No. 2 had two coats of silicate of soda.

No. 3 had one coat of silicate, one coat of lime, (whitewash,) after which an additional coat of silicate was applied.

No. 4 had two coats of silicate, and sanded. In each of these boxes was burnt six pounds of shavings.

The thickness of the boards remaining unburnt in each was as follows: No. 1, eleven-sixteenths of an inch; No. 2, thirteen-sixteenths; No. 3, thirteen-sixteenths; No. 4, twelve-sixteenths. It was quite perceivable that the boxes on which the coating was applied were longer in igniting than the unprotected box; and after the fire was burnt down the blaze disappeared sooner in the former than it did in the latter.

It is very evident to, us from the experiments we have made, that the silicate of soda applied to wood will afford a very great protection against the ignition and the spread of fire. We also submitted some pieces which had been prepared with the silicate to be painted in the usual manner of painting wood-work on steamboats, and the report of the painters that it in no manner affects the applying or working of the paint; that, in fact, all the painting, gilding, or ornamenting can be as well done upon such a priming coat as in the ordinary manner. This being the case, it becomes a simple matter to apply this protection to the wood-work before painting; and in all those parts of the wood-work which are not to be painted it will be still better protected by applying the silicate in combination with lime or sand.

We have reason to believe that when prepared in quantities this material will be no more expensive than ordinary paint, and therefore there will be no objection on the score of expense. We propose pursuing these experiments so long as any of the material we have had prepared remains.

We remain, very respectfully, your obedient servants,

BENJAMIN CRAWFORD,

*Chairman of Committee on Fire Apparatus.*

Hon. HOWELL COBB,

*Secretary of the Treasury.*

The experiments of which the foregoing is a report were necessarily upon a limited scale, as but a small amount of money could be appropriated to the purpose; and we still hope and believe that a series of thoroughly conducted experiments would lead to the discovery of such a compound of those materials, or of others, as could readily be applied to the surface of the wood-work. Acting as a protection against the rapid spread of fire, and at the same time interfering in no degree with the usual painting, gilding, and ornamenting, such a material discovered, if not of a much more expensive character than the ordinary paint, would, we doubt not, come rapidly into use, so soon as its protective character became known.

While speaking of disasters by fire, we conceive it not improper to allude to a method but recently introduced, of binding bales of cotton

with iron, instead of rope as heretofore. The object of the inventors of the iron bands, as we understand it, was to introduce a cheap and indestructible binding of ready application, but incidentally, and by no anticipation of the inventors, a much more important object has been attained, viz: almost entire freedom from rapid and destructive conflagration, whether on steamers, sailing vessels, in warehouses, or upon wharves and landings. It is well known by those who have had opportunities for observation, that the combustion of bales of cotton proceeds but slowly until the binding is destroyed and the bales burst open, when immediately the fire springs into activity, which places it almost beyond the control of any means of extinguishment. Whether in a warehouse or upon wharves, and when occurring upon steam vessels, it may without exaggeration be said, that unless the fire be under control *before* the bursting of the binding ropes, the destruction of the vessel and cargo is almost inevitable.

But the introduction of the iron bands is a perfect security from the bursting of the bales, and decreases the risk of transportation and storage of cotton to an extent almost incredible. So long as the bales continue bound in their compressed state they can burn only upon the surface, and the combustion is thus readily controlled, and we have been informed of cases where iron-bound bales have passed through a fire with a loss of only a small per centage of the total quantity; where with rope-bound bales passing through the same fire the whole was destroyed. The importance of this matter to steamboat owners, forwarders, railroad companies, underwriters, and all others concerned in the production, consumption, or transportation of cotton, cannot, in our opinion, be overrated; and it is because of the large quantities of cotton transported upon our steam vessels of the South and West, and the great risk of such transportation, that we deem it our duty to refer thus strongly to this matter, as we conceive it has not received the attention which its importance demands.

It is true that, in the transportation of cotton upon passenger steamers, great care and many precautions are taken to guard against fire, but still the hazard from fire is very great, and, as we have good reason to know, is a source of constant and serious anxiety to the officers as well as passengers.

So important do we think this subject that, did we consider it within our powers, we should deem it our duty to seek in some way to induce underwriters, forwarders, and others to encourage the introduction of iron bands; but as we cannot do this, we endeavor to direct attention to it by means of this report, believing that in so doing we are not only carrying out the objects of the law, but subserving very largely the interest and safety of many classes of the community.

Accidents by explosion or bursting of boilers still occasionally occur, though, in proportion to the number of steam vessels employed, their number is much reduced in comparison with former years. The change has not been in proportion only, but in character. Formerly almost all explosions occurred immediately after leaving a landing or after stopping the engines for a time for some other purpose, but during the past year several, and, in fact, nearly all the explosions have occurred (more particularly on the western rivers) while the boat was running

in the usual and regular manner, and without any preliminary notice or occurrence attracting attention whatever, and also when carrying a pressure of steam within that granted by the certificate of inspection, so far as evidence could be obtained. This, in some cases, has undoubtedly been caused by the rapid deterioration of the boilers, in consequence of extraordinary and active oxidation; and in others from a gradual weakening by unequal expansion and contraction of several portions of the boilers, caused either by improper proportion or construction of the boilers, or by their injudicious management. This will be more fully shown in a subsequent portion of this report, when giving details of several accidents which have occurred. One important prolific source and cause of these accidents upon the high-pressure boats of the western waters has undoubtedly been the introduction of what is called the "doctor" engine for feeding the boilers with water. Not, we would observe, that this introduction has been the cause in the abstract, but an improper or *injudicious use* of these engines has, in our opinion, led to many accidents which have occurred. (On the whole, we believe the introduction of this engine has been in a high degree conducive to safety.) This has been by feeding *cold* water into the boilers when the main engines were stopped, and thus reducing the temperature and producing contraction of one portion of the boilers while other portions remained at the same high temperature which they had prior to the introduction of the *cold* feed water.

The force of this contraction being irresistible, some portion of the structure of the boiler must yield to it, and this is invariably either the rivets or the rivet holes and laps. After such contraction, the temperature of the same portion of the boilers being again raised by a cessation of the introduction of the *cold* feed water, and substituting that of the *hot* feed water, by the operation of the heater of the main engines, the reverse effect is produced, the parts again expanded to their former extent, and thus this destructive effect is going on, by alternate expansion and contraction, until some portion of the iron becomes too much weakened to withstand the pressure under which the boilers are worked, and accidents always serious and sometimes fearful and destructive alike to property and life are the result.

The weakened condition of boilers from this cause is very frequently indicated by a serious leaking at the weakened portion, and no judicious and careful engineer will fail to notice and be governed by such indications so far as to have the weakened portions removed and the boilers thoroughly repaired, and by these means no doubt many serious and fatal accidents have been avoided. But these indications cannot be relied upon as an unerring and timely notice; hence we believe accidents have not unfrequently occurred from this cause. The board have deemed this matter so important that they have, during the present session, given it their serious and patient consideration, with the view of preventing accidents from this cause hereafter, and they have recommended such measures on the part of the local inspectors, owners, and engineers of steamboats, as will, in their opinion, if thoroughly followed, materially reduce, if they do not entirely do away with, accidents occurring from this cause.

Accidents from collision still occur, but rarely between inspected

steamers. Indeed the regulations for meeting and passing, the system of signals by lights, and the steam whistle now in use on inspected steamers is so complete that a collision between them can scarcely occur, except from extreme carelessness or neglect of the necessary precautionary measures.

Collisions with sailing vessels have been by far of the most frequent occurrence, and the investigation of accidents of this character has shown that in very many if not all cases they have been in a great degree caused by the ignorance, on the part of the officers on the sailing vessels, of the signals and lights used on steamers.

So frequent are collisions of this character that this board have deemed it their duty to endeavor in some way to remedy the evil by furnishing masters of sailing vessels such information in regard to the system of lights and whistle signals used on passenger steamers, and the rules adopted for meeting and passing as will enable them to manage their vessels with reference thereto when meeting with such steamers.

With this object in view, the board at its present session has instructed a committee to prepare a circular of such information to be distributed to shipmasters from the several custom-houses in such manner as may be deemed best, should the honorable Secretary of the Treasury sanction such mode of distribution. It is true that this measure will be attended with some expense and trouble, but when it is considered that if by this means but a single collision is prevented each year, this alone would fully justify the expense. As a measure of economy, and if we consider thereby the probable saving of life, the argument is very much strengthened.

If by an act of Congress sailing vessels were compelled to show lights when sailing within a marine league of the coast, and when navigating inland waters, we are of opinion that greatly increased safety from collision would be the result.

Although by the requirements of law passenger steamers are compelled to carry a certain number of life-boats, still we do not think the full advantage of this requirement will be realized until some method is devised and adopted for getting them overboard safely and without damage. In case of accident requiring the use of these boats, such is generally the confusion and lack of discipline on board that unless some simple, efficient, and safe means be at hand for launching the boats, they will most likely be so injured as to be rendered useless in the very act of getting them overboard, and thus the most important means of escape be entirely cut off.

Several plans for lowering boats safely, even when the steamer is at full speed, have been devised, and we understand successfully applied. Indeed, so important has this subject been deemed in Great Britain, that it is now required that all vessels employed by the government as transport vessels, or engaged in carrying emigrants, shall have one or more of these life-boats so fitted. A large number of the steamers of the British navy have also one or more of their boats fitted for lowering in this manner. We are of opinion that some such plan should be adopted upon our passenger steamers, but as no such method has been yet successfully introduced in this country, we conceive that

we should not be justified in requiring their application and use on our passenger steamers. We would respectfully suggest that the proper method of introducing such a system would be for Congress to authorize such experiments as might be deemed necessary to determine upon a feasible and efficient plan, and at the same time one least open to objection on the score of expense and inconvenience, and then require by law its application, or one of equal efficiency, to all passenger steamers.

We cannot doubt that such action will result in the saving of many lives not only in cases of serious disaster, but in case of other accidents of minor importance and in our large and important harbors, of almost daily occurrence, such as small boats being run down or upset, persons falling and being knocked overboard, &c., &c., where the time lost in getting a boat prepared and sending to the rescue is many times fatal to the persons whose assistance is intended.

The rules for the government of pilots and the system of lights, also the whistle signals, adopted by this board, continue to operate in a most satisfactory manner. So successful, indeed, is their operation, that, upon a full consideration of the subject during our present session, the only addition was a provision for carrying uniform signal lights on steamers of the western rivers. No other change or addition was deemed advisable. We have, therefore, determined not to alter or revise these rules and signals, unless that, as the result of further observation and experience, important benefits may be expected therefrom.

The testing of boilers by hydrostatic pressure we conceive to be one of the most important provisions of the steamboat law, and not a year passes in which serious defects are not detected by means of this test—defects such as, if not thus discovered, must sooner or later have resulted in serious and probably fatal disaster.

Cases have occurred of very rapid deterioration of boilers after this test had been applied, and before the year for which the inspector's certificate was granted had expired, and which point strongly to the necessity of applying this test more frequently than once a year; and at our last session we called the attention of the local boards to this matter, and authorized them to apply the hydrostatic test more frequently than once a year where, from observation or the circumstances of the case, they deemed it necessary. The explosion of one of the boilers of the steamer "Bay State" in about eight months after inspection, under a pressure of steam less than allowed by the certificate, the particulars of which accident are given more fully in a subsequent part of this report, is an illustration in point of the necessity, in some cases, of applying the test more frequently than heretofore.

In our annual report for the year 1855, and again in our report for the year 1858, we referred to the fact of extensive frauds in the stamping of boiler-iron, and that such fraudulent stamping was a penal offense. We regret to say that these frauds are, we believe, still practiced. Though desirous of prosecuting such offenses, no complaints (though many in number) have been made in such form, or the necessary legal evidence furnished, to enable us to prosecute with a reasonable expectation of convicting the parties. It is true that

many complaints and charges of such fraud have been made by persons who suffered, or supposed they had suffered by them; but when requested to put such charges in the form of an affidavit, as a basis of prosecution, they have invariably declined. The reasons assigned for declining have been various, such as that they were in the same trade, or that they were personally acquainted with the parties and on friendly terms, or they disliked the odium that would attach to them as informers, &c.; and it is quite obvious that so long as parties having knowledge of such frauds, and of the persons practicing them, decline to furnish the necessary information, so long will the practice go unchecked. More than one case has occurred where from current rumors, and from information given, there could be no moral doubt of fraud being practiced; but when persons knowing to the facts have been requested to make an affidavit thereto they have declined; and thus these do, and must continue to go "unwhipt of justice," until there be some change in this respect, or accidentally favoring circumstances shall place it in our power to prosecute successfully.

We consider it very important, as an act of justice to all honest manufacturers, dealers, and consumers, that efficient steps be taken to put a stop to these frauds at the earliest moment. There are undoubtedly means by which such information could be obtained, and facts collected, as would form the basis of successful prosecution; but these are beyond our power and control, and therefore we can only hope that when parties most directly affected have suffered "patiently and long," we will have their cheerful coöperation and assistance in awarding the guilty parties that punishment which the law prescribes. The trade-mark and stamp on boiler-iron should be a reliable index and guarantee of its quality, and every attempt at fraud or deception by either manufacturers, dealers, or consumers, should, if possible, be met in such manner as will be an effectual protection against such frauds. These fraudulent stamps have not been confined to iron manufactured in this country, but English iron has been sent into the market, in large quantities, as we have reason to believe, stamped C No. 1, indicating the iron as having been made with charcoal, whereas it is well known that there is but a very small quantity, if any, English iron imported into the country which has been so manufactured. Another form of this fraud, which we have been informed is extensively practiced is, that by an arrangement between the dealer or consumer and the manufacturer, an inferior quality of iron is stamped as superior, and the manufacturer paid a small advance upon the price of the inferior iron for so stamping; but not a price which the superior iron it is represented to be would command in market, thus leaving a large margin for profit to the dealer or consumer. We cannot but reiterate the hope that, by some means, these serious and important frauds may be checked; serious and important not only to the consumers of such iron in the manufacture of boilers, but also to the purchasers of boilers so manufactured, and to all, particularly persons on passenger steamers, whose lives are endangered thereby.

The feature in the rules and regulations for the government of pilots upon the western rivers, introduced at our annual meeting at Louisville, of designating such island chutes as might be run by day or by

night, has operated most favorably; and, by a petition from the pilots asking our further attention to the subject, we have, at our present session, reexamined and revised such list. It is a gratifying evidence of the interest now taken by the licensed officers of steamboats in the success and proper execution of the provisions of the steamboat law, that now, instead of obstacles being thrown in the way of properly carrying out the law, as was formerly too frequently the case, they cheerfully coöperate with us, and aid us by their suggestions and advice in meeting all apparent deficiencies. It is in accordance with suggestions from the pilots that, at our present session, we have revised the list of island chutes; also provided for a uniform system of lights to be carried upon steamers of the western rivers.

By the subjoined statement there is presented, in a tabular form, a view of the extent of the operations of the several local boards; the number of steamers inspected, and their tonnage; the number of pilots and engineers licensed; the number and character of accidents occurring during the past year, in which has been involved the loss of life, &c. Some accidents of minor importance, involving loss of property, but not of life, have, of course, occurred, but these have not been reported except when of serious importance.

Although the hazard by fire in steam navigation is very great, it will be observed by the details given of the accidents occurring from this cause, that these have more frequently occurred when steamers were at their wharves or landings, than when under way; and this would seem to indicate a greater neglect or carelessness on the part of those on board when the steamers are lying at their landings than when running.

The following presents a brief account of the circumstances and results attending the accidents which have occurred in the several districts, as presented by the reports of the several local inspectors, showing, as far as practicable, the causes which have led to the several accidents, and the conclusions which have been deduced from their investigation.

Accidents of minor importance, involving no loss of life, or important loss of property, or which have been of so little consequence that no investigation was instituted, are not noticed in this report.

#### FIRST SUPERVISING DISTRICT.

In this district no very serious accident has occurred since our last annual report. There have been, however, some minor accidents, involving the loss of property, which it may be well to notice, as showing the necessity of compelling sail vessels, by some proper provision of law, to exhibit uniform lights, so that steamers may be made aware as early as possible of the presence and position of such craft, and thereby be afforded time to avoid contact with these vessels, which it is frequently found cannot be accomplished for want of such provision.

The first of these accidents was the sinking of a schooner by collision with the steamer "Eastern Queen," off the coast of Maine. By this accident, one of the hands on the schooner was lost, and the vessel

sunk. The steamer sustained little injury. The cause of the collision was the extreme darkness of the night, and the failure of the schooner to exhibit lights.

On the night of March first last, the steamer "William Jenkins," of Baltimore, came in collision with a schooner in Massachusetts bay, by which accident the schooner was lost. Although in this case it is believed the sail vessel showed a light on deck, and the night was not unusually dark, still the accident was undoubtedly caused by mismanagement on the part of those in command of the sail vessel, for it was observed by persons on the steamer, that after the vessels were fully in sight of each other, and it was perceived by them how the vessels were relatively steering, and that if each had continued on their course the collision would have been avoided; but probably from a misunderstanding on the part of those managing the schooner as to the direction, the steamer steering as indicated by her signal lights, the course of the schooner was so altered as to bring her suddenly across the bow of the steamer, and the schooner immediately sunk, the persons on board being saved by the life-boats of the steamer.

In connection with this accident, we quote from the report of the local inspectors for the district of Boston and Charlestown as follows: "The pilots of this district complain much of the difficulty of avoiding collisions with sailing vessels on account of their not showing proper lights; then, again, the captains of sailing vessels do not understand the system of lights used on steamers; if they did they would always know whether they were in a dangerous or safe position when a steamer was approaching them. Upon inquiry it appears that not one in twenty of the captains of coasting vessels know whether the red signal light of steamers is caused on the *larboard* or *starboard* side, or whether the lights are screened or not. We believe if this class of vessels were informed by circular or otherwise of the exact position of steamers approaching them as indicated by their lights, it would lessen greatly that class of accidents caused by frights and confusion, which is a fruitful source of a collision between sail and steam vessels."

On the 9th of March last the steamer "Empire State" came in collision with a schooner outside of Newport harbor, by which the schooner was sunk. No life lost. In this case the night was quite dark, and the sail vessel was not seen until too late to avoid collision. It is understood to be admitted on the part of those on the schooner that no light was exhibited, and the pilots of the steamer were exonerated.

On the 9th of July last the steamer "Daniel Webster" ran into and sunk a schooner near Monhegan light during a thick fog. The vessels had been in the fog but a short time, and the captain of the schooner freely admitted that before the fog closed in upon them he saw the steamer approaching, and although when afterwards both vessels were enveloped in the fog, he repeatedly heard the steamers whistle, still, he believing she would not come near his vessel, he made no noise or signal by which the steamer might be informed either of his presence or position. The sail vessel under these circumstances was considered wholly at fault.

Several boilers in this district have given way under the hydrostatic test, and generally in parts of the same which could not have been

reached by other means from the nature of their construction, giving ample evidence of the value of this test as an auxiliary in determining the propriety and safety of such boilers to be employed at the working pressure contemplated.

#### SECOND SUPERVISING DISTRICT.

There have occurred in this district, during the past year, accidents to passenger steamers, involving the loss of life or property, as follows: The steam-chimney of the steamer "Alice Price" collapsed; no life was lost, but the engineer on duty was very seriously scalded, and thereby confined to his room and bed a very long time. Upon an investigation by the inspectors, it was found that the chimney had been weakened by rapid oxidation, and the engineer to have been negligent of his duty in not examining the chimney and knowing of its weakened condition; his license was therefore suspended for three months.

The only other accident by steam occurring in this district was the bursting of the boiler of the "Bay State," near the city of New York, on the 4th of July last, just after leaving her wharf for Fall River.

By this accident one passenger and one of the assistant engineers lost their lives. An investigation by the local board at New York was had, and it appears that the boiler had an ample supply of water, and that the pressure of steam, though nearly up to the maximum allowed by certificate, was still within it, and that due prudence and care had been exercised both before and after the accident by the engineers and other officers. This boiler had been proved (and inspected) by the hydrostatic test but about eight months previous to the accident; but such had been the unusual and extraordinary local oxidation and wasting of the material of the boiler, near the locality where it first ruptured, that it had been reduced to about one-half its original thickness; this oxidation was in small spots or places, by no means uniform throughout the plate, and, as far as could be determined, caused by imperfect manufacture of the iron of which the boilers were constructed.

To test whether the other boiler of the "Bay State" had been subjected to the same rapid oxidation and weakening, the supervising inspector of the first district, after the accident named, applied the hydrostatic test, continuing to increase the pressure until the boiler was burst; and it resulted that the pressure at which the boiler gave way was 13 pounds per square inch less than that which it had withstood at the last previous inspection, without giving any evidence of weakness—that is to say, that at the last previous inspections, made about eight months before the accident, the boilers had withstood, without injury, a pressure of 45 pounds per square inch, but when this last test was applied the boiler was burst with a pressure of but 32 pounds per square inch.

This is one of those peculiar phenomena which has fallen under the notice of the inspectors, and which would seem to show that in some cases it becomes a matter of necessity that the application of the hydrostatic test should be made more frequently than once a year.

When this boiler gave way under the hydrostatic test it was burst

in the same locality, and first gave way at almost identically the same spot as in the boiler which had burst under steam pressure.

The extraordinary oxidation of these boilers took place on the inside of the shell of the boilers and in a locality where it could not be detected by examination unless such deterioration had been suspected and holes cut through the shell for the purpose of examination.

The "C. Vanderbilt" was driven ashore in a gale and snow-storm, in January last, whilst on the passage from Stonington to New York. No lives were lost of either passengers or crew, but the vessel remained ashore for several days, and sustained very serious injury. The accident was not caused by any defect of either hull or machinery, but solely by the severity of the gale.

The steamer "Only Son" was wrecked near Sandy Hook, in the month of July last, while engaged in endeavoring to get off a stranded vessel. She was herself driven on shore and a hole knocked in her bottom. No lives were lost by this accident.

Both these vessels have been got afloat and repaired, and are now running.

#### THIRD SUPERVISING DISTRICT.

In this district has occurred during the past year one very serious accident by fire, viz: the burning of the steamer "North Carolina," upon the Chesapeake bay, on the night of the 29th January last, while on her passage from Norfolk to Baltimore.

A very thorough investigation was had, but the origin of the fire could not be particularly ascertained. It was first discovered in the steward's room, and was supposed to have been caused by the carelessness of a colored boy, who was seen to enter that room but a short time previous to the fire breaking out. Immediately upon the alarm being given the boat was stopped, the steam-pump and the fire-engine were put to work by the crew, and the passengers were called from their berths to be prepared to leave the vessel if necessary.

Notwithstanding the efforts made to control the fire, its spread was very rapid, and, in the language of Captain Cannon, "it appeared to jump from place to place like lightning," and it was soon found that all their efforts were unavailing and useless. The attention of the officers was then turned to securing the safety of the passengers. The life-boats were got out, and the passengers passed on board until all were supposed to have left the steamer. The officers then took refuge in one of the boats, and all directed their course to the light-boat on Smith's Point. Having arrived there, the roll was called by the clerk of the steamer, when it was found that one passenger and one of the waiters were missing. It was supposed that they lost their lives either by being smothered in their berths or by drowning in an attempt to escape. The whole of the testimony shows that both officers and crew conducted with a degree of coolness, judgment, and promptitude highly commendable, and it is probably in a great degree attributable to their conduct that there was so little confusion, and that so few lives were lost. Indeed, so admirably was the whole management for the rescue of life conducted that it challenged the admiration of the

passengers, and at a meeting held by them shortly after their escape several resolutions were passed highly complimentary to the officers; in one of which they say that to the officers "we owe a special vote of thanks for their courage, cool judgment, resolute firmness, and indomitable perseverance that enforced discipline among the passengers and crew," &c., &c. It is to be noticed that in this case, in fifteen minutes from the first alarm, all the passengers and crew were in the life-boats, and the lives of all (except the two already mentioned) were saved thereby.

The steamer burned to the water's edge and sunk. Some attempts have been made to raise the wreck, but as yet without success.

On the night of the 8th March last a collision occurred on the Chesapeake bay between the steamships "Baltimore" and "Patapsco," by which the former was sunk. No lives were lost, nor any personal injury sustained by the accident. Upon an examination, held by the local inspectors at Baltimore, it appears that the pilot of the Baltimore must have become confused, as it was evident from the testimony that he had not put his helm to port after giving the signal, as required by the rules for the government of pilots, and it was to this error undoubtedly that the accident was to be attributed. This pilot has always sustained a good character, both private and official; and as the error evidently arose from the confusion of the moment, and not from any recklessness or willfulness, his license was merely suspended for a short time.

The damage to the "Baltimore" was not very great, and she was subsequently raised with little trouble, was repaired, and is now running.

In August last the ocean steamer "Huntsville," on her passage from Savannah to New York, was discovered to be on fire in the freight hold, and she was run into the harbor of Charleston. No lives lost, nor any person injured. The fire was subsequently extinguished, the steamer resumed her voyage to New York, was repaired, and is again running on her route.

An explosion of the boilers of the steamer "John G. Lawton" occurred on the Savannah river on the 9th day of June last. An examination of the case showed that the engineer was absent from his post and at supper, without leaving a competent person in the engine-room; that signals were given by the pilot for the slowing of the engines that were not heeded, or that were improperly answered; that during this time a steamer was approaching, to which the signal for passing was given. Still the engineer was absent from his station. There was no person in the engine-room competent to work, stop, or reverse the engines in case of necessity.

It appears that a signal was given to slow the engine, and that a negro fireman, in attempting to do so in the absence of the engineer, stopped the engine and could not again start it, and it so remained until the engineer came from the supper table. During this time everything was in a quiescent state, and the fires of the boilers in full activity. When the engineer returned, and again set the engine in motion, thus disturbing the quiescent condition of the steam and

water, the explosion immediately followed, and, as the result, four passengers lost their lives, and the steamer was sunk.

The inspectors decided that the accident had been the immediate consequence of the negligence of the engineer; therefore his license was revoked.

Another accident by explosion occurred in this district to a passenger steamer, the license of which had run out and had not been renewed.

The circumstances of this case were as follows: The certificate of the steamer "Major Barnett" expired on the 19th day of July last; a few days previous to which the captain made a written application for its renewal, which was refused on account of the supposed unsafe condition of the boilers; the captain then stated that he would confine his boat to the freight business until he could get new boilers. The steamer continued to run as a freight steamer; and on the 3d day of August following the explosion of her boilers occurred, but without loss of life, although with serious damage to the vessel.

#### FOURTH SUPERVISING DISTRICT.

In this district a most disastrous and melancholy accident occurred, in the explosion of the boilers of the fine steampacket "Princess," on the 27th day of February last, while on her passage between Vicksburg and New Orleans. From the explosion of this boiler (one of a set of six boilers by which the boat was propelled) the boat took fire and was entirely destroyed. The number of lives lost, from the best information that could be obtained, was seventy, including passengers and crew.

The boilers of this steamer were repaired the fall previous to the accident. After which they were inspected and proved by the hydrostatic test to a pressure of 170 pounds per square inch, which they withstood without injury.

From the testimony taken before the local board of inspectors at New Orleans, it appeared that they had, subsequent to the inspection, received serious injury, rendering repairs necessary; which repairs were made by order of the engineer at different periods, but no report was made to the inspectors of this change in the condition of the boilers, as required by law.

It further appeared, in the course of the inquiry and examination, that a large amount of sediment and scale had been allowed to collect in the boilers, and that by reason of such collection the boilers had been injured by burning, so that in many of the seams or laps of the boilers which did not give way there was evidence that they had been much strained at the rivets, and many of the rivet holes were cracked entirely to the edge of the sheet. More particularly was this the case in the seams which came immediately over the fire, at which locality the boiler which burst first gave way. As the result of the investigation, the license of the engineer was revoked by the local board; an appeal was taken to the supervising inspector, who sustained the decision of the local board.

On the 26th March last the steamer "Governor Pease" was burned

on Trinity river. An examination into the accident was had by the inspectors, and it was ascertained that the fire commenced in the cotton, with which the steamer was loaded, and was caused by sparks falling from the chimneys. No lives were lost, and but a small amount of property.

The small steamer "Grape Shot" was wrecked on the 9th of May last in Galveston bay, and subsequently consumed by fire; there was no loss of life, but there was an entire destruction of steamer and cargo.

This disaster was caused by the falling of the chimneys, owing to the heavy sea, which rendered the boat unmanageable, and set fire to the cabin.

The steamer "Ravenswood" was consumed by fire, on the 17th day of August last, while crossing Lake Pontchartrain from Covington to New Orleans. By this disaster one passenger lost his life.

On an investigation by the inspectors it was shown that the fire originated among the wood in the hold, and was caused by the carelessness of the firemen; the steamer was totally destroyed.

The steamer "Josephine Savage" was consumed by fire while on her passage from New Orleans to Nashville.

The origin of the fire could not be discovered; the boat and cargo a total loss, but there was no loss of life.

The steamer "Peter Tellin," whilst on her passage from Louisville to New Orleans, and near Greenville, running in a fog, struck into the bank of the river with such force that she commenced leaking, and sunk in a short time. The boat and cargo lost, but all the passengers and crew were saved.

On the 14th of March last a collision occurred on the Alabama river between the steamers "St. Charles" and "P. F. Kimball." Upon an examination by the inspectors it was shown that the pilot of the "P. F. Kimball" was wholly in fault in not steering as indicated by the signals as made and answered; for which his license was suspended.

In June last one of the cylinders of the steamer "Wm. Bagely" burst while on her passage from New Orleans to Mobile, and the death of the engineer was caused by inhalation of the steam escaping. No satisfactory reason can be assigned for this accident, so unusual in its character, as the steamer had been running for several years, and no indications had been given of any defect in the cylinder; but notwithstanding this fact, no reason can be assigned for the accident other than that there was some latent defect in the casting of the cylinder.

The steamer "Betty Powell," while on her passage from Trinity river to Galveston on the 17th of May last, took fire and was totally destroyed. Upon an examination by the inspectors it was shown that the boat was loaded with cotton, and that the fire originated in the cotton at the after part of the boat; also that the steamer was fully equipped with fire apparatus, but that the crew was too small for a constant and faithful watch, or to use the fire apparatus effectually. The boat and cargo were totally destroyed, but no lives lost.

On the 13th of May last the steamer "Neptune No. 2," one of the Houston mail boats, while lying at Harrisburg, taking in wood and freight, was discovered to be on fire in the hold. Upon opening the

hatches to the hold the smoke and flames burst out with such violence that they were replaced immediately and steam was turned into the hold and the hull scuttled; but it was about three hours before the boat sunk, and there is no doubt that the steam blown into the hold checked and probably extinguished the fire, as otherwise the vessel must have been destroyed long before the expiration of the three hours during which the boat was sinking. Great credit is given by the inspectors to the officers of this steamer for their energy and decision, which probably saved the boat from certain destruction.

No lives were lost by this accident, and the boat has since been raised.

#### SAN FRANCISCO.

In this district a certificate was refused by the inspectors to one steamer, and the certificates of four others were withdrawn; of these latter one was broken up and abandoned, another has had extensive repairs, after which a new certificate was granted; the other two have been laid up since the certificate was withdrawn.

Throughout this district there has been during the past year no loss of life from accident on board any passenger steamer inspected in this district.

#### FIFTH SUPERVISING DISTRICT.

In this district have occurred several disasters by fire, snagging, and foundering, in which no lives were lost, and which may be enumerated as follows:

Five steamers burned while laid up at their landings, the origin of the fire being incendiarism or unknown, and resulting in partial or total loss of the boats; three steamers burned while running or engaged in their regular trade, which resulted in partial or entire loss of the steamers, but with no loss of life.

Twenty-six steamers have been sunk by snags or stress of weather, the accidents causing no loss of life. In several cases the steamers were subsequently raised, repaired, and are again running.

There have also occurred in this district the following disasters involving loss of life, viz: on the 13th October, 1858, the steamer "Titania" collapsed a flue when near White river, by which one fireman was killed.

Upon an examination of the case by the inspectors they decided that the engineer had been guilty of great carelessness and inattention to his duties. They therefore revoked his license.

On the 20th of November last the steamer "F. X. Aubrey" was run upon a wreck in a fog. Upon an investigation it was ascertained that the boat had been running in a slight fog, when suddenly the fog closed down thick. The officers then attempted to make a landing with the boat, and in doing so ran upon a wreck, which caused the steamer to careen so far that the after cross-water connections were separated or broken, giving free escape to the steam and hot water, thereby causing great alarm among those on board. There was no direct loss of life

from the escape of the steam and water, but many of those on board became so much frightened as to jump overboard, and of these six passengers and two of the crew were drowned. As the result of the investigation, the inspectors entirely exonerated the licensed officers from blame, as the disaster was considered purely accidental, and that they had used every effort to guard against fatal results.

The steamer "Comet" was sunk in a storm when near Memphis on the 20th day of February. By this disaster four of the passengers and four of the crew lost their lives.

But by far the most serious disaster which has occurred in this district has been the explosion of the boilers of the steamer "St. Nicholas," on the night of the 24th of April last, when near the mouth of St. Francis river, while on the passage from St. Louis to New Orleans. The boilers of the St. Nicholas were five in number, were built in 1852, and were last inspected about six months prior to the explosion, when they were tested to a pressure of 200 pounds per square inch, which showed no leaks or the evidences of weakness; and at the same time of this inspection everything about the boilers and machinery appeared to be in perfect order.

By this disaster, as near as could be ascertained, forty-five persons (passengers and crew) lost their lives, among whom were the captain, clerk, one pilot, and both engineers. The boat and cargo were a total loss. An examination into the cause was had by the inspectors, but as so many of the officers were killed it was with some difficulty that sufficient testimony of a reliable character was obtained upon which to base a reliable opinion. The testimony mainly relied upon has been that of the two strikers, (or unlicensed assistant engineers,) who are the only witnesses who have been able to give anything like an intelligent and consistent account of the circumstances prior to and attending the disaster. Some portions of the wreck have been found and carefully examined by the inspectors. The sum of the information obtained by the inspectors from all sources was briefly as follows:

The chief engineer had frequently been heard to complain of the water connections between the boilers being too small, and, as a consequence, their frequently getting choked up when the river was muddy; that on the day previous to the boat leaving St. Louis the last time, the boilers were pumped up at about 10 o'clock a. m., and steam was raised about 12 o'clock m. An order was given by the chief engineer to put out the fires, as he had just learned the boat would not leave that day; the fires were put out, but the water was not blown from the boilers; and on the afternoon of the following day steam was again raised with the same water in the boilers, and the boat started for New Orleans. One of the strikers testified that, in his opinion, when steam was raised the last time, the mud on the bottom of the boilers was at least two inches deep, and upon the top of the flues at least one-half an inch deep, as the water was unusually muddy at the St. Louis landing at that time.

The chief engineer stood high in the community in both his professional and his private character; but the inspectors, upon the testimony given, could not but find that he had acted injudiciously in not reporting the difficulty with the water connections to the inspectors,

and having the same remedied without delay: they also consider that in raising steam from muddy water which had been pumped into the boilers the day previous, and allowed to settle and deposit the mud and sand on the bottom, the engineer was guilty of an act of great imprudence, to say the least, and one not to be expected from a competent and judicious engineer.

But for the character of these acts of the engineer he has answered by the loss of his own life in the terrible calamity which followed, and we would, therefore, speak of him with all charity; that though his course in some respects cannot be accounted for, when his high character and good standing as an engineer are taken into account, still we may be permitted to hope and believe that motives did influence his course which were satisfactory to him, though the evidence adduced did not discover them to the inspectors, and therefore, simply from the evidence brought before them, they could not do otherwise than come to the conclusion that the cause of the disaster was an imprudent course and neglect of proper supervision and care on the part of the chief engineer.

#### SIXTH SUPERVISING DISTRICT.

In this district there has been no loss of life during the past year upon any passenger steamer inspected under the law of August 30, 1852. There has, however, been the following accidents, involving the loss of property:

A collision occurred on the 21st of January last between the steamers "Delegate" and "Ella," on the Ohio river, near West Franklin, Indiana, by which the "Delegate" was sunk, and property lost to the amount of about \$15,000. No lives, however, were lost. Upon an investigation by the inspectors it was found that the collision had been caused by the neglect or carelessness of the pilot of the "Delegate" in not steering in accordance with the signals given and answered, for which offense his license was suspended for four months.

One steamer has been lost by fire, viz: the steamer "Quaker City" was burnt at Nashville, while lying at the wharf. The origin of the fire could not be ascertained. There was no loss of life.

#### SEVENTH SUPERVISING DISTRICT.

During the last year the following disasters have occurred in this district: The steamer "Fulton City" was snagged and sunk in November last at Buffington's island, in the district of Wheeling. The case was investigated by the local board at Pittsburg. By the testimony taken the inspectors show that the boat, in passing the foot of Buffington's island, about 2 o'clock in the morning, struck a log lying near the channel, by which the hull of the boat was so badly broken as to cause her to sink in a few minutes.

By this disaster five lives were lost—four deck passengers and one deck hand. These persons were sleeping on deck, but so sudden was the sinking of the boat that the persons sent aft to awaken them were unable to reach that part of the boat, and were compelled to seek their

own safety by climbing the stanchions to the hurricane deck, as did also the engineer, who was on watch at the engines. This boat had ample stairways aft, from the lower to the upper deck, but the sinking was so rapid that no one could avail himself of that means of escape—not even the engineer, who was in close proximity to them, and perfectly cool in all his movements. The mate of the boat saved the lives of three passengers by means of the life-boat, which being on the hurricane deck was easily launched and brought into use. The yawl was sunk with the steamer, being caught under the guards as she went down. As the result of this investigation, the board was fully satisfied that this was one of those unfortunate cases incidental and peculiar to the navigation of the western rivers, and that no blame could be attributed to carelessness or unskillful management of any of the licensed officers having charge of the vessel.

On the night of the 3d of January last, the steamer "Madison," bound from New Orleans to Cincinnati, came in collision with the steamer "Iowa," when opposite Aurora, Indiana, by which the "Madison" was sunk. No lives lost.

The Madison was afterwards raised and repaired at a cost of about six thousand dollars. The local board at Cincinnati investigated this case and found the facts to be substantially as follows: When the boats came in sight of each other, the usual signals for meeting and passing were properly made. As the boats neared each other, the captain of the "Madison" became alarmed, fearing a collision, and directed the pilot at the wheel to stop the engines and reverse them. The larboard engine, which was attended by the second engineer, was stopped and reversed, but the starboard engine, which was attended by an inexperienced young man, who was acting as assistant or striker, was not stopped, but kept going ahead, which had the effect to throw the "Madison" directly across the bow of the "Iowa," and notwithstanding the officers of the latter boat did all in their power to prevent it, a collision was inevitable.

The local board, after taking a mass of testimony in this case, and obtaining the facts as to the working of the engines immediately preceding the collision, assumed that the pilot of the "Madison" had made a mistake in ringing of the bells of the engine, and in his absence from the investigation, they rendered a verdict against him, suspending his license for the term of six months. Upon an appeal he brought testimony of such a direct and positive character that he did ring the bells in a proper manner, and that the mistake or neglect was on the part of the persons working the engines, as left no doubt on the mind of the supervising inspector that the verdict of the local board was an injustice to him, and accordingly his license was restored. And in this decision the local board afterwards coincided with the supervising inspector.

The steamers "David Gibson" and "Nathaniel Holmes" came in collision on the Ohio river, near Petersburg, about 8 o'clock on the night of the 28th March last, by which both boats were immediately sunk, and, together with their cargoes, proved a total loss.

By this sad calamity, as near as could be ascertained, from thirty-five to fifty lives were lost, including passengers and crew.

This case was very thoroughly investigated by the local board at Cincinnati, and resulted in eliciting the following facts in relation to the disaster:

The "Nathaniel Holmes" was on her voyage from Pittsburg to St. Louis, heavily loaded, with a large number of emigrants on board. The "David Gibson" was going to Cincinnati from New Orleans, also heavily loaded with sugar and molasses. The river was high, there being some twenty-five feet in the channel. The night set in dark and stormy with the wind blowing up the river. The pilot of the "Holmes" saw the lights of the "Gibson" when a mile or more distant; when the boats had approached within about half a mile of each other, and no signal being received from the "Gibson," he stopped his engines and floated, keeping his boat about the middle of the river. Still receiving no signal, after a short time he gave one blast on his steam whistle, as the signal for passing to the right; this was answered by the "Gibson," but instead of obeying the signal, the "Gibson's" head was contrary to the signal given and answered, sheered to the left or larboard side of the "Holmes," which brought the boats immediately in contact. There were but few passengers on board the "Gibson," mostly females, none of whom were lost.

The captain of the "Gibson" was acting in the capacity of both master and pilot, and in both these capacities it was his watch either on deck or in the pilot-house at the time the collision took place. He was, however, at neither of these stations. The man at the wheel of the "Gibson" rated himself as a steersman or assistant pilot, and was employed as such at that time, as well as having been so employed during the trip previous. The wind was blowing the smoke ahead of the "Gibson" in such a manner as to prevent the man at the wheel from seeing the approaching boat, and there was no watch or lookout on deck to give him warning, and the "Holmes" was not seen by him until after the signal for passing was made, and immediately before the boats came together, when, in his confusion, he turned his wheel in the opposite direction to that required by the signal.

The "Holmes" went down almost instantly, carrying with her the greater part of the deck passengers, and also the engineer, who was on duty. The cabin broke loose from the hull of the boat and floated down the river, and the lives of a large number of passengers and crew were saved thereby. The cabin was finally met by a steamboat and towed to shore.

The "Gibson" sunk before she could be run to the shore. Her cabin also floated off from the hull, and was the means of saving all the passengers and all the crew, with the exception of the steward and two or three firemen, who were lost. The pilot's license held by the captain of the "Gibson" has been revoked, and he was reported by the supervising inspector to the United States attorney for the district of Indiana for violation of section 12 of the steamboat act of 1838. The United States attorney brought the matter in due form before the grand jury at Indianapolis at their session in May last, and a bill was found against the captain for manslaughter. His trial has not yet taken place.

A collision occurred in July last between the steamers "Messenger"

and "Glenwood," some thirty miles above Cincinnati, by which each boat sustained damage to the amount of one or two hundred dollars. No lives lost.

The case was investigated at Cincinnati. The evidence shows that both pilots neglected to comply with the pilot rules in not making the signals for meeting and passing in proper time. The penalty of thirty dollars has been voluntarily paid by one of the pilots; the other will be prosecuted if the fine is not paid soon.

Twelve boats were burnt at the wharf at Pittsburg, ten of which were burnt at midday on the 7th of May, and two others on the night of the 14th of June. Some of these boats were lying up repairing, and others taking in freight for ports below. The fire in each case originated on boats lying up, and supposed to have been the work of incendiarism.

#### EIGHTH SUPERVISING DISTRICT.

But one accident has occurred to passenger steamers in this district during the past year involving loss of life, viz:

The steamer "Æolian," in attempting to pass through an opening in the ice of Lake Pepin, on the 22d April last, when about five miles from Lake City, the opening of the ice closed together, completely crushing the boat and causing her to sink in about three minutes; by this very unusual and novel accident four of the passengers lost their lives.

The steamer "Fred Lorenz," while on her downward passage, and about five miles above Dubuque, on the morning of the 15th of May last, broke her main steampipe, and four persons were slightly scalded by the escaping steam.

The propeller steamer "Manhattan," foundered on Lake Superior while attempting to make the harbor of Grandmaw in a severe gale, about the first September last; the passengers and crew were all saved, but steamer and cargo a total loss.

#### NINTH SUPERVISING DISTRICT.

In this district there has occurred during the year terminating September 30th last one accident involving loss of life, viz:

The propeller steamer "Lady of the Lake," on the 26th March last, while on her passage from Cleveland, Ohio, to Dunkirk, New York, exploded her boiler, by which accident two lives were lost, viz: the cook and one deck hand.

An investigation was had by the inspectors, and it appeared from the statement made by the engineer under oath, that he tried the water in the boilers about five minutes before the explosion and found it at the usual height, and that at the same time the pressure of steam was but 60 pounds per square inch, while the maximum allowed by the certificate was 80 pounds per square inch, and frequently 70 and 75 pounds had been carried in the ordinary running; also, that the feed pumps were in good order and working well.

Previous to the explosion everything about the engine and boiler

appeared to be working in the usual manner, nor did anything occur indicating that anything was wrong or to give any alarm or notice of danger. On the 8th of April, previous to the accident, the boiler had been submitted by the inspectors to a hydrostatic test of 120 pounds per square inch, and under this pressure there were no indications of weakness; but, on the contrary, the boiler appeared to be strong and in good condition.

From all the testimony that could be gathered of the circumstances attending the accident, and of facts having a bearing thereon, the inspectors were entirely unable to arrive at any conclusion as to the cause of the explosion which would, in a satisfactory degree, conform to the facts and the testimony, and, therefore, considering that the cause could not be explained in a satisfactory manner, they made no decision in the case. The steamer and cargo were nearly a total loss.

On the 2d of October, 1858, the propeller steamer "Illinois" came in collision with the schooner "Roscoe," and upon an examination by the inspectors, it was ascertained that the fault was entirely with the officers of the schooner, and that no blame could attach to the licensed officers of the steamer. No lives were lost of either passengers or crew.

By an examination of the accompanying tabular statement it will be observed that the total loss of life on passenger steamers during the past year falls much below that of former years. The great loss has been by explosion upon the "Princess" and "St. Nicholas," and the collision case of the "David Gibson" and "Nathaniel Holmes." By these three disasters alone the loss of life was *one hundred and sixty-five* persons, being about *four-fifths* of the total loss throughout the whole country. In some of the districts no loss of life on any inspected steamer has occurred.

Of the accidents by fire the most serious and important, as well as the greater number, have occurred to steamers when lying at the landing, and therefore can scarcely be considered as under the full provision of the law at the time.

We desire again to call attention to the number of accidents arising from collision with sailing vessels, and the necessity of some legislation by Congress, the object of which would be to reduce the number of such accidents. In regard to this subject, we would respectfully refer to our former reports as setting forth more fully our views. The evidence which is being constantly brought to the notice of this board by the reports of the local inspectors, and by their own observation, of the great security resulting from the preventive measures, and guarantee against the weakness of boilers, whether in whole or in part, for the pressure intended to be carried, secured by the hydrostatic test provided by law, is such as must satisfy the most sceptical of the beneficial effect of this provision of the law at least. Among the many instances which have occurred during the past year may be mentioned the following:

In the second supervising district one of the flues of a low pressure boiler collapsed when the pressure was but three or four pounds above the pressure of steam allowed to be carried.

In the fifth supervising district several cases in which, upon the boilers being submitted to the hydrostatic test, the flues have been

collapsed or the boilers have given way in other places. Any of these ruptures occurring under a head of steam would undoubtedly have caused serious and most probably fatal disasters.

In the eighth supervising district a boiler ruptured upon being submitted to the hydrostatic test, and it was found on examination that at one part of the shell it had become much weakened by corrosion, and in another case in the same district the furnace of the boiler was collapsed in consequence of the corrosion of the braces having reduced the strength.

In the ninth district a boiler submitted to the hydrostatic test gave way at a pressure twenty-five pounds below that to which the boiler was intended to be submitted, but was subsequently repaired and withstood the required pressure. A boiler in another case submitted to the hydrostatic test was ruptured, and upon examination it was found that one of the sheets of the shell was cracked throughout its whole width.

Many cases of infraction of the law have been prosecuted, some of which are now pending in nearly all the districts, but the proverbial "law's delay" is as correct in its application to the law under which we act as in any other branch of legal practice. This delay is sometimes produced by one cause and sometimes by another. Still, as a general thing, though "slow it is sure," and many cases have been prosecuted to conviction and sentence.

In the fifth district several convictions have been obtained, and in one case the person so convicted is now serving out the term of his sentence in the penitentiary.

In the seventh district an engineer was prosecuted in the district court for overloading his safety valves and fastening down his safety guard so as to be enabled to carry a greater pressure of steam on the boilers than allowed by the inspector's certificate. As an excuse for his course he alleged that the alloy fused at a less pressure than allowed by the certificate. To test the truth of this allegation, the alloy was taken from the guards and tested by Professor Booth, the metallurgist at the United States Mint at Philadelphia, and was found to fuse at very nearly the temperature for which it was originally prepared; by this test the engineer's excuse was found to have no foundation in fact, and he was declared guilty of the offense charged. He subsequently plead guilty to the charge, and paid the fine provided by law. Many other cases are pending in the courts, but their progress and the time when decisions may be obtained depends mainly upon the legal officers of the government and upon the amount of business that is upon their hands.

In some cases, we regret to say, the legal officers are not so prompt to prosecute and push forward cases placed in their hands as we could desire. As, in our opinion, a sentence, to produce its full, legitimate, and proper effect, should be "obtained speedily." In closing, we would remark, that, in our opinion, the objects proposed to be attained by the enactment of the present steamboat law, have been realized to a much larger extent than its most sanguine friends could have hoped, and has proved, beyond cavil, an enactment highly beneficial in its opera-

tions, and protecting life and property of the whole traveling and commercial community.

It should, however, be no matter of surprise or astonishment that a law of such a character, and devised almost without precedent or experience to guide its framers, should fall short in some respects of the needful provisions or powers that the public may realize its full benefits.

It is our opinion that the law does thus fall short in some respects; that in others changes and amendments may be made which would add much to the strength and beneficial operation of the whole.

We have given our views in former reports, and in an amendatory bill recommended by us, with the reasons assigned for each particular change, addition, or alteration. And we would respectfully refer to such reports and to such amendatory bill for more full and clear exposition of our opinions in this regard.

We may be further permitted to express the hope that the time is not far distant when our views, as thus expressed, will receive a fair and full consideration, and the steamboat law be so altered and strengthened as to enter anew upon its beneficent mission, upon the attainment of the results for which it was designed by its original framers.

All of which is respectfully submitted.

By order of the board.

JOHN S. BROWN,

*Secretary Board of Supervising Inspectors.*

Hon. HOWELL COBB,

*Secretary of the Treasury, Washington, D. C.*

---

No. 16.

TREASURY DEPARTMENT,

*Office Light-house Board, October 25, 1859.*

SIR: The Light-house Board has the honor to submit to you the following report of the condition of the light-house establishment of the United States, and of its operations for the fiscal year ending on the 30th June, 1859.

The number of light-houses and lighted beacons in the United States, is 420; the number of light-vessels, including five relief vessels, is 53; the number of day beacons and buoys, including duplicates, is in round numbers, 4,500. There are twenty-one light-house and buoy tenders, and two supply vessels. The total number of light-house keepers and their assistants, is 575, and there are employed on board the light-vessels, buoy tenders, and supply vessels, including masters and mates, a total of 522 seamen.

The various duties of the personnel of the establishment have been performed generally to the satisfaction of the board, and the best evidence that can be offered of the efficiency of the service is, that, so far as the board is informed, no marine disaster has occurred during the past year, which is attributable to the want of a light at a proper

time and place, or to the want of any other aid to navigation, which it was within the power of the board to supply.

Several members of the board have made special visits to particular points of the Atlantic and Gulf coasts in furtherance of the business of the board, and the inspectors have been diligent in visiting every portion of their respective districts, as frequently as was practicable. During these visits, especial attention was given to the correction of such abuses or delinquencies as were detected on the part of any employé of the establishment. Negligence on the part of keepers has frequently been visited by you, on the recommendation of this board, with the extreme penalty of dismissal from office, and the consequence has been an increased vigilance and attention to duty.

Several new light-houses have been constructed and put in operation during the past year, as will more fully appear when the board comes to speak of the operations in each district, under its appropriate head, and it affords the board pleasure to state that some of these lights will compare favorably with similar lights in any part of the world. In particular, the first order lights erected at Mobile, Alabama, Pensacola, Florida; Hunting Island, South Carolina; Barnegat, on the coast of New Jersey; Gay Head, on the coast of Massachusetts; and Seguin, on the coast of Maine, are represented to be very brilliant and powerful.

On the northwestern lakes many light-houses have been erected at the extremities of piers, which were originally constructed as harbor improvements. In all these cases the light-houses are necessarily subordinate to the piers, and are dependent on them. But the light-houses have been preserved and kept in good repair, while their foundations, the harbor piers, have been allowed to go to decay. If the light-houses are to be kept up, the piers must be repaired, but the light-house establishment has not the funds, nor is it its province to make these repairs. If the piers are not kept up, the light-houses must be discontinued when their foundations become too weak to support them. Several cases of this kind will doubtless occur in a few years, or perhaps sooner.

In some instances appropriations have been made for the repairs of these piers as light-house works. But it is respectfully submitted that these appropriations inflict a serious burden upon the light-house establishment, and eventually the effect may be to make it the custodian of a class of works not constructed by it, and of which it should be only the follower.

The board states these facts for the information of the department, hoping that the attention of the proper branch of the government may be given to the subject.

The operations in the construction of the Minot's Ledge light-house, on the coast of Massachusetts, the most important light-house work that has been undertaken since the organization of the Light-house Board, and the execution of which is as difficult as that of any other similar work in the world, have been exceedingly successful during the past season.

From the close of the working season of 1858, the work was necessarily exposed to the storms of the past winter. Although entirely unprotected the masonry was not affected.

When work on the tower was commenced in the spring (April 25) there were six courses laid. By the 9th of August thirty-two courses were laid, and the tower was raised to a height of sixty-four feet above the rock, or sixty-two feet above low-water mark.

There is no doubt of the completion of the work (unless some unforeseen accident occurs) within the estimate approved by Congress, and the unappropriated balance of that estimate has been asked for in the general estimates.

The light-house at Assateague, on the coast of Virginia, has been represented to the board as inefficient. The present state of the structure and illuminating apparatus will not admit of any greater efficiency. The dangerous Black Fish and Winter Quarter shoals extend fourteen miles seaward from Assateague, and the existing light does not show outside of them.

It is respectfully recommended that this light be replaced by a first order light-house, 150 feet high, to be constructed of brick. The cost of such a structure will be \$50,000.

The light-house at the mouth of Cape Fear river is entirely worn out, and is not on the proper site. The renovation is recommended. The existing light does not show as far as the outer edge of the Frying Pan shoals, off the mouth of the river. To replace the present structure by another efficient one, showing a light twenty miles seaward, will require \$40,000.

The towers at Whitefish Point, Detour, and Manitou island, all on the coast of Lake Superior, require to be rebuilt. To do this properly will require the sum of \$45,000; and it is respectfully recommended that this sum be asked of Congress for rebuilding them. The general appropriations for repairs of all the light-houses (\$115,000 estimated) is by no means large enough to bear the burden of so great an outlay in one district.

On account of the short working season on the northwestern lakes, and the inaccessibility of many of the light-house stations, it is the most expensive of all the districts, except the twelfth, (Pacific coast.) Still it is slowly getting renovated, and the board hopes and expects that the work of the next season will leave but little more to be done in light-house expenditures on the northwestern lakes, provided the appropriation above recommended be made.

The labor proposed to itself by this board upon its first organization of changing the mode of illumination, then practiced by the substitution of the Fresnel lens for the parabolic reflectors, has been nearly accomplished, and there now remain only two light stations at which the lens is not used.

These are Cape Ann, in Massachusetts, and Cape Canaveral, in Florida, and at these stations the lens will be introduced so soon as the towers, now undergoing construction or renovation, shall be completed.

All the light-vessels that required it have been thoroughly overhauled and repaired, and they are now in excellent condition for winter service.

Upon cutting into the light-ship of Rattlesnake Shoals, South Carolina, with a view to repairs, she was found to be nearly destroyed by

rot. She was consequently broken up and sold, and the steamer Arctic, which had originally been built for a light-vessel, was purchased of the Navy Department to supply her place. The Arctic is now being repaired and refitted at Norfolk, Virginia, and will be ready in the course of a few weeks to proceed to her station.

The light-vessel removed from the Ocracoke inlet, in North Carolina, under the operation of the 3d section of the act of Congress approved March 3, 1859, is being repaired and refitted for use as a relief vessel for the waters of Pamlico sound, and the vessel removed from the Nine-foot shoal, in the same waters, under the operation of the same act, has been transferred to the Potomac river to take the place of the Upper Cedar Point light-vessel nearly worn out.

There being no less than eight light-vessels stationed off the coast of Massachusetts alone, many of them in exposed situations, and all of them requiring frequent overhauling and repairs, it was deemed a measure of economy to lease a yard for this purpose, which has accordingly been done at New Bedford, Massachusetts. This port is also the rendezvous of the supply vessels and the headquarters of supply, it being one of the chief oil depots in the United States.

Several expensive bell-boats, which were provided in execution of former acts of Congress, have been run into and sunk, or have broken adrift from their stations during the year, and consequently the board doubts the policy of renewing this description of beacon to any great extent. A few bell-buoys, of simpler construction and less cost, might perhaps be placed to advantage in particular localities; but the more efficient ear-signal would be the air-whistle, in imitation of the ordinary steam-whistle of the locomotive.

During the prevalence of the dense and extensive fogs that visit, by turns, every portion of our coast, an ear-signal of some kind is almost as necessary to navigation as a light-house. It is, therefore, recommended that a few of these signals be placed, experimentally, at prominent points along the coast; as, for instance, at West Quoddy Head and Boone island, Maine; Boston, Massachusetts; Sandy Hook, New York; Charleston, South Carolina; Savannah, Georgia; and Southwest Pass of the Mississippi river.

The buoyage of the bars and channels has received the particular attention of the board, and large editions of the buoy lists of the several districts have been printed and distributed to the commercial and shipping communities.

There is now, it is believed, a complete system of buoyage along the whole extent of the coast of the United States, the shores of California, Oregon, and Washinton having been buoyed during the past year. The mouths of the Columbia river, almost inaccessible heretofore, are now comparatively easy of access. The entrances to harbors and channels in sounds and rivers, to a certain extent, should no doubt be buoyed; but beyond this, viz: to dangers on the open coast, the board would not recommend the system to be extended. These dangers are all marked on the charts, and seamen take cognizance of them as of any other sea peril. Nor would the buoyage of such dangers remedy the evil. The buoy is at best only a day-mark, and during the night

the mariner would remain unwarned. Such a system, too, would be attended with a very heavy expense, as neither bell-boat nor buoy could be expected to stand long in situations so exposed.

The board has had frequent applications during the past year to extend its buoy system to waters not hitherto buoyed. These applications have been uniformly resisted, on the ground of a want of power, the board understanding its duties to be confined to the maintenance and keeping in repair of such lights and other aids to navigation as are or may be from time to time established by Congress. Nor can any inconvenience other than of a temporary nature result from this want of power on the part of the board, as Congress meets annually, and can thus, at short intervals, provide for such new buoyage as may be required by the wants of commerce. On the other hand, unless some power of restriction be conferred upon the board, it is to be apprehended that an undue extension will be given to the system. To guard against this, the board would respectfully recommend that hereafter no buoys or day-marks be placed in new waters without your sanction, based upon the recommendation of the Light-house Board. Similar power, with reference to new light-houses, was conferred on you by the last Congress, and the restriction has, it is believed, worked very beneficially.

The buoyage of the coast, from the frequent and unavoidable loss of material, is an expensive branch of the light-house establishment, and efforts are being made to substitute, as far as practicable, fixed for floating beacons. On the rocks bounding the eastern coast, and on the sand bars of the southern coast, considerable progress has been made in erecting spindles and tripods to take the place of buoys. The first cost of these beacons is much less than that of an iron buoy of the smallest class; they are visible from a much greater distance, and when once put down they will last for years, without care or renewal, thus enabling us to dispense entirely with the buoy and its mooring, its paint and its handling.

There have been manufactured during the past year, at the navy yard in this city, 148 iron nun and can buoys of different classes; and it is believed that there is now on hand at the several depots an ample supply to meet all contingencies for the next fiscal year.

The duty of attending upon buoys is mainly performed by twenty-one light-house and buoy tenders, manned by two hundred seamen. This fleet of tenders is composed entirely of sail vessels, with a single exception, that of the steamer Shubrick, employed on the Pacific coast. Great inconvenience, and, it is believed, an unduly large expenditure, results in some of the districts from this employment of sails instead of steam. The eleventh district, embracing the waters of Lakes St. Clair, Huron, Michigan, and Superior, and Green Bay, and their tributaries, is too extensive to be visited as often as is desirable without the aid of a steam tender. The sail vessel now employed in that district is constantly engaged, during the short season of navigation, in delivering supplies to the light-houses, and is therefore unavailable, if she were suitable, for inspection purposes. The consequence is, that the inspector is obliged to depend upon passenger steamers and railways as his chief means of transportation. But these, in but very few

instances, carry him directly to a light-house, and he is consequently obliged to reach his destination from the point of deviation at a much increased expense and a great loss of time. A small propeller would answer the purposes both of visit and supply, and the increased expense of her maintenance, over that of the sail tender, would be amply compensated by the increased facilities of visit, and the prompt relief that might be carried to any given quarter in case of disaster. Personal visit and inspection being by far the most efficient means the board has at command to enforce due subordination and attention to their duties on the part of light-keepers, the change would seem to be a very beneficial one.

In the first district, comprising the rock-bound and dangerous coast of Maine, and a part of the coast of New Hampshire, there are two tenders employed. These vessels are frequently delayed by fogs and head winds and strong adverse tides; and the duties of the district tax their energies to the utmost during the short time they are permitted to work. One propeller could easily perform all the labor now performed by these two sail vessels, and afford the inspector, besides, increased facilities of visit. The cost of her maintenance would not exceed that of the sail vessels.

In the second district, extending from Hampton harbor, in New Hampshire, to Gooseberry Point, in Massachusetts, the board finds it necessary to employ three tenders. This increased force is rendered necessary to look after the great number of light-vessels in these waters, and to handle the large buoyage of the coast. A single propeller in this district could perform all the duties now performed by the three sail vessels, and her maintenance would be much less expensive.

Three tenders each are employed also in the fifth and sixth districts, extending, respectively, from Metomkin inlet, Virginia, to New River inlet, North Carolina, and from the latter inlet to Cape Canaveral, Florida. One propeller in each of these districts would much more effectually perform the duties, and could, as in the second district, be maintained at less cost than the sail vessels.

During the year a new supply vessel, to replace the "Howell Cobb," which was wrecked on the Bahamas, has been purchased and equipped. She was employed during the past spring and summer in supplying the light-houses on the Atlantic coast, but her services not being required for the coming winter, she has been laid up in New Bedford, and her crew discharged.

Congress at its last session having empowered the department, upon the recommendation of the Light-house Board, "to discontinue from time to time such lights as may become useless by reason of mutations of commerce and changes of channels of harbors, and other causes," the following lights have been dispensed with, viz: St. Croix River, Prospect Harbor, Beauchamp Point, Kennebunk Pier, Maine; Point Gammon and Holmes' Hole, in Massachusetts; New Haven Long Wharf, in Connecticut; Prymer Hook, Cattskill Reach, Barcelona, Salmon River, and Cattaraugus, in New York; Tucker's Beach, in New Jersey; Mispillion, Delaware; Smith's Point, Virginia; Ocracoke Channel and Nine-foot Shoal light-vessels and Beacon Island light-house, in North Carolina; Mount Pleasant, in South Carolina; Port Clinton, Ohio;

Clinton River, New Buffalo, Round Island, and Rock Harbor, in Michigan; Chicago, Taylorsport, Port Clinton, Illinois; South Beacon, Milwaukee, Twin Rivers, Menasha, Wisconsin; Shoalwater Bay, Washington Territory; Barrataria Bay, Louisiana; and Corpus Christi, in Texas.

The light-house property has been removed from these dismantled lights, and the late keepers have been permitted to occupy some of them, free of rent, on condition of protecting and preserving the premises. Where tenants could not be procured on those terms, the houses and towers have been closed and abandoned.

Besides the two light-vessels, discontinued as aforesaid, there have been two other light-vessels removed from the waters of Louisiana, viz: Ship Shoal and Atchafalaya Bay, under the acts of Congress of May 4, 1854, and August 18, 1856, providing for their substitution by light-houses, which have been completed.

The board hopes to be able soon to remove in like manner the Craney island light-vessel in the waters of Virginia, the screw-pile light-house intended to supersede her being nearly completed. This substitution of a light-house for a light-vessel has been made under the 2d section of the act of Congress, approved March 3, 1859, giving a general power of substitution to the board. The cost of maintaining a light-house being only about one-third that of maintaining a light-vessel, the board will continue to supplant the latter by the former as fast and whenever it may be practicable.

There are, doubtless, other lights, besides those which you have extinguished upon the recommendation of this board, that might be dispensed with without detriment to commerce, especially in the inland waters, and at small and unimportant harbors. But the board, desiring to proceed with great caution in the performance of so delicate a duty, has preferred to await further investigation before indicating them.

With this brief review of its operations during the past year, the board will now proceed to lay before you in detail an account of the renovations and repairs that have been made in the several districts.

#### FIRST LIGHT-HOUSE DISTRICT.

In the first light-house district, extending from the eastern boundary of the United States to Hampton harbor, New Hampshire, all the buoys are in good order. New ones have been placed on Bibb Rock, Triangle ledge, off York, South Breaker, Negro Island and Ram Island ledges, Griffith's ledge, Egg Rock and Seal Rock, Conway's and Mahoney's ledges, and on Nora's Rock.

Of the three bell-buoys in this district, that on Boone Island ledge has been recently sunk by being run into, as is supposed. Efforts will be made to recover her. The one on South Breaker went ashore in October last, and became a total wreck. The one on Alden's Rock is still at her station.

The stone beacons on the Middle Ground, in Castine harbor, and Steele's ledge, Belfast, carried away by ice, have been rebuilt in the most substantial manner.

Important repairs have been made at Isle of Shoals, Goat Island, and Cape Elizabeth, and lenses have been placed in them. Cape Porpoise light-house has been rebuilt. Repairs have also been made at Whalesback, Portsmouth, Heron's Neck, and Little River light-houses.

The tenders, "Vigilant" and "Franklin Pierce," have been put in complete order, the latter having been nearly entirely rebuilt.

#### SECOND LIGHT-HOUSE DISTRICT.

In the second light-house district, extending from Hampton harbor, New Hampshire, to Gooseberry inlet, Massachusetts, repairs have been made at Egg Rock, Newburyport, Race Point, (bell machinery,) Bishop and Clerk's, Cape Poge, and West Chop light-houses.

Boston light-house station has been completely renovated. The tower has been lined with brick, a second-order lens has been placed, and a new keeper's dwelling has been erected.

The light-vessels are in a state of efficiency and good repair. The Shovelful Shoals and Cross Rip light-vessels have been thoroughly overhauled, and the necessary wants of all the others supplied.

The beaconage and buoyage of this district are complete. New buoys have been lately placed on Packet Rock, off New Bedford, on a single rock in Hyannis harbor, and on a wreck in Holmes' Hole harbor.

The three bell-buoy boats in this district have been thoroughly repaired, and are now in perfect order.

#### THIRD LIGHT-HOUSE DISTRICT.

In the third light-house district, extending from Gooseberry inlet, Massachusetts, to Squam inlet, New Jersey, embracing the coasts of Long Island, and Long Island sound, and Hudson river, and Lake Champlain, but little has been done in making important repairs of light-houses, as little was needed.

Bergen Point and Passaic light-houses have been completed and the lights exhibited.

The light-house at Crown Point, Lake Champlain, has been completed and lighted.

Stratford Point light-house has been repaired, and a lens apparatus placed on the tower.

Norwalk Island beacon has been repaired.

Saybrook light-house grounds have been graded and paved.

Gull Island light-house has been fitted with a 3d-order lantern and lens.

A new beacon has been erected on Mill reef, in Kill Van Kuhl.

The buoyage of the district has been kept in good order.

#### FOURTH LIGHT-HOUSE DISTRICT.

In the fourth light-house district, extending from Squam inlet, New Jersey, to Metomkin inlet, Virginia, the new towers at Barnegat, Cape

May, and Fenwick's island have been completed. The first was lighted on 1st January last; Fenwick's island was lighted on 1st August last; and Cape May will be lighted on the 31st October next.

The light-houses in this district are nearly all in good condition. That at Mahon's river has been condemned, and preparatory steps have been taken to rebuild it. It is deemed safe, however, for the coming winter.

The light-vessels and the relief light-vessel have been overhauled, and are now in good condition,

The tenders "Spray" and "Jasper" and the supply vessel "Pharos" have been repaired at Philadelphia and put in complete order.

The buoys in Delaware bay and river are in good condition. At Barnegat, Great Egg Harbor, Little Egg Harbor, and Absecum inlets, the channels having shifted to the northward, the buoys have recently been shifted to conform to them.

#### FIFTH LIGHT-HOUSE DISTRICT.

In the fifth light-house district, extending from Metomkin inlet, Virginia, to New River inlet, North Carolina, the general condition of the light-houses is good; some slight repairs, however, are yet needed.

The title to the proposed light-house site at Pungoteague has not yet been completed.

The new screw-pile light-houses at Cherrystone and Stingray Point have been completed, and the lights were exhibited on 1st January last.

The new light-house at Cape Lookout, North Carolina, has been completed, and it was lighted November 1, 1859. The work on the new tower at Cape Charles is progressing. A new tower has been erected at Body's island, and a 3d-order lens placed. The light was exhibited on 1st July last.

Borings have been made at the stations of the several light-vessels in Virginia and North Carolina, with a view to the substitution of screw-pile light-houses for the light-vessels. The changes will be made as rapidly as the appropriations for the support of the light-vessel service will admit.

The general condition of the light-vessels in the district is not so good as it should be. Several of them are old and in a state of rapid decay. The Wolf Trap and Windmill Point vessels have been repaired.

The buoyage of the district has been well attended to. New buoys have been placed at Scuppernong river, North Carolina, and over the wreck of the steamer North Carolina.

The beacon at Day Point, in James river, which had been carried away by the ice, has been replaced.

#### SIXTH LIGHT-HOUSE DISTRICT.

In the sixth light-house district, extending from New River inlet, North Carolina, to Mosquito inlet, Florida, all the lights are burning well.

Three new lights have been erected and lighted, viz: at Cape Look-out, North Carolina, Hunting island, South Carolina, and St. John's river, Florida.

The light stations in this district are generally in good order, yet a few slight repairs are needed to some of them.

The sites for the three new lights on St. John's river have been selected, but the title has not yet been made to the United States.

The light-vessels are in good order, except the Frying Pan Shoals and St. Helena light-vessels, which require some repairs.

The buoyage of the district is rapidly progressing, and will be completed before the end of the present quarter.

Of the three bell-boats moored at Savannah bar, Doboy, and St. John's, the first parted her cable in June last, and was blown to sea; she was towed into Little Tybee. The St. John's bell-boat about the same time was discovered to be in a sinking condition, and was towed into port; she is now at Mayport Mills. Both of these require considerable repairs. The third boat, at Doboy, is in good order.

About one-third of the day-marks put upon the inland rivers were blown down in the gales of September, 1858. Other pressing duties have prevented the tenders' replacing them. They are now engaged on this duty.

#### SEVENTH LIGHT-HOUSE DISTRICT.

The seventh light-house district extends from Mosquito inlet to Egmont key, Florida.

The only work of importance in this district which is at present going on is Jupiter Inlet light-house. Operations on it were discontinued in June last, as, on account of the heat of the weather, the unhealthiness of the locality, and the swarms of stinging insects, the men were unable to work. Operations will be resumed at the commencement of the winter, and the structure will doubtless be completed during the coming season.

The general condition of the light-houses in this district is good, and the buoyage and stakeage has been completed, and is now in good condition.

#### EIGHTH LIGHT-HOUSE DISTRICT.

The eighth light-house district extends from Sea Horse key, Florida, to the western extremity of Lake Pontchartrain, Louisiana.

The lights in this district are in good condition. New apparatus (lens) has been put up at Bayou St. John, Mobile Point, and South Pass light-houses. Some small repairs have been made at Pleasonton Island and Tchefuncta River light-houses.

The new light-house at Pensacola and the new set of ranges at that place have been completed, and were lighted in January last. The new tower at Sand island was completed and the light exhibited in the same month.

Pass Manchac light-house was completed; new lens apparatus put up and lighted in February last.

The new light-house at Cape St. Blas was finished in April; a new third-order lens put up in it, and lighted the 1st of May last.

The tower at Round Island has been rebuilt. The light has not yet been shown at St. Joseph's, the land on which it was built not belonging to the United States. The tower is sinking into the mud, and the island is gradually washing away.

New buoys have been placed on Ocklockonee shoal, Southeast Point, Southwest Cape, on wreck Middle Ground, Mobile bay, and a deep-sea buoy at Southwest Pass.

#### NINTH LIGHT-HOUSE DISTRICT.

In the ninth light-house district, extending from the mouths of the Mississippi river to the Rio Grande, Texas, the condition of the light-houses is good.

The iron screw-pile light-houses at Shell keys and Southwest reef have been completed, and were lighted—the former on June 1st, and the latter on 1st of September last.

The light-house at Ship shoal has progressed well during the past year. It is now nearly completed, and a light is shown from it. The light-vessel formerly at that station has been removed. A more efficient vessel, to be used as a light-house and buoy tender, having been recently transferred to this district, the buoyage and beaconage of the district are being renovated.

#### TENTH LIGHT-HOUSE DISTRICT.

In the tenth light-house district, which embraces the coasts of Lakes Ontario and Erie, and the St. Lawrence, Niagara, and Detroit rivers, the condition of the light-houses is generally excellent.

Genesee River light-house, Ashtabula, Sodus Point, Cleveland beacon, and Gibraltar light-houses have been completely renovated.

Vermillion pier and beacon and Conneaut light-house have been rebuilt.

Erie range light has been thoroughly repaired.

The light-house pier at Oswego has been repaired under a special act of Congress. From the nature of the case, the repair is not general enough to place the works of that harbor in perfect order, but enough has been done to save this expensive and valuable work from the storms of the coming fall and winter.

The sites of Galloo Island, Horse Island, and Stony Point light-houses have been protected.

In conformity to act of Congress, the hill-light at Cleveland has been renovated and relighted.

The day-beacon on Charity shoal, in Lake Ontario, was carried away by the ice last winter, and a balloon buoy has been placed to mark the spot.

The buoys in the St. Lawrence river have been kept as last year. Those in the Niagara river, as well as the rest of the district, are in good order.

## ELEVENTH LIGHT-HOUSE DISTRICT.

The eleventh light-house district comprises the coasts of Lakes St. Clair, Michigan, Huron, and Superior, and Green Bay.

Many of the light-houses in this district will require repairs.

The iron pile light-house at Chicago has been completed, and was lighted on July 9 last. The protective works authorized by special act of Congress have been built during the past season, and it is confidently believed that the foundation of the light-house is entirely safe.

Tail Point, Cheboygan, Kalamazoo, and St. Joseph's light-houses have been rebuilt.

Important repairs have been made at Racine and Manitowoc light-houses and at Milwaukee beacon.

The site of Point Betsey light-house has been protected.

The site of the light-house authorized for Raspberry island, Lake Superior, has been selected.

## TWELFTH LIGHT-HOUSE DISTRICT.

In the twelfth light-house district, comprising the entire Pacific coast of the United States, the light-houses are all in good order.

The buoys in San Francisco bay have been well attended to. New ones have been placed from the mouth of the Columbia river to Astoria.

All of which is respectfully submitted.

By order of the Light-house Board.

W. B. SHUBRICK,  
*Chairman.*

RAPHAEL SEMMES,

*Secretary of the Treasury.*

## No. 17.

*Statement showing the present liabilities of the United States to Indian tribes, under stipulations of treaties, &c.*

Names of tribes.	Description of annuities, stipulations, &c.	Reference to laws.	Number of instalments yet unappropriated; explanations, remarks, &c.	Annual amount necessary to meet stipulations, in-define as to time, now allowed, but liable to be discontinued.	Aggregate of future appropriations that will be required during a limited number of years to pay limited annuities already expired; amounts included in the payment.	Amount of annual liabilities of a permanent character.	Amount held by the United States, on which five per cent. is annually paid; and amounts which, invested at five per cent., would produce the permanent annuities.
Blackfoot Nation .....	For purchase of goods, provisions, and other useful articles, &c.; 9th article treaty October 17, 1855.	1st session 34th Congress, page 41.	Ten instalments of \$20,000; six instalments to be appropriated.	.....	\$120,000 00	.....	.....
Comanches, Kiowas, and Apaches of the Arkansas river. Do.....	For purchase of goods, provisions, and agricultural implements; 6th article treaty July 27, 1853.	Vol. 10, page 1014..... ..... do .....	Ten instalments of \$12,000 provided; four instalments of \$3,000 each, yet unappropriated.	.....	72,000 00	.....	.....
Chippewas of Lake Superior. Do.....	Money, goods, support of schools, provisions, two carpenters, and tobacco; compare 6th article treaty September 30, 1854, and 4th article treaty October 4, 1852.	Vol. 7, page 592, and Vol. 10, page 1111.	Twenty instalments of \$15,000 each; four years, at \$7,000 per year. Twenty-five instalments; seven yet unappropriated.	.....	28,000 00	.....	.....
Do.....	Twenty instalments in cloth, goods, implements, &c., and for education; 4th article treaty September 30, 1854.	Vol. 10, page 1111.....	Twenty instalments of \$19,000 each; fifteen yet unappropriated.	.....	121,600 00	.....	.....
Do.....	Twenty instalments for six smiths and assistants, and iron and steel; 3d article treaty September 30, 1854.	Vol. 10, pages 1109, 1111.	Twenty instalments, estimated at \$6,360 each; fifteen unappropriated.	.....	95,400 00	.....	.....

The above statement embraces, with a few trifling exceptions, all the chartered banks in the Union that were in operation on the 1st of January, 1859. To complete the statement, it has been found necessary to give the "stocks," "other investments," and "other liabilities" of the banks of Rhode Island as they stood on the 25th of May, 1858, the returns from that State for January, 1859, not embracing those items.

according to returns dated nearest to January 1, 1859.

Other investments.	Due by other banks.	Notes of other banks.	Specie funds.	Specie.	Circulation.	Deposits.	Due to other banks.	Other liabilities.
